### III. NEED ANALYSIS:

Knowledge has an unlimited domain. Every day additions taking place in the treasure of knowledge. A scientific procedure is required to handle properly and systematically the enormous literature available in the world. The curriculum in library science needs revision on account of changes being introduced in the system due to adaption of new technology in this field also. The Computers are assisting us, to manage the job properly and exessesability has improved through introduction of Internet and Networking.

On account of increasing literacy the number of libraries have also increased. Small and medium size libraries are managed by middle level man power. The diploma holder in library science can handle the responsibilities assigned to him in efficient manner if he/she is equipped with modern techniques of organising, classifying, cataloguing, administration and reference services knowledge.

Besides educational institutions some research organisations and manufacturing industries also maintain their libraries. A diploma holder in library science may be prepared to share this type of assignment also.

#### IV. PROFILE DEVELOPMENT :

A tool in the form of questionnaire for getting information about job potential, job opportunities, man power requirements and job activities of Diploma holder in Library Science was designed and sent to various organisations, industries and higher technological Institutions and Polytechnics. The response was not very much encouraging. So efforts were made to get feed back through mutual interaction with the experts of above organisations, industries, higher technological institutes and polytechnics. The feed back received was discussed and analysed in a workshop and a draft curriculum was prepared adopting the following procedure.

1. Listing job potential and job activities.
2. Analysing activities into acknowledge and skill.
3. Determining course objectives.
4. Planning horizontal and vertical organisation of the subjects.
5. Developing study and evaluation scheme.
6. Development of detailed course content and coverage time keeping in view the knowledge and skill requirement.
7. Determination of resource input in the form of human resource, space, equipment etc.

It is hoped that revised curriculum of Diploma in Library Science will be useful in producing middle level manpower for world of work.
