Corrected and Approved By B.T.E. On dated 02.06.2015

**ONE YEAR(TWO SEMESTER) DIPLOMA COURSE
OF
COMPUTER HARDWARE & NETWORKING**

Main Features of Curriculum

- 1. Title of the course : PG Diploma in Computer Hardware & Networking**
- 2. Duration of Course : One Year(Two Semester)**
- 3. Type of the course : Full time**
- 4. Pattern of course : Semester System**
- 5. Intake : 60**
- 6. Admission Qualification : Graduate in any Discipline**

I. NEED ANALYSIS :

With the development of civilization, human needs to keep on increasing their fulfillment needed simulation, analysis of lot of information's too became essential. Now the individual responsibilities of every responsible citizen grew up to such a light that it is difficult for him to handle them successfully. Human memory too has its own limitations. So here comes the computer to help in all kind of decision making, whether it is highly complicated research work, war strategy, market speculations or day-to-day need of human life etc. As a matter of fact every individual activity needs decision making. So the computer is the need of organizations and also the need of individual being. With PCs penetrating every area of life, wide proliferation of internet and networking, It will not be exaggeration if we say that it is "Computer era".

So is the need for developing a course for computer field at diploma level. The course aims to develop personals, capable of taking responsibilities such as installation , repair and maintenance, networking, security administration and operating computer units. It is supposed that such personnel will not face any dearth of employment because of omni present nature of computer. Major areas being Hardware industry, Infrastructure Managed Services, BPO's, IT, Telecom, Banking & Financial sectors, Manufacturing Sectors.

The syllabus for diploma in computer Hardware & Networking has been developed to meet above mentioned aims. Obviously achievement of any aim requires knowledge of the means and procedures of thier utilisation. With this view various courses have been carefully selected and their length and depth decided by experienced experts in the field.

II. JOB POTENTIAL/JOB OPORTUNITIES

JOB POTENTIAL

Background Information Regarding Computer Industry: Most of the industries in Computer area are in private sector. The job designations are not standard. They change from firm to firm depending upon the size of firm and the nature of work, the firm is engaged in R & D or marketing software development etc. In general the jobs for a diploma holder in Computer engineering are available in the following areas :

- i. Service Division.
Maintenance, service and installation of computer system.
- ii. Production and Quality Control Division.
- iii. Marketing division.
- iv. Commercial (stores, purchase and pricing)
- v. Research and Development.
- vi. Network Administration & Security

JOB OPPORTUNITIES

The possible job opportunities for the product of this curriculum are :

- 1.3.1. Junior engineer/Design Assistant/Senior Technical Assistant in R&D, Quality Control and Testing activities.
- 1.3.2. Shopfloor manger/Assembly supervisor in manufacturing and production Activities.
- 1.3.3. Installation Engineer/Service Engineer/Junior Engineer/ Junior Service Engineer in installation, Service and Custom Support Activities.
- 1.3.4. Junior Marketing Executive/Junior Purchase Officer/Junior Stores Officer in Marketing and Commercial activities
- 1.3.5 Network Engineer/ Network & Security Administrator

III ACTIVITIES/JOB DESCRIPTION

Service Division:

Maintenance, service and installation of computer systems identify hardware and software faults and rectify them.

Suggests the desirable changes in the design in view of this maintenance Experiences.

Rectify fault by component and card level.

Advises the customer on site preparation and checks the site.

Install the systems and tests its operation.

Train the customer in the operation and the use of the system.

Help Desk Services, Server Management, Database/Security/ Web server Administration Networking

Production and Quality Control:

Indenting the material from stores and schedule the work of skilled workers.

- Fault finding in assembly work by visual inspection.
- Guiding skilled workers in component identification, component testing and precision assembly work.
- Fabricate (if required) test and interconnect different sub-assemblies and subsystems like power supply, interface, processor and memory units, video display unit, printer, plotter, graphic monitor, hard disc drives interface etc.
- Managing personnel like technicians and skilled workers.

Marketing:

- Meeting with prospective customer under the guidance of sales engineer.
- Arranging demonstration at the site of customer.

Commercial:

- Assists sales engineer in the sales of computer system (Contacts customer, arranges demonstration, preparation of technical documents and specification).
- Purchase material (writes specifications, receiving quotations, prepares and checks comparative statements, checks bills).
- Prepare bill for service charges and cost of materials used.
- Incoming inspection (checking quality, quantity and specification of the material supplied against orders).
- Maintains stocks and records.

Research & Development Work:

- Design simple microprocessor based subsystem (without optimization) under the guidance of design engineer.
- Printed circuit board (PCB) layout design under the guidance of design engineer.
- Fabricates prototype of a subsystem or system.
- Plans flow of activities for production along with engineer.
- Test systems at card level, subsystem level and at complete system level.
- Documents the layouts, circuit diagram, procedures and processes.
- Develops systems software, the line drivers and interface with the guidance from engineer and runs it.
- Communicates with engineer and assists him in converting technical ideas into practical shape.
- Assist engineer in laying test procedures, tests standards and maintaining the quality of the products.

IV. COURSE OBJECTIVE:

Course objectives lay the foundation for planning educational programme.

1. Knowledge:

Corrected and Approved By B.T.E. On dated 02.06.2015

- 1.1 He must acquire basic concepts in electronic components active as well as passive.
- 1.2 He must acquire basic concepts and principles of working of linear and digital circuits using discrete components and integrated circuits.
- 1.3 He must have the knowledge of testing procedure of active and passive components, (including integrated circuits) discrete and digital circuits by making use of different test instruments as per to their specification.
- 1.4 He must acquire knowledge of system block diagram and working principles of different computer peripherals.
- 1.5 He must acquire the knowledge of making P.C.B. layouts and learn drafting techniques.
- 1.6 He must acquire the knowledge of efficient use of system software by writing a small diagnostic programme to test system.
- 1.7 He must acquire the knowledge of working principles of the total system i.e. C.P.U., peripherals, interfaces and system software.
- 1.8 He must acquire the knowledge of Help Desk Services, Server Management, Database/Security/ Web server Administration and Networking .

2. Skill

- 2.1 He must acquire skill in finding faults in a computer system. The fault may be at component level or at card level or at sub system level. After finding fault he must be able to repair to it.
- 2.2 He must acquire skill in preparation of site for installation of a computer.
- 2.2 He must acquire skill in installing different subsystem (Power supply, Video display unit, C.P.U. , Printer, Plotter, Graphic monitor, Disc drives etc.).
- 2.4 He must acquire skill in operating and testing the working of different subsystems installed.
- 2.5 He must acquire skill making (or designing) layout on printer circuits board for a given electronic circuit.
- 2.6 He must acquire skill in fabricating (electronic circuit using different electronic components including ICs) on a printed circuit board according to a given circuit diagram.
- 2.7 He must acquire skill testing the performance of an electronic circuit

fabricated on a printed circuit board making use of different electronic instruments.

2.8 He must acquire skill in Help Desk Services, Server Management, Database / Security/ Web server Administration & Networking

3. Attitude:

3.1 He should have open minded approach while finding fault in the system.

3.2 He should have analytical approach while dealing with any problem.

3.3 He should be a keen observer while finding fault with the system and circuits.

3.4 He should have habit of reading commercial and technical literature regarding computer.

**STUDY & EVALUATION SCHEME FOR
ONE YEAR (TWO SEMESTER) PG DIPLOMA IN
Computer Hardware & Networking**
(Effective from session 200 -200)

I Semester

S.No	SUBJECT	PERIOD PER WEEK		EXAMINATION SCHEME								GRAND TOTAL
		THEORY	PRAC	THEORY				PRACTICAL				
				EXAMINATION DUR	MARKS	SESS MARKS	TOTAL MARKS	EXAMINATION DUR	MARKS	SESS MARKS	TOTAL MARKS	
1.1	FUNDAMENTALS OF INFORMATION TECHNOLOGY	08	--	2.5	50	20	70	--	--	--	--	70

	TOTAL	12	36		100	40	140		390	180	570	710
	Games/NCC/Social and Cultural Activity + Discipline (15 + 10)											25
	TOTAL											735
	100% Carry Over of I Semester											565
	Grand Total											1300

- NOTE: (1) Each period will be of 50 minutes duration.
(2) Each session will be of 16 weeks.
(3) Effective teaching will be atleast 14 weeks.
(4) Remaining periods will be utilised for revision etc.

Corrected and Approved By B.T.E. On dated 02.06.2015

(5) 2 Weeks structured & supervised branch specific task oriented industrial/field exposure to be organized at the end of session.. The students will submit a report. This will be evaluated at institution level for 30 marks & 50 by Project examiner for viva and report presented by the student.

List of Experts

Workshops held on 11-11 2008 & 24-02-2009 in which the suggestion, contribution and support of following experts is a matter of obligation to I.R.D.T.

1. Sri.Alok Tiwari
Technical Director
NIC,Kanpur Dehat
2. Sri Peeyush Misra
Senior Manager
UPTEC, The Mall ,
Kanpur
3. Sri Ashraf Ali
Head Computer,
GGP,Lucknow
4. Sri L.S Yadav
Head Computer,
GP,Kanpur
5. Sri Ashok Kushwaha
Head Computer,
GP,Lucknow
6. Sri Kamlesh Tiwari
Lec Computer,
GP,Kanpur
7. Sri S.K.Srivastava
Lec Computer,
GGP,Allahabad
8. Smt. R.P.Alam,(Curriculum Incharge)
Asst.Professor,I.R.D.T,Kanpur.

Workshops held on 19-12 2013 & 22-09-2014 in which the suggestion, contribution and support of following experts is a matter of obligation to I.R.D.T.

1. Sri L.S Yadav
Principal,
GP,Unnao
2. Shri Mohd. Sabir
Principal
G.P. Etawah

Corrected and Approved By B.T.E. On dated 02.06.2015

3. Shri Santosh Kumar
HOD(Electronics)
G.P., Unnao
4. Shri Mohd. Aslam
Head (Computer)
G. P. Gonda
5. Shri Neeraj Kumar
Lecturer (I.T.)
G. P., Kanpur
6. Shri P. S. Arya
Lecturer (I.T.)
G.P., Lucknow
7. Shri Y. K. Sharma
Lecturer (Electronics)
A.I.T.H., Knapur
8. Shri Deepak Srivastava
Computer Programmer
G. P., Barabanki
9. Shri Mohd. Tariq
Deputy Director
I.R.D.T., U.P., Kanpur

List of Experts (Semester System)

Workshops held on 08.04.2015 in which the suggestion, contribution and support of following matter of obligation to I.R.D.T.

- | | | | |
|----|----------------------|-----------------|-------------------------|
| 1. | Smt Priti Chaturvedi | Lecturer | CSJM University, Kanpur |
| 2. | Shri Neeraj Kumar | Lecturer | G. P., Kanpur |
| 3. | Shri Lital Kumar | HOD Electronics | I.R.D.T.,U.P., Kanpur |

I Semester

1.1 FUNDAMENTALS OF INFORMATION TECHNOLOGY

(Common With P.G. Diploma In Web Designing)

L T P

8 - -

TOPIC WISE DISTRIBUTION OF PAPER

S.No.	Topic	L.	T.	P.
1.	Introduction of Information Technology	24	-	-
2.	Components of Information Technology	24	-	-
3.	Data Representation	20	-	-
4.	Memory Organization	20	-	-
5.	Emerging Trends on IT	24	-	-
	Total	112	-	

Detailed Content

1. INTRODUCTION OF INFORMATION TECHNOLOGY :

Definition of data and information, difference between data and information's need for information, qualities of information, value of information, categories of information level of information, use of information technology in office automation, Computers and its types of PC e.g. Desk Top, Lap Top, Note Book, Palm Top.

2. COMPONENTS OF INFORMATION TECHNOLOGY :

Hardware components and its functioning- input unit, control processing unit, output unit. Types of input units and output units, computer software, Types of software, system software, Application software.

3. DATA REPRESENTATION :

Number System, Conversion from decimal to binary, conversion from binary to decimal, hexadecimal and octa-decimal no., Binary arithmetic-Addition, Substraction, Multiplication, Division, 1^s complement, 2^s complement, signed magnitude representation of data. System memory addressing and its importance, ASCII and EBCDIC coding system.

4. MEMORY ORGANIZATION :

Memory system of PC, Primary memory, RAM, ROM, Secondary memory, Types of secondary storage, Access mechanism of storage devices. High Speed memory – Cache Memory Hierarchy.

5. EMERGING TRENDS IN INFORMATION TECHNOLOGY :

Concepts of networking and LAN, MAN, WAN, Advanced input/output devices and their use (MICR, OCR, Scanner, Light pen, Plotters, Micro films, Rewritable, Optical devices, Multimedia, Video conferencing, Tele conferencing and Introduction to Mobile Computing.

Corrected and Approved By B.T.E. On dated 02.06.2015

1.2 BASICS OF ELECTRONICS & MEASURING INSTRUMENTS

		L	P
		6	8
S.NO.	Topics	L	P
1	Passive components	12	-
2	Semiconductor physics	4	-
3	Semiconductors diodes	15	-
4	Transistor:	15	-
5	Integrated circuits	8	-
6	Regulated power supply	15	-
7	Basic measuring instruments	15	-
Total		84	112

1. PASSIVE COMPONENTS- Resistors, Capacitors, Inductors, Transformers – Types, Working and Properties. Voltage and Current Sources.

2. SEMICONDUCTOR PHYSICS

Pure (intrinsic) semiconductors-Silicon, Germanium: Thermal Generation (formation of charge carrier-Positive & Negative charge carriers i.e. electron-hole pair) , p-n junction.

3. SEMICONDUCTORS DIODES:

3.1 Effect of applying electrical potential across a P-N Junction in the following ways:

(a) Positive of the source to 'P' type terminal & Negative to the 'N' type terminal

(b) Positive of the source to 'N' type terminal & Negative to the 'P' type terminal.

3.5 Half wave rectifier, Full wave rectifier using C.T. '1 transformer, using bridge circuits)

3.6 Special purpose diodes: Zener diode, Vactor diode, Photo Diode, Light emitting Diode (LED), their characteristics and uses.

4 TRANSISTOR:

4.1 Two P-N Junction back to back (ie.PNP & NPN) Junction transistor structure transistor, action of transistor in FF,RR,FR and RF biasing;

4.2 Various configurations of transistor (CB,CE, CC), Working of a transistor as an amplifier (CE Configuration only)

5. INTEGRATED CIRCUITS:

5.1 Introduction, advantage and limitation of IC's

5.2 SSI, MSI, LSI, VLSI, ICs;

5.3 Linear and Digital ICs;

6. REGULATED POWER SUPPLY

1. Basic regulator using Zener Diode

2. IC based power supplies, Common IC's, pin configuration their measurements

3. Basic of switch mode power supply (SMPS)

4. Basic of uninterrupted power supply

5. Concept and Practices of Earthing

7. BASIC MEASURING INSTRUMENTS

7.1 Multimeters – Analog & Digital – Basic principles of measurement & specifications

7.2 Cathode Rays Oscilloscope – Block diagram & basic working, specification, Different uses of CRO, Different types of CRO – dual trace, storage (Brief introduction)

List of Practicals:-

1. Ohm's Law verification.
2. To verify laws of series of parallel connection of resistance.
3. Simple circuits showing the use of capacitance and inductance.
4. Study of transfer, its uses
5. Semiconductor diode characteristics.

Identifications of types of packages, terminals and noting different ratings for various types of semiconductor diodes (Germanium, point contact, silicon low power and high power and switching diode)

Plotting of forward V-I characteristics for a point contact and junction P-N diode (Silicon & Germanium diode)

6. Rectifier Circuits using semiconductor diode, measurement of input and output voltage and plotting of input and output wave shapes.

Half wave rectifier

Full wave rectifier (center tapped and bridge rectifier circuits.)

7. To plot forward and reverse V-I characteristics for a zener diode.
8. To plot wave shapes of a full wave rectifier with shunt capacitor , series inductor and filter circuits.
9. Identification of some popular IC's of 74, 40 series and voltage regulator IC's with pin number and other details.
10. Measurement of voltage,. Frequency of a signal using CRO.
11. Different applications of a multimeter

1.3.FUNDAMENTAL OF DIGITAL ELECTRONICS AND MICROPROCESSOR

L P
8 8

S.NO.	Topics	L	P
	Part-1	4	
1	Introduction	4	-
2	Number System	4	-
3	Codes and codes conversion	8	-
4	Logic Gates	12	-
5	Logic Families and Digital IC's	8	-
6	Encoders, Decoders & Display Devices Associated Circuits	12	-
7	Flip Flops and Counters	8	-
8	Shift Registers	8	-
9	Memories	12	-
10	A/D and D/A Converter	8	
11	Overview of Microprocessor System	8	
12	Memory of a Microprocessor	8	
13	Evolution of Microprocessor	8	
14	Introduction To 8085 Microprocessor		
Total		112	112

1. INTRODUCTION TO DIGITAL ELECTRONICS;

- 1.1 Basic difference between analog and digital Signal.
- 1.2 Application and advantages of digital signal processing.

2. NUMBER SYSTEM;

- 2.1 Binary, Octal and Hexadecimal number system; conversion From decimal octal and hexadecimal to binary and vice-versa.
- 2.2 Binary addition, subtraction, multiplication and division including binary numbers
- 2.3 1's and 2's complements method subtraction.

3. CODES AND CODE CONVERSION

- 3.1 The 8421 and excess-3 codes; mention of other popular BCD Codes
- 3.2 Addition of 8421, BCD coded numbers its limitations and Excess-3 coded numbers.

4. LOGIC GATES;

- 4.1 Definition, symbols and truth tables of NOT, AND, OR, NAND, NOR, EXOR Gates.
- 4.2 Concept of negative and positive logic. Use of NAND and NOR Gate as universal gate.
- 4.3 Overview of Half Adder/Subtractor and Full Adder/ Subtractor (Block Diagram Only)

5. LOGIC FAMILIES AND DIGITAL ICS;

- Logic family classification:
- 5.1 Concept of Bipolar Logic, Diode Logic, Transistor Inverter, TTL logic, MOS, CMOS logic, ECL Logic

6. ENCODER, DECODERS & DISPLAY DEVICES ASSOCIATED CIRCUITS;

- 6.1 LED, LCD, seven segment display. Basic operation of various commonly used types.
- 6.2 Decoder circuits -for 7 segment display.
- 6.3 Basic decimal to BCD encoder circuits.
- 6.4 Basic Multiplexer and De multiplexer

7. FLIP FLOPS AND COUNTERS :

- 7.1. Brief idea of Flip-Flops and their operations. RS, T, D, JK, Master/Slave JK Flip Flop mention commonly used ICs Flip flops.

7.2 Counters and counters classification.

7.3 Familiarization with commercial TTL/CMOS counters ICs.

8. SHIFT REGISTERS;

8.1 Introduction and Basic concepts including shift left and shift right.

8.2 Serial In Serial Out

Serial In Parallel Out

Parallel In Serial Out

Parallel In Parallel Out

8.3 Universal shift register.

9. MEMORIES

9.1 Classification according to the following heads.

(a) Volatile and non-volatile memories.

(b) Random access memories and sequential access.

(c) Semiconductor and non-semiconductor memories.

(d) Destructive and non-destructive memories.

9.2 Semi-conductor ROMs, PROMs, EPROM, SRAM. DRAM, structure and working of CCD. R/W memory.

10. A/D AND D/A CONVERTERS:

10.1 Use of A/D and D/A converters.

11. Overview of Microprocessor System:

1.1 Functional block.

(a) CPU

(b) Memory

1.2 Concept of programme and data memory

(a) Registers (general purpose)

1.3 Data transfer between registers.

1.4 Concept of tristate bus

1.5 Control on registers.

12. Memory of a Microprocessor

12.1 Concept of byte organized memory

(a) Address inputs.

(b) Address space

(c) Data input/output

12.2 Addressing and Address decoding

(a) Memory system organization

(b) Partitioning of total memory space into small blocks.

12.3 Memory Chips

(a) Power supply inputs.

12.4 Extension of memory

- In terms of word length and depth

13. EVOLUTION OF MICROPROCESSOR

13 8085 Microprocessor architecture.

13.1 Instruction pointer and instruction register

13.2 Instruction format

- Machine and Mnemonics codes.

- Machine and Assembly language
- 13.3 Instruction decoder and control action
- 13.4 Use of Arithmetic Logic unit
 - Accumulator .
 - Temporary Register
 - Flag flip-flop to indicate overflow, underflow, zero result occurrence
- 13.5 Timing and control circuit
 - Crystal and frequency range for CPU operation
 - Control bus to control peripherals.
- 14. Introduction of 8085 Microprocessor
 Overview of 8086 Microprocessor
 Evolution of Microprocessor , Register Structure , ALU, BUS organization , Timing and Control.

LIST OF PRACTICALS

1. Identification of IC- nos, Pin- nos, IC types
2. To observe that logic Low and logic High do not have same voltage value in Input
Output of logic gate.
3. Familiarisation and use different types of LEDs common anode and common cathode seven segment display.
- 4 Use of 7447 BCD to 7-segment decoder.
- 5 Verification of truth table for 2 input NOT, AND, OR, NAND, NOR, XOR Gates.
- 6 To construct a 4- bit even/odd parity generator/checker using XOR gates and to verify their truth tables.
- 7 Verification of truth table for half adder and half subtractor
- 8 Verification of truth table for full adder.
- 9 To construct a full adder circuit with XOR and NAND gates.
- 10 To verify the truth table for J-K, M/S and D type, R-S F/F.
- 11 To decode a 3 line to 8 line encode from 8 line to 3 line and to observe input and outputs.
- 12 Assembly language programming using 8085 trainer kit for the following programmes
 - a. Two 8 bit addition of numbers
 - b. Two 8 bit subtraction of numbers
 - c. Multiplication of two 8 bit numbers
 - d. Addition of two 16 bit numbers

1.4 OPERATING SYSTEM CONCEPTS

		L	P
		4	-
S.NO.	Topics	L	P
1	Introduction	24	-
2	Types of OS	20	-
3	Disk Operating System	24	-
4	Windows	20	-
5	LINUX	24	-
Total		112	

1. **INTRODUCTION** : Need of OS Function/ services of OS.
 2. **TYPES OF OS** : Batch processing, Multi programming, Multitasking, Time sharing, Distributed, Network, Real time, Multi processor system and Parallel processor.
 3. **DISK OPERATING SYSTEM** : Booting process of DOS, Purpose of Batch file, Internal and External commands, Disk related commands – FDISK, CHKDSK, SCAN DISK, DEFRAG, etc.
 4. **WINDOWS** : GUI, ICON, Toolbar, working with files, Installation of new software, Control panel, Explorer, Accessories, Network neighbourhood, System tools, Recycle bin, Files and Directory management.
- LINUX** : Structure, Kernel and Shell, Basic command, File system, VI editor.

II Semester

2.1 COMPUTER HARDWARE & MAINTENANCE

L P
- 10

COMPUTER HARDWARE & MAINTENANCE LAB

1. Study various mother boards- non-integrated, semi-integrated, integrated
2. Understand the mother board component
3. Familiarize the different types of expansion slot (ISA, EISA, PCI, AMR).
4. Study the expansion cards namely add-on-cards (audio, graphics, i/o, tv tuner, etc).
5. Study different types of switch mode power supply – AT, ATX, NLX
6. Understand the power requirements for various components in a system
7. Study the different connectors and ports of a PC
8. Understand the various cables in a computer system
9. Familiarize the different types of memory modules.
10. Study various secondary storage- Floppy drive/Disk, Hard disk, Flash drive, CD.
11. Understand the internal structure of HDD, Floppy drive, CD drive.
12. Understand the procedure of assembling a computer system.
13. Study the various techniques for formatting
14. Familiarize the hard disk partitioning using different tools.
15. Study the procedure for installing operating system – LINUX & Windows.
16. Familiarize the management of operating system components.
17. Exercise of DOS commands, UNIX, LINUX commands.
18. Study of various printers (Dot Matrix, Ink Jet, Laser, Multi Function).
19. Familiarize the interfacing of printers and installing driver software
20. Understand the interfacing, installation, working of various device such as Scanner, Projector, etc.
21. Understand the system Maintenance and trouble shooting.

2.2. COMPUTER COMMUNICATIONS & NETWORKING

		L	P
		6	6
S.NO.	Topics	L	P
1	Basic Data Communication	4	-
2	Data Transmission	12	-
3	Transmission Media	12	-
4	Protocols & Architecture	8	-
5	Data Link	8	-
6	Local Area Network	12	-
7	Networking Devices	6	-
8	Network Layer	12	-
9	Transport Protocols	5	-
10	Wide Area Networks	5	-
Total		84	84

1. BASICS OF DATA COMMUNICATION :-Introduction, Types of Data , Difference of Data & Information.

2. DATA TRANSMISSION : Analog Transmission, Digital Transmission. Five Components of data transmission, characteristics of data communication. Modes of data Transmission- Simplex Half duplex / Full Duplex. Synchronus & Asynchronus Data Communication. Types of Network- LAN,MAN,WAN, Modulation – AM, FM, PM, QAM, Modem Wavelength multiplexing- FDM, TDM, WDM.

3. TRANSMISSION MEDIA : STP (Shielded Twisted Pair), UTP (Unshielded Twisted Pair) ,Coaxial Cable, Cabling Standards for LAN using UTP Cable, How to do Crimping, Building Straight Through Cable and Cross Cables, Testing Cable Continuity.

Twisted pair, Coaxial Cable, Optical Fibers, Wireless Transmission, Microwave, Radio Waves and their respective connectors, IEE standards.

4. PROTOCOLS AND ARCHITECTURE: OSI reference models, TCP/IP Protocol suit.

5. DATA LINK CONTROL AND PROTOCOL: Flow Control - Stop and Wait, Sliding window, Error Detection, parity & CRC, Error correction, humming code, HDLC.

6. LOCAL AREA NETWORK : LAN architecture, LAN topologies - Bus/Tree LAN, Ring LAN, Star LAN, Wireless LAN, Ethernet and Fast Ethernet (CSMA/CD), Token Bus, token ring and FDDI.

7. NETWORKING DEVICES- Hub, switch, Bridge, Routers, Repeaters, gateways, Modems.

8. NETWORK LAYER- Introduction , Routers, Routing Algorithms, Congestion, Sub networking and Class Less Inter Domain (CCIDR),

NAT and PAT, Control algorithm, IP Addressing, DNS, Working of Internet- Web Server, Browser, HTTP, HTTPS, Web Services, Internet Architecture, IIS, Web Application.N/w Security – Cryptography.

Corrected and Approved By B.T.E. On dated 02.06.2015

9. **TRANSPORT PROTOCOLS:** Transport services, TCP, UDP.

10 **WIDE AREA NET WORKS:** WAN, Circuit switching, Packet switching, Frame relay, ATM, ISDN.

List Of Practicals

1. To connect and built computers in different ways in a LAN (Topologies-star, ring, bus, tree)
2. To connect and understand different network devices used in LAN- Hubs, Switches, Routers, Bridges, Repeaters, Gateways, Modems.
3. To study the constructional details of transmission media- co-axial cables, twisted pair cables, optical fiber cable.
4. To create network cable using RJ 45 connectors.
5. Connections of two hubs by creating cross over connections.
6. To install a network interface card (NIC) and locate mac address of computer
7. To install TC/IP protocol and configure its advance property.
8. To Install network printer.
9. Installing IIS, making web server, web directory, connection via remote desktop, to know browsers.
10. To identify different problems and troubleshooting of network exm- no network, card problem, cable problem, IIS problem.

2.3 NETWORK ADMINISTRATION

L P
6 8

S.NO.	Topics	L	P
1	Introduction	15	-
2	User & Group Managements	10	-
3	Domain User Account	10	-
4	Installing and Configuring Terminal Services	10	-
5	Installing DNS	10	-
6	Installing and Configuring DHCP	8	-
7	Configuring & Implementing routing Services	8	-
8	Planning implementing an OU structure	8	-
9	Local and domain security policies	5	-
Total		84	112

1. What is network administration and role of network administrator.

2. User & Group Managements, NTFS & share permissions. Using device manager, Drivers signing & signature verification. Managing Ports, Installing & Managing & configuring printers. Disk Management Tools & Tasks, File Systems, User Management. Installing Active Directory.

3. Domain user account, configuring user account properties. Domain groups. Viewing a user's effective permission. Creating and managing shares. Implementing files and folder NTFS & share permission, Special permission, inheritance. Implementing Shadow copies. Implementing and Managing the Distributed File system(DFS). Auditing Access to Resources.

4. Installing and Configuring Terminal Services. Managing servers remotely using terminal services (Remote desktop). Backup restoring data.

5. Installing DNS. Implementing DNS in windows 2003 networks.

6. Installing and configuring DHCP. Monitoring and Managing Internet information services (IIS 6.0) Remote Access server. Configuring & Implementing VPN. Configuring & Implementing Remote Access services.

7. Configuring & Implementing routing services. Configuring & implementing ICS. Active directory services. Implementing active directory services forest.

8. Planning implementing an OU structure. Implementing server roles. Restoring active directory.

9. Local and domain security policies. Working with group policy. Configuring the user environment by using group policy. Deploying software through group policy.

List Of Practicals

- 1.Installation & configuration of Windows 2000 professional.
- 2.Installation & configuration of Windows 2003 server.
- 3.Installing and Configuring Terminal Services
- 4.Installing DNS. Implementing DNS in windows 2003 networks.
- 5.Installing and configuring DHCP.
- 6.Configuring & Implementing routing services
7. Start and stop services of administration.

2.4.PROJECT

L P
- 12

GENERAL OBJECTIVE:

Purpose of the project work is :

(i) To develop abilities of diagnosing problems.

(ii) To develop the abilities to :

- (a) Make literature survey.
- (b) Design/develop/frbriicate/test simple circuits.
- (c) Prepare documents for electronic work.
- (d) Work as a team.

1. COMPUTER SCIENCE PROJECT (SW/HW):

The student is expected to work on a project in consultation and acceptance with the instructor on either system software or hardware aspects related to industrial environment. The student is also expected to fabricate different cards used in PC, their testing and assembly of PC.

The end targets for the project should be well defined and evaluation should place major importance on meeting these targets.

2. NETWORKING PROJECT

The student is expected to work and learn from implementing an application software and study its functional and performance aspects and submit a report.

The evaluation must be based on the project report and the seminars.

1ANNEXURE-QUESTIONNAIRE

INSTITUTE OF RESEARCH,DEVELOPMENT AND TRAINING U.P.KANPUR -208024

SUBJECT: Questionnaire for ascertaining the job potential and activities of PG diploma holder in Computer Hardware & Networking.

PURPOSE: To design and develop one Year (Two Semester)PG diploma curriculum in Computer Hardware & Networking

NOTE: 1.Please answer the questions to the points given in the questionnaire.
2.Any other point or suggestion not covered in this questionnaire may be written on a separate paper and enclosed with the questionnaire.

1.Name of the organisation:_____

2.Name & Designation of the officer _____
filling the questionnaire _____

3.Name of the department/section/
shop _____

4.Importent functions of the _____
department/section/shop _____

5.Number of diploma holder employees
under your charge in the area of _____
Computer Hardware & Networking.

6.Please give names of modern equipments/machines handled by a
diploma holder in Computer Hardware & Networking.

- | | | |
|----|----|----|
| 1. | 2. | 3. |
| 4. | 5. | 6. |

7.What proficiencies are expected from a diploma holder in
Computer Hardware & Networking.

- | | | |
|----|----|----|
| 1. | 2. | 3. |
| 4. | 5. | 6. |

8.Mention the approximate percentage of the following desired in
Diploma teaching.

Corrected and Approved By B.T.E. On dated 02.06.2015 39

- 1. Theoretical knowledge -----%
- 2. Practical knowledge -----%
- 3. Skill Development -----%

9. Do you think " on the job training" / Industrial training should form a part of curriculum. (Yes/ No)
if yes then

- (a) Duration of training -----
- (b) Mode of training
 - 1. Spread over different semesters
 - 2. After completion of course
 - 3. Any other mode

10. What mode of recruitment is followed by your organisation.

- 1. Academic merit
- 2. Written test
- 3. Group discussion
- 4. Interview
- 5. On the job test.

11. Mention the capabilities/ Qualities looked for while recruiting diploma holder in Computer Hardware & Networking.

- (a) Technical knowledge -----
- (b) Practical skill -----
- (c) Etiquettes and behaviour -----
- (d) Aptitude -----
- (e) Health, habit and social background -----
- (f) Institution where trained -----

12. Does your organisation have any system for the survey of Home articles of different countries/States. Yes/No

13. Does your organisation conduct field survey to know users views regarding. Yes/No

- 1. Home Articles for different age groups and sex.
 - 2. Effect of climatic conditions
 - 3. Any other
- If yes ; Please give brief account of each.

14. Which type of assignment do you suggest for an entrepreneur in Computer Hardware & Networking.

15. In which types of organisations can a diploma holder in Computer Hardware & Networking can work or serve.

- 1 2 3

- 4 5 6

16. Job prospects for the diploma holder in Computer Hardware & Networking the next ten years in the state / country.
17. In your opinion what should be the subjects to be taught to a diploma student in Computer Hardware & Networking.
18. Kindly mention particulars regarding topics/areas which should be given more emphasis in the curriculum .
- | Theory | Practical |
|--------|-----------|
| | |
19. Kindly state whether your organisation can contribute towards improvement of curriculum in above field. Yes/ No
If yes : Please give names of experts in your organisation to whom contact.
20. Kindly give your valuable suggestions for being considered at the time of finalisation of curriculum.
21. What changes in technologies are to be incorporated in the development of curriculum in Computer Hardware & Networking.

(Signature)

Kindly mail the above questionnaire duly filled to:-

Litil Kumar
HOD Electronics
Institute of Research,Development & Training,U.P.
Kanpur-208024

(Please note that all information in this survey is confidential for the use of curriculum design only)

2ANNEXURE- FIELD EXPOSURE SCHEDULE

All the students after annual examination will undergo industrial training for a period of two week in Industries dealing with computers. It will in all respect end by the end of summer vacation. Project examination will be held after training It will be arranged and supervised by institute staff. The performa for preparing a report of his stay there in the industry given below can be taken as a guide for the purpose.

1. Name & Address of the organisation
2. Nature of the industry and its activity.
3. Date of
 - i. Joining
 - ii. Leaving
4. Details of the sections of the industry visited.
 - i. Name of tools, equipments instruments in use.
 - ii. Activities of the section
 - iii. Study of the components, devices used in complete assemblies.
 - iv. Soldering and de-soldering techniques used in circuit fabrication.
 - v. Study of PCB Lay out developing and preparation.
 - vi. Checking and testing of the components used.
 - vii. Final checking of the product.
 - viii. Description of quality control measures taken in industry.
