

NSQF Aligned Curriculum
for
Three Years (Six Semester) Diploma Programme
in
TEXTILE TECHNOLOGY
For the State of Uttar Pradesh

Effective from Session 2022-23

Prepared by:

Curriculum Development Cell

Institute of Research Development & Training

U. P., Kanpur-208002

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

PREFACE

An important issue generally debated amongst the planners and educator's world over is how technical education can contribute to sustainable development of the societies struggling hard to come in the same bracket as that of the developed nations. The rapid industrialization and globalization has created an environment for free flow of information and technology through fast and efficient means. This has led to shrinking of the world, bringing people from different culture and environment together and giving rise to the concept of world turning into a global village. In India, a shift has taken place from the forgettable years of closed economy to knowledge based and open economy in the last few decades. In order to cope with the challenges of handling new technologies, materials and methods, we have to develop human resources having appropriate professional knowledge, skills and attitude. Technical education system is one of the significant components of the human resource development and has grown phenomenally during all these years. Now it is time to consolidate and infuse quality aspect through developing human resources, in the delivery system. Polytechnics play an important role in meeting the requirements of trained technical manpower for industries and field organizations. The initiatives being taken by the Technical Education, UP to revise the existing curricula of 12 diploma Programs as per the needs of the industry and making them NSQF compliant, are laudable.

In order to meet the requirements of future technical manpower, we will have to revamp our existing technical education system and one of the most important requirements is to develop outcome-based curricula of diploma Programs. The curricula for diploma Programs have been revised by adopting time-tested and nationally acclaimed scientific method, laying emphasis on the identification of learning outcomes of diploma Program.

The real success of the diploma Program depends upon its effective implementation. However, best the curriculum document is designed, if it is not implemented properly, the output will not be as expected. In addition to acquisition of appropriate physical resources, the availability of motivated, competent and qualified faculty is essential for effective implementation of the curricula.

It is expected of the polytechnics to carry out job market research on a continuous basis to identify the new skill requirements, reduce or remove outdated and redundant courses, develop innovative methods of course offering and thereby infuse the muchneeded dynamism in the system.

K. Ram
Director
Institute of Research Development & Training, U. P.
Kanpur

ACKNOWLEDGEMENTS

We gratefully acknowledge the guidance and contribution received from the following persons:

1. Principal Secretary, Technical Education, Govt. of UP for his exemplary vision and approach.
2. Special Secretary, Technical Education Department, Govt. of UP for his support and motivation.
3. Sh. K. Ram, Director, Technical Education, UP and Director, I.R.D.T., Kanpur for continuously motivating, guiding and taking keen interest in the review of this curriculum.
4. Secretary, Board of Technical Education, UP for his support in this project of review curriculum.
5. All the participants from industry/field organizations, engineering colleges, polytechnics, and other technical institutions for their professional inputs during curriculum workshops.
6. Faculty/Subject Experts from different departments of U.P. Government polytechnics for content updating.
7. CDC Officer and other Concerning Staff of I.R.D.T. Kanpur for their support and assistance in the conduct of Curriculum workshops at different places.

Coordinator
Institute of Research Development and Training, U.P.
Kanpur

1. SALIENT FEATURES OF DIPLOMA PROGRAMME IN TEXTILE TECHNOLOGY

- 1) Name of the Programme : Diploma Programme in Textile Technology
- 2) Duration of the Programme : Three Year (Six Semesters)
- 3) Entry Qualification : Matriculation or equivalent NSQF Level as prescribed by State Board of Technical Education, UP
- 4) Intake : 60 (or as prescribed by the Board)
- 5) Pattern of the Programme : Semester Pattern
- 6) NSQF Level : Level-5
- 7) Ratio between theory and Practical : 47:53 (Approx.) Practice
- 8) Industrial Training :
Four weeks of industrial training is included after IV semester during summer vacation. Total Marks allotted to industrial training will be 50.
- 9) Student Centered Activities:

A provision of 3-6 periods per week has been made for organizing Student Centered Activities for overall personality development of students. Such activities will comprise of co-curricular activities such as expert lectures, self-study, games, hobby classes like photography, painting, singing etc. seminars, declamation contests, educational field visits, NCC, NSS and other cultural activities, disaster management and safety etc.

- 10) Project work

A project work has been included in the curriculum to enable the student get familiarize with the practices and procedures being followed in the industries and provide an opportunity to work on some live projects in the industry.

2. EMPLOYMENT OPPORTUNITIES FOR DIPLOMA HOLDER IN TEXTILE TECHNOLOGY

Keeping present scenario in view following employment opportunities are visualized in different sectors of employment for diploma holders in Textile Technology

(1) Manufacturing Industry

The Textile Technology diploma holder will be able to execute following activities:

- Supervisor and managerial job in Man Made Fibre production Industry.
- Production Supervisor in Cotton Ginning Industry
- Production Supervisor in Spinning Preparatory(blow room to Roving formation)
- Production Supervisor in Ring Frame and Post Spinning Department.
- Quality Assurance/Control in Spinning Mills
- Machine installation and maintenance in Spinning Mills.
- Assistance in Research and Development in Spinning and Weaving Mills.
- Assistance in Production Planning and Control in Spinning and Weaving Mill,
- Shop-floor Management Spinning and Weaving
- Production Supervisor in weaving Preparatory and Loom Shed.
- Inventory Management
- Marketing and Sales
- Quality Assurance/Control in Weaving Mills
- New Product Development in different types of fabric.
- Production Supervisor in Dyeing and Finishing Process.
- Textile testing Lab in charge
- Production Supervisor in Knitting Industry
- Garment/Apparel Production Management.
- Technical Textile Industry

(2) Government Departments such as DRDO, Central Silk Board, MSME, National Textile Corporation, KhadiGramodyog, Ministry of Textiles, Handloom Development Commission, Weaver's Service Centre

- Lab Technician
- Research Assistant
- Cluster Development Officer
- Supervisor
- Handloom Development officer
- Weaver's Service Centre

(3) Self Employment

- Start-up of handloom saree manufacturing Unit
- Khadi Yarn and Fabric Manufacturing Unit
- Trading of Textile Accessories for garment
- Trading of machine Spare parts.
- Trading of Fabric.

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

- Start-up of Garment Manufacturing Unit in small scale.

3. LEARNING OUTCOMES OF THE PROGRAMME

Sr. No.	Learning Outcomes
After due completion of the course, a diploma holder in TEXTILE TECHNOLOGY will be able to:	
1.	Communicate effectively in English with others
2.	Apply basic principles of mathematics to solve engineering problems
3.	Apply basic principles of physics and chemistry to solve engineering problems
4.	Prepare computerized reports, presentations using IT tools and computer application software
5.	Prepare and interpret drawings of engineering components
6.	Use cutting tools and tooling for fabrication of jobs by following safe practices during work
7.	Use energy conservation methods in various systems
8.	Use appropriate procedures for preventing environmental pollution and energy conservation
9.	Differentiate Natural Fibre from Synthetic Fibre
10.	Analyze the Application area of different type of fibres.
11.	Cultivate natural fibre and synthesis of man made fibres.
12.	Handle the machinery related fibre production, spinning, weaving and Dyeing
13.	Manipulate and control different machine setting in blowroom, carding machine for optimum production and quality lap and sliver
14.	Control all the machine setting related yarn production.
15.	Identify different types of yarn.
16.	Set the Autoconer machine for desired yarn quality
17.	Prepare good quality weaver's beam for weaving process by fixing the machine parameter in warping and sizing machine.
18.	Decide to select gaiting and knotting process for weaving.
19.	Prepare new design and its draft plan and peg plan for fabric production on loom.
20.	Prepare drafting and peg plan for any kind of design.
21.	Supervise and control the machine parameters in loom shed for high production and quality.
22.	Grade the fabric produced in weaving for the buyer.
23.	Decide the finishing route for a greige fabric for particular end uses.

24.	Provide fabric constructions for particular end uses & Design on the fabric
25.	Decide dyeing and finishing recipes for color matching with sample.
26.	Standardized the fabric parameters after gone through physical and chemical testing.
27.	Operate all textile testing Instruments.
28.	Operate any types of shuttle and shuttle less loom i.e. projectile, rapier, jet looms etc.
29.	Produce advanced fabric structures on loom.
30.	Plan and execute given task/project as team member/leader
31.	Manage resources(Man, Machine and Material) effectively at the workplace
32.	Apply all the knowledge and skill gained through various courses in solving a live problem/project in the industry
33.	Apply inventory control techniques to reduce production cost
34.	Manage activities related to procurement, stacking, storage and preservation of materials.

4. DERIVING CURRICULUM AREAS FROM LEARNING OUTCOMES OF THE PROGRAMME

The following curriculum area subjects have been derived from learning outcomes:

Sr. No.	Learning Outcomes	Curriculum Areas/Subjects
1.	Communicate effectively in English with others	Communication Skill
2.	Apply basic principles of mathematics to solve engineering problems	Applied Mathematics
3.	Apply basic principles of physics and chemistry to solve engineering problems	– Applied Physics – Applied Chemistry
4.	Prepare computerized reports, presentations using IT tools and computer application software	Introduction To Computer
5.	Prepare and interpret drawings of engineering components	Engineering Drawing
6.	Use cutting tools and tooling for fabrication of jobs by following safe practices during work	Workshop Practice
7.	Use energy conservation methods in various systems	Energy Conservation
8.	Use appropriate procedures for preventing environmental pollution and energy conservation	Environmental Studies
9.	Basic Mechanical Engg. Gears, belts. Drive transmission, Fuel, Thermodynamics.	General Mechanical Engg.
10.	Properties, structure, end uses of Cotton, Jute, Wool and Silk fibre as well as Manmade fibres like Polyester, Polypropylene, Polyamide and their manufacturing Process.	Textile Fibres
11.	Understand the Preparatory, Dyeing and Printing process of Textile material and its necessity.	Textile Chemical Processing
12.	Understand the objective of ginning process, blowroom line, carding m/c and also to operate them to produce Sliver.	Spinning Preparation
13.	Operate the winding, warping and sizing machine to produce desire quality of weaver's beam	Weaving Preparation

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

14.	Analyze AC circuits and apply electromagnetic induction principles in various electrical equipment and machines	Electrical Technology and Electronics.
15.	Analyze woven Fabric Structure, make new design on graph paper and replicate them on loom with draft and peg plan.	Fabric Structure And Design
16.	To understand the colour theory & Design aspect on the Fabric.	Principle of Design & Colour
17.	Provide safe and secure environment to self and others in industrial working place.	Industrial Safety
18.	Describe basic weaving fundamentals and Produce woven fabric of different design with the help of tappet, dobby and jacquard shedding and drop box motion	Weaving Technology
19.	Select and use right kind of machine setting from Draw frame to Ringframe to produce desired quality yarn	Spinning Technology
20.	Operate all the testing instruments to check different properties of a fabric to match with the standard parameters.	Textile Testing
22.	Produce elaborate design in woven fabric on simple and special type of loom to serve special purpose.	Advance Fabric Structure
23.	Select the right parameters to control the production and quality of yarn. Fundamentals of Special type of advance Yarn making process like open end, air jet, compact etc.	Process Control in Spinning and Advance Spinning
24.	Select the right parameters to control the production and quality of yarn. Fundamentals of Advance weaving machine for high production and quality like projectile, rapier, jet. Multiphase loom. Properties of industrial fabric or technical fabric.	Process Control in Weaving and Advance Weaving
25.	Operate an kind of knitting machine to produce different knitted structure. Measurement of body, fabric cutting and stitching to produce garments.	Introduction to Knitting and Garment Technology.
26.	Optimum resource(Man, Machine and Material) management to keep production cost at low and get idea for start-up	Industrial Management & Entrepreneurship Development
27.	Apply all the knowledge and skill gained through various courses in solving a live problem/project in the industry	Project Work

Total		25	6	17	24	100	110	210	250	-	160	-	410	620	

* Common with other diploma programme

Student Centred Activities will comprise of co-curricular activities like extension lectures, self study, games, hobby clubs e.g. photography etc., seminars, declamation contests, educational field visits, N.C.C., NSS, Cultural Activities, disaster management and safety etc

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

8. GUIDELINES FOR ASSESSMENT OF STUDENT CENTRED ACTIVITIES (SCA)

It was discussed and decided that the maximum marks for SCA should be 30 as it involves a lot of subjectivity in the evaluation. The marks may be distributed as follows:

- i. 10 Marks for general behavior and discipline
(by HODs in consultation with all the teachers of the department)
- ii. 5 Marks for attendance as per following:
(by HODs in consultation with all the teachers of the department)
 - a) 75 - 80% 2 Marks
 - b) 80 - 85% 4 Marks
 - c) Above 85% 5 Marks
- iii. 15 Marks maximum for Sports/NCC/Cultural/Co-curricular/ NSS activities as per following:
(by In-charge Sports/NCC/Cultural/Co-curricular/NSS)
 - a) 15 - State/National Level participation
 - b) 10 - Participation in two of above activities
 - c) 5 - Inter-Polytechnic level participation

Note: There should be no marks for attendance in the internal sessional of different subjects.

First Semester

1.1 COMMUNICATION SKILLS – I

L	T	P
4	-	2

RATIONALE

Knowledge of English Language plays an important role in career development. This subject aims at introducing basic concepts of communication besides laying emphasis on developing listening, speaking, reading and writing skills as parts of Communication Skill.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- Understand the importance of effective communication
- Describe the process of communication
- Communicate effectively in different contexts
- Identify parts of speech
- Write correct sentences using appropriate vocabulary
- Reproduce and match words and sentences in a paragraph
- Write various types of paragraphs, notices for different purposes and composition on picture with appropriate format
- Read unseen texts with comprehension

DETAILED CONTENTS

- | | | |
|-----|---|--------------|
| 1 | Basics of Communication | (13 periods) |
| 1.1 | Definition and process of communication | |
| 1.2 | Types of communication - formal and informal, oral and written, verbal and non-verbal | |
| 1.3 | Communications barriers and how to overcome them | |
| 1.4 | Barriers to Communication, Tools of Communication | |
| 2 | Application of Grammar | (18 periods) |
| 2.1 | Parts of Speech (Noun, verb, adjective, adverb) and modals | |
| 2.2 | Sentences and its types | |
| 2.3 | Tenses | |
| 2.4 | Active and Passive Voice | |
| 2.5 | Punctuation | |
| 2.6 | Direct and Indirect Speech | |
| 3 | Reading Skill | (10 periods) |

Unseen passage for comprehension (one word substitution, prefixes, suffixes, antonyms, synonyms etc. based upon the passage to be covered under this topic)

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

4 Writing Skill

(15 periods)

- 4.1 Picture composition
- 4.2 Writing paragraph
- 4.3 Notice writing

LIST OF PRACTICALS

Note: Teaching Learning Process should be focused on the use of the language in writing reports and making presentations.

Topics such as Effective listening, effective note taking, group discussions and regular presentations by the students need to be taught in a project oriented manner where the learning happens as a byproduct.

Listening and Speaking Exercises

1. Self and peer introduction
2. Newspaper reading
3. Just a minute session-Extempore
4. Greeting and starting a conversation
5. Leave taking
6. Thanking
7. Wishing well
8. Talking about likes and dislikes
9. Group Discussion
10. Listening Exercises.

INSTRUCTIONAL STRATEGY

Student should be encouraged to participate in role play and other student centred activities in class room and actively participate in listening exercises

MEANS OF ASSESSMENT

- Assignments and quiz/class tests, mid-semester and end-semester written tests
- Actual practical work, exercises and viva-voce
- Presentation and viva-voce

RECOMMENDED BOOKS

1. Communicating Effectively in English, Book-I by Revathi Srinivas; Abhishek Publications, Chandigarh.
2. Communication Techniques and Skills by R. K. Chadha; Dhanpat Rai Publications, New Delhi.

3. High School English Grammar and Composition by Wren & Martin; S. Chand & Company Ltd., Delhi.
4. Excellent General English-R.B.Varshnay, R.K. Bansal, Mittal Book Depot, Malhotra
5. The Functional aspects of Communication Skills – Dr. P. Prasad, S.K. Katria & Sons, New Delhi
6. Q. Skills for success – Level & Margaret Books, Oxford University Press.
7. e-books/e-tools/relevant software to be used as recommended by AICTE/UBTE/NITTTR.

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	13	24
2	18	32
3	10	16
4	15	28
Total	56	100

1.2 APPLIED MATHEMATICS - I

L	T	P
5	-	-

RATIONALE

Contents of this course provide fundamental base for understanding elementary mathematics and their uses in solving engineering problems. Contents of this course will enable students to use basic mathematical function like logarithms, partial fractions, matrices and basic 2D, curves in solving various engineering problems of all fields.

LEARNING OUTCOMES

After undergoing this course, the students will be able to:

- Apply Binomial theorem to solve engineering problems
- Apply determinants properties and Crammer's rule to solve engineering problems
- Apply dot & cross product of vectors to find the solution of engineering problems
- Use complex numbers in various engineering problems
- Apply differential calculus and higher order to solve engineering problems
- Find velocity, acceleration, errors and approximation in engineering problems with application of derivatives.

DETAILED CONTENTS

1. Algebra -I (12 Periods)
 - 1.1 Series : AP and GP; Sum, nth term, Mean
 - 1.2 Binomial theorem for positive, negative and fractional index (without proof). Application of Binomial theorem.
 - 1.3 Determinants : Elementary properties of determinant of order 2 and 3, Multiplication system of algebraic equation, Consistency of equation, Crammer's rule
2. Algebra- II (12 Periods)
 - 2.1 Vector algebra : Dot and Cross product, Scaler and vector triple product.
 - 2.2 Complex number.
Complex numbers, Representation, Modulus and amplitude Demoivre theorem, its application in solving algebraic equations, Mod. function and its properties..
3. Trigonometry (10 Periods)

- 3.1 Relation between sides and angles of a triangle: Statement of various formulae showing relationship between sides and angle of a triangle.
- 3.2 Inverse circular functions : Simple case only
4. Differential Calculus - I (18 Periods)
 - 4.1 Functions, limits, continuity, - functions and their graphs, range and domain, elementary methods of finding limits (right and left), elementary test for continuity and differentiability.
 - 4.2 Methods of finding derivative, Trigonometric functions, exponential function, Function of a function, Logarithmic differentiation, Differentiation of Inverse trigonometric function, Differentiation of implicit functions.
5. Differential Calculus - II (18 Periods)
 - 5.1 Higher order derivatives, Leibnitz theorem (without proof). Simple applications.
 - 5.2 Application - Finding Tangents, Normal, Points of Maxima/Minima, Increasing/Decreasing functions, Rate, Measure, velocity, Acceleration, Errors and approximation.

INSTRUCTIONAL STRATEGY

The basic instructional strategy to teach basic mathematics, Binomial theorem, trigonometry, differential equations etc. should be conceptual with real world applications of relevant branch. More numerical and theory examples can be used for clear understanding of the content.

MEANS OF ASSESSMENT

- Assignments and Quiz/Class Tests
- Mid-term and End-term Written Tests
- Model/Prototype Making

RECOMMENDED BOOKS

1. Elementary Engineering Mathematics by BS Grewal, Khanna Publishers, New Delhi
2. Engineering Mathematics, Vol I & II by SS Sastry, Prentice Hall of India Pvt. Ltd.,
3. Applied Mathematics-I by Chauhan and Chauhan, Krishna Publications, Meerut.
4. Applied Mathematics-I (A) by Kailash Sinha and Varun Kumar; Aarti Publication, Meerut

SUGGESTED DISTRIBUTION OF MARKS

Topic	Time Allotted (Periods)	Marks Allotted (%)
1.	12	20
2.	12	20

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

3.	10	12
4	18	24
5	18	24
Total	70	100

1.3 APPLIED PHYSICS – I

L T P
5 - 2

RATIONALE

Applied physics includes the study of a diversified topics related to the world around us. It aims to give an understanding of this world both by observation and by prediction of the way in which objects behave. Concrete knowledge of physical laws, analysis and applications in various fields of engineering and technology are given prominence in this course content.

Note: Teachers should give examples of engineering/technology applications of various concepts and principles in each topic so that students are able to learn and appreciate these concepts and principles. In all contents, SI units should be followed.

LEARNING OUTCOMES

After undergoing this course, the students must be able to:

- Identify the use of S.I. system of measurement with accuracy and how it is used in engineering
- Represent physical quantities as scalars and vectors, applying the physical laws and concepts of linear and circular motion in everyday life.
- Solve difficult problems (walking of man, horse and cart problem, flying of bird/ aircraft, etc.)
- Analyse and design banking of roads/railway tracks and apply conservation of momentum principle to Explain rocket propulsion, recoil of gun etc.
- Derive work, power and energy relationship and solve problems about work and power.
- Define work, energy and power and their units.
- Describe conservation of energy and its applications
- Understand the concept of rotational motion of a rigid body and its applications
- Apply the physical laws and concepts of gravity, its variation with longitude and latitude and its uses in space satellite etc. .
- Understand the concept of elasticity, surface tension, pressure and the laws governing movement of fluids.
- Express physical work in term of heat and temperature; Measure temperature in various processes on different scales (Celsius, Kelvin, Fahrenheit etc.)
- Distinguish between conduction, convection and radiation, identify the different methods for reducing heat losses
- Understand the laws of thermodynamics, Carnot cycle and their applications.

DETAILED CONTENTS

1. Units and Dimensions (10 Periods)

- 1.1 Need of Measurement in engineering and science, unit of a physical quantities - fundamental and derived units, systems of units (FPS, CGS and SI units)
 - 1.2 Dimensions and dimensional formulae of physical quantities.
 - 1.3 Principle of homogeneity of dimensions
 - 1.4 Dimensional equations and their applications, conversion of numerical values of physical quantities from one system of units into another, checking the correctness of physical equations and deriving relations among various physical quantities
 - 1.5 Limitations of dimensional analysis
 - 1.6 Error in measurement, accuracy and precision of instruments, random and systematic errors, absolute error, relative error, and percentage error, Estimation of probable errors in the results of measurement (combination of errors in addition, subtraction, multiplication, division and powers), rules for representing significant figures in calculation.
 - 1.7 Application of units and dimensions in measuring length, diameter, circumference, volume, surface area etc. of metallic and non metallic blocks, wires, pipes etc (at least two each).
2. Force and Motion (10 periods)
- 2.1 Scalar and vector quantities – examples, representation of vector, types of vectors
 - 2.2 Addition and Subtraction of Vectors, Triangle and Parallelogram law (Statement only), Scalar and Vector Product.
 - 2.3 Resolution of Vectors and its application to lawn roller.
 - 2.4 Force, Momentum, Statement and Derivation of Conservation of linear momentum, its applications such as recoil of gun.
 - 2.5 Impulse and its Applications
 - 2.6 Circular motion (Uniform and Non-uniform), definition of angular displacement, angular velocity, angular acceleration, frequency, time period.
 - 2.7 Relation between linear and angular velocity, linear acceleration and angular acceleration (related numerical)
 - 2.8 Central force, Expression and Applications of Centripetal and centrifugal forces with examples such as banking of roads and bending of cyclist, Principle of centrifuge.
 - 2.9 Application of various forces in lifts, cranes, large steam engines and turbines
3. Work, Power and Energy (10 periods)
- 3.1 Work: and its units, examples of zero work, positive work and negative work, conservative and non-conservative force,
 - 3.2 Friction: modern concept, types, laws of limiting friction, Coefficient of friction and its Engineering Applications.
 - 3.3 Work done in moving an object on horizontal and inclined plane for rough and plane surfaces with its applications

- 3.4 Energy and its units: Kinetic energy and potential energy with examples and their derivation, work energy theorem.
- 3.5 Principle of conservation of mechanical energy for freely falling bodies, examples of transformation of energy.
- 3.6 Power and its units, calculation of power in numerical problems
- 3.7 Application of Friction in brake system of moving vehicles, bicycle, scooter, car trains etc.

- 4 Rotational Motion (10 periods)
 - 4.1 Concept of translatory and rotatory motions with examples
 - 4.2 Definition of torque with examples
 - 4.3 Angular momentum, Conservation of angular momentum (quantitative) and its examples
 - 4.4 Moment of inertia and its physical significance, radius of gyration for rigid body, Theorems of parallel and perpendicular axes (statements only), Moment of inertia of rod, disc, ring and sphere (hollow and solid) (Formulae only). Concept of Fly wheel.
 - 4.5 Rotational kinetic energy, Rolling of sphere on the slant plane,
 - 4.6 Comparison of linear motion and rotational motion.
 - 4.7 Application of rotational motions in transport vehicles, and machines.

- 5 Motion of planets and satellites (08 periods)
 - 5.1 Gravitational force, Kepler's law of planetary motion,
 - 5.2 Acceleration due gravity and its variation,
 - 5.3 Gravitational Potential and Gravitational potential energy,
 - 5.4 Motion of satellite, orbital velocity and time period of satellite, Total energy and Binding energy of a satellite, Escape energy and escape velocity,
 - 5.5 Types of satellites, Geo-stationary satellite, semi-synchronous, polar satellite (concept only) and their uses in science and technology,
 - 5.6 Concept of Black Holes

6. Properties of Matter (12 periods)
 - 6.1 Elasticity: definition of stress and strain, different types of moduli of elasticity, Hooke's law, significance of stress strain curve
 - 6.2 Pressure: definition, its units, atmospheric pressure, gauge pressure, absolute pressure, Fortin's Barometer and its applications
 - 6.3 Surface tension: concept, its units, angle of contact, Capillary action and determination of surface tension from capillary rise method, applications of surface tension, effect of temperature and impurity on surface tension
 - 6.4 Viscosity and coefficient of viscosity: Terminal velocity, Stoke's law and effect of temperature on viscosity, application in hydraulic systems.
 - 6.5 Concept of fluid motion, stream line and turbulent flow, Reynold's number Equation of continuity, Bernoulli's Theorem and their applications.

7. Heat and Thermodynamics (10 periods)
 - 7.1 Difference between heat and temperature

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

- 7.2 Modes of transfer of heat (Conduction, convection and radiation with examples)
- 7.3 Different scales of temperature and their relationship
- 7.4 Expansion of solids, liquids and gases, coefficient of linear, surface and cubical expansions and relation amongst them
- 7.5 Heat conduction in a metal rod, Temperature gradient, Concept of Co-efficient of thermal conductivity, Uses and effects of Heat conduction in Daily life.
- 7.6 Isothermal and Adiabatic process
- 7.7 Zeroth, First and second law of thermodynamics, Heat engine (concept Only), Carnot cycle.
- 7.8 Application of various systems of thermometry in refrigeration and air-conditioning etc.

LIST OF PRACTICALS (to perform minimum six experiments)

- 1 To find radius of wire and its volume and the maximum permissible error in these quantities by using both vernier calipers and screw gauge.
- 2 To find the value of acceleration due to gravity on the surface of earth by using a simple pendulum.
- 3 To determine the Radius of curvature of (i) convex mirror, (ii) concave mirror by spherometer
- 4 To verify parallelogram law of forces
- 5 To study conservation of energy of a ball or cylinder rolling down an inclined plane.
- 6 To find the Moment of Inertia of a flywheel about its axis of rotation
- 7 To determine the atmospheric pressure at a place using Fortin's Barometer
- 8 To determine the viscosity of glycerin by Stoke's method
- 9 To determine the coefficient of linear expansion of a metal rod
- 10 To determine force constant of spring using Hooks law

INSTRUCTIONAL STATREGY

Teacher may use various teaching aids like live models, charts, graphs and experimental kits etc. for imparting effective instructions in the subject. The teacher should explain about field applications before teaching the basics to develop proper understanding of the physical phenomenon. Use of demonstration and animations can make the subject interesting and may develop scientific temper in the students. Teacher must plan a tour of Science Park/planetarium available in nearby areas in order to enhance the interest in this course.

MEANS OF ASSEMENTS

- Assignment & Quiz,
- Mid-Term and End-Term written test,
- Model Making,
- Actual Lab & Practical Work,
- Viva Voce

RECOMMENDED BOOKS

- 1 Text Book of Physics for Class XI (Part-I, Part-II); N.C.E.R.T., Delhi
- 2 Concepts in Physics by HC Verma, Vol. I & II, Bharti Bhawan Ltd. New Delhi
- 3 Comprehensive Practical Physics, Vol, I & II, JN Jaiswal, Laxmi Publications (P) Ltd., New Delhi
- 4 B.Sc.Practical Physics by C L Arora, S. Chand Publication..
- 5 Engineering Physics by PV Naik, Pearson Education Pvt. Ltd, New Delhi
- 6 Engineering Physics by DK Bhattacharya& Poonam Tandan; Oxford University Press, New Delhi
- 7 Modern Engineering Physics by SL Gupta, Sanjeev Gupta, Dhanpat Rai Publications
- 8 V. Rajendran,physics-I, Tata McGraw-Hill raw Hill publication, New Delhi
- 9 Arthur Beiser, Applied Physics, Tata McGraw-Hill raw Hill publication, New Delhi
- 10 Physics Volume 1, 5th edition, Haliday Resnick and Krane, Wiley publication

1.4 GENERAL MECHANICAL ENGINEERING

L T P
6 - 4

RATIONALE

For every practicing engineer some knowledge of Mechanical Engineering relevant to his discipline is a must. This paper is meant to provide the would be textile technologists elements of mechanical engineering relevant to their work. Topic Wise Distribution of Periods

DETAILED CONTENTS

1. FOUNDATIONS AND INSTALLATIONS:

General principles and considerations for machine foundations, vibrations in machine foundations. Layout of foundation bolts, alignment of machines care and precautions to be used in installation of machines, introduction to Indian Standards on machine foundations. Practice in blueprint reading for installations.

2. PIPE AND PIPE FITTINGS:

Classification of pipes according to materials used, field of application, IS specifications of water, air and steam pipes, various types of pipe fittings and their applications, laying of pipes, cuttings threading and jointing of pipes.

3. BEARINGS AND LUBRICATION:

Various kinds of bearings, bush bearing, ball and roller bearing, thrust bearing and their application in textile machineries. Principle of film lubrication. Various methods of lubrication, lubricants and their properties. Selection of lubricants for various textile machineries.

4. POWER TRANSMISSION & MATERIAL HANDLING:

- (a) Different types of Trolleys used in process house.
- (b) Belt and gear drive.

Types of gears, spur gear, bevel gear, helical gear, worm and worm wheel, rack and pinion.

Power transmission by belt, chain and gears. Gear drive, application of various kinds of gears and drives in textile machinery. Variable speed drives.

5. COUPLINGS, CLUTCHES, ECCENTRICS AND CAMS:

Necessity of coupling, types of couplings, rigid and flexible couplings, universal coupling, fluid coupling. Introduction to common types of clutches, eccentrics and cams, their function and use.

6. FUELS AND COMBUSTION :

Common solid, liquid and gas fuels. Their composition, higher and lower calorific values. Calculation of air required for complete combustion of unit mass/volume. Concept of excess air in boiler furnace combustion. Heat carried away by flue gases. Flue gas analysis by Orsat apparatus.

(Simple Numerical Problems)

Idea of specific properties of liquid fuels such as knock resistance (Cetane and Octane numbers). Flash point, Flame point, Solidification point.

7. THERMODYNAMICS:

Concept of thermodynamic systems and surroundings, Work and its relation to heat. First law of thermodynamics and its application to Constant volume, Constant pressure, Constant temperature and adiabatic processes in dealing with gases and vapors. Representation of these processes in P. V. diagram, calculation of work done. Second law of thermodynamics. Concept of enthalpy, entropy of thermodynamic system. Concept of Heat engine, Heat pump and refrigerator. Carnot cycle efficiency of heat engine, coefficient of performance of refrigerator and heat pump Steady state flow process. Its equation and application.

8. STEAM GENERATION AND STEAM GENERATORS:

Idea of steam generation from water at 0°C. Pressure and temperature curve of steam generation. Idea of wet, dry saturated and super-heated steam. Saturation pressure, temperature, degree of super heat, Enthalpy, Entropy and specific volume of wet, dry saturated and super-heated steam. Use of steam tables for simple calculations. Introduction to water tube, fire tube boilers e. g. Lancashire, Babcock Wilcox's, Cochran and Simple vertical boilers. Boilers mountings and accessories. Steam traps, Reducers, Expansion bends. Boilers specification. Equivalent evaporation, Boiler efficiency, Draught, Chimney height, Conditions for maximum draught through chimney. Measurement of steam consumption. Simple numerical problems.

9. PUMPS & AIR COMPRESSORS:

Elementary knowledge of working of reciprocating, Centrifugal and Vacuum pumps, Blowers and Compressors, Fans and Exhausts Difference between reciprocating and rotary compressors. Their types and working, Single stage and Multi stage compressors. Power required to drive single stage compressor. Volumetric efficiency and effect of temperature on it. Use of compressed air in textile industry.

10. REFRIGERATION AND AIR CONDITIONING:

Meaning of the term refrigeration. Its application, Unit. Refrigeration methods. Bell Coleman air cycle, air refrigerator, Vapor compression refrigeration. Analysis of simple saturated cycle for vapor compression refrigerator.

Characteristics of good refrigerants. Properties of common refrigerants such as NH_3 , CO_2 , SO_2 Freon-12.

Air Conditioning:

Meaning of the term and its application. Gas and vapor mixture. Dry and wet bulb temperature, Dew-point, Depression of wet bulb temperature and Depression of Dew-point. Saturated air, specific humidity, relative humidity, Absolute humidity. Humid specific volume, Heat enthalpy of moist air. Use of psychometric charts and tables. Sensible heating and cooling. Humidification. Dehumidification and their methods.

Air conditioning for human comfort. Air conditioning, for summer and winter. Air conditioning round the year, Psychometric air conditioning. Industrial air conditioning.

GENERAL MECHANICAL ENGINEERING-LAB

A. Demonstration of the following for study and sketch.

1. (a) Bio Gas Plant.
(b) Wind Mill.
(c) Solar Cooker.
(d) Voltaic Cell Type Solar Energy Converter.
2. Key's, Key ways and Splined shaft e.g. Jib head key, Flat key, Saddle key, Woodruff key, Feather key, Pin key, Splined shaft.
3. Pins- Split pin, Taper cotter type split pin, Cottorpin, Cottor bolts. Foundations Bolts- Lewis rag bolt, Fish tail bolt and Square head bolt.
4. Friction clutch and Coupling- Cone clutch, Plate clutch (Single Pair); Muffcoupling, Flange coupling, Universal or Hook's joint coupling. Flexible coupling- Belt and Pin Type, Coil spring type.
5. Bearings- Plane, Bush, Split step bearings, Ball Roller bearings, Thrust bearings.
6. Gears- Spur gear, Single and Double herical gears, Bevel gears.
7. Gear Trains- Simple spur gear train, Compound gear train, Epicyclic gear train.
8. Compressor and Tension helical springs.
9. Slider Crank Mechanism and Quick Return Mechanism.

Performance Practical's:

10. Determination of velocity ratio of a spur gear train.
11. Velocity diagram of a four bar chain mechanism.
12. Performance evaluation of solar cooker.

NOTE:-

Field visits are recommended for equipment's not available in the institution such as biogas plant, wind mill, Boilers. No need to purchase them. Models of Boilers may be procured for study purpose.

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	8	10
2	8	10
3	8	10
4	8	8
5	8	10
6	8	10
7	8	10

9	8	8
10	10	12
Total	84	100

1.5 ENGINEERING DRAWING

L T P
- - 10

RATIONALE

Drawing is the language of engineers and technicians. Reading and interpreting engineering drawing is their day to day responsibility. The subject is aimed at developing basic graphic skills in the students so as to enable them to use these skills in preparation of engineering drawings, their reading and interpretation. The emphasis, while imparting instructions, should be to develop conceptual skills in the students following BIS SP 46 – 1988.

Note:

- i) First angle projection is to be followed
- ii) Minimum of 25 sheets to be prepared and atleast 2 sheets on AutoCAD
- iii) Instructions relevant to various drawings may be given along with appropriate demonstrations, before assigning drawing practice to students

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- Identify and use of different grades of pencils and other drafting instruments which are used in engineering field
- Draw free hand sketches of various kinds of objects.
- Utilize various types of lines used in engineering drawing.
- Read and apply different dimensioning methods on drawing of objects.
- Use different types of scales and their utilization in reading and reproducing drawings of objects and maps.
- Draw 2 - dimensional view of different objects viewed from different angles (orthographic views)
- Draw and interpret complete inner hidden details of an object which are otherwise not visible in normal view
- To make projections of Solid
- Generate isometric (3D) drawing from different 2D (orthographic) views/sketches
- Identify conventions for different engineering materials, symbols, sections of regular objects and general fittings used in Civil and Electrical household appliances
- Draw the different type of Machine Drawing
- Use basic commands of AutoCAD.

DETAILED CONTENTS

1. Introduction to Engineering Drawing (03 sheets)
 - 1.1 Introduction to drawing instruments, materials, different types of lines in Engineering drawings as per BIS Specifications .
 - 1.2 Practice of vertical, horizontal and inclined lines, triangles, rectangles, circles, hexagonal, pentagon with the help of drawing instruments.
 - 1.3 Free hand and instrumental lettering (Alphabet and numerals) , (Capital Letter), vertical and inclined at 75 degree.
2. Dimensioning Technique (01 sheet)
 - 2.1 Necessity of dimensioning, method and principles of dimensioning (mainly theoretical instructions)
 - 2.2 Dimensioning of overall sizes, circles, threaded holes, chamfered surfaces, angles, tapered surfaces, holes, equally spaced on P.C.D., counter sunk holes, counter bored holes, cylindrical parts, narrow spaces and gaps, radii, curves and arches
3. Scales (02 sheets)
 - 3.1 Scales –their needs and importance (theoretical instructions), type of scales, definition of R.F. and length of scale
 - 3.2 Drawing of plain and diagonal scales
4. Orthographic Projections (06 sheets)
 - 4.1 Theory of orthographic projections (Elaborate theoretical instructions)
 - 4.2 Projection of Points in different quadrant
 - 4.3 Projection of Straight Line (1st and 3rd angle)
 - 4.3.1. Line parallel to both the planes
 - 4.3.2. Line perpendicular to any one of the reference plane
 - 4.3.3. Line inclined to any one of the reference plane.
 - 4.4 Projection of Plane – Different lamina like square, rectangular, triangular and circle inclined to one plane, parallel and perpendicular to another plane in 1st angle only
 - 4.5 Three views of orthographic projection of different objects. (At least one sheet in 3rd angle)
 - 4.6 Identification of surfaces
5. Projection of Solid (01 sheets)
 - 5.1. Definition and salient features of Solid
 - 5.2. To make projections, sources, Top view, Front view and Side view of various types of Solid .
6. Sections (02 sheets)

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

- 6.1 Importance and salient features
- 6.2 Drawing of full section, half section, partial or broken out sections, Offset sections, revolved sections and removed sections.
- 6.3 Convention sectional representation of various materials, conventional breaks for shafts, pipes, rectangular, square, angle, channel, rolled sections
- 6.4 Orthographic sectional views of different objects.
- 7. Isometric Views (02 sheets)
 - 7.1 Fundamentals of isometric projections and isometric scale.
 - 7.2 Isometric views of combination of regular solids like cylinder, cone, cube and prism.
- 8. Common Symbols and Conventions used in Engineering (02 sheets)
 - 8.1 Civil & Electrical fitting symbols .
- 9. Introduction to Machine Drawing (08 Sheets)
 - 9.1 Draw the assembly from part details of objects
 - 9.2 Identify and draw different types of screw threads used in various machines and assemblies as per domestic and international standards
 - 9.3 Draw different types of nuts, bolts and washers
 - 9.4 Draw various locking devices and foundation bolts
 - 9.5 Draw different section of various types of keys and cotter joints
 - 9.6 Draw various riveted joints
 - 9.7 AutoCAD

*** Auto CAD drawing will be evaluated internally by sessional marks and not by final theory paper.**

INSTRUCTIONAL STRATEGY

Teacher should show model of realia of the component/part whose drawing is to be made. Emphasis should be given on cleanliness, dimensioning and layout of sheet. Focus should be on proper selection of drawing instruments and their proper use. The institute should procure Auto CAD or other engineering graphics software for practice in engineering drawings. Teachers should undergo training in AutoCAD/Engineering Graphic. Separate labs for practice on AutoCAD should be established.

MEANS OF ASSESSMENT

Sketches
Drawing
Use of software

RECOMMENDED BOOKS

1. A Text Book of Engineering Drawing by Surjit Singh; Dhanpat Rai & Co., Delhi
2. Engineering Drawing by PS Gill; SK Kataria & Sons, New Delhi
3. Elementary Engineering Drawing in First Angle Projection by ND Bhatt; Charotar Publishing House Pvt. Ltd., Anand
4. Engineering Drawing I & II by JS Layall; Eagle Parkashan, Jalandhar
5. Engineering Drawing I by DK Goel, GBD Publication.

1.6 TEXTILE FIBRE-I

L T P
4 - 4

Learning Outcomes:

After completing the course student will be able to:

- Able to understand the desirable properties of textile fibres, textile fibre classification.
- Able to understand the cultivation of cotton, different cotton varieties, morphological structure of cotton, jute & other natural fibres
- Be able to understand the important properties of wool fibres, their structure & their uses
- Be able to understand & explain the properties of silk fibres, its structure & uses

- 1.7.1 Introduction: various definitions related to textile fibres, classification of textile fibres, difference between staple & filament, essential & desirable properties of textile fibres, advantages & disadvantages of natural fibres.
- 1.7.2 Cotton cultivation and harvesting, development of cotton fibres in seed, cotton varieties and grading, morphological structure, physical and chemical properties of cotton fibre and its applications.
- 1.7.3 Jute cultivation, retting and extraction process, structure of jute fibre, physical and chemical properties of jute fibre and its applications, Introduction to other natural bast fibres like flax, hemp, ramie, banana and leaf fibres etc. and their applications.
- 1.7.4 Types of wool and its grading, Morphological structure, chemical composition, physical & chemical properties, varieties of wool fibres and their applications, introduction to other animal fibres like angora fibres, camel hair fibre, goat fibre etc. and their applications.
- 1.7.5 Types of silk and its production, chemical composition and morphological structure of silk, physical & chemical properties of silk and its applications.

Recommended Books -

1. वस्त्र रेशे –उत्पादन विशेषताएँ एवं उपयोग –DR. D.B. Shakyawar & Dr. M.K. Singh , abhishek Publication Chandigarh/ New Delhi.
2. Textile Fibre by Ghol and Valanslk`
3. S. P. Mishra, A text book of Fibres Science and technology, New Age International (p) Ltd 2000.
4. H V S Murthy, Textile Fibres- Textile Association Publication 1995.
5. Textile Fibres –I By Dr. V.A. Shenai

List of Experiments

1. To distinguish animal fibres from vegetable fibres.
 - (i) With an alkali
 - (ii) With an acid
2. To distinguish
 - (i) Linen from cotton
 - (ii) Silk from wool fibres
3. To identify textile fibres such as cotton, wool, silk, jute under microscope and to draw their longitudinal and cross-sectional views.
4. Checking moisture regain of different natural textile fibres by shirley moisture meter and by good brand conditioning oven.
5. To check the maturity ratio of cotton fibres by 10% caustic soda solution.
6. To identify natural textile fibres by
 - (i) Staining test
 - (ii) Solubility test
 - (iii) Burning test

Second Semester

2.1 APPLIED MATHEMATICS - II

L	T	P
5	-	-

RATIONALE

Basic elements of integral calculus, differential calculus, numerical methods, differential equations included in this course will play a vital role in understanding engineering problem mathematically. This will also develop analytical as well as conceptual abilities among students.

LEARNING OUTCOMES

After undergoing this course, the students will be able to:

- Calculate simple integration by methods of integration
- Evaluate the area under curves, surface by using definite integrals.
- Calculate the area and volume under a curve along areas
- Solve the engineering problems with numerical methods.
- Understand the geometric shapes used in engineering problems by co-ordinate geometry.

DETAILED CONTENTS

1. Integral Calculus - I (20 Periods)

Methods of Indefinite Integration :-

- 1.1 Integration by substitution.
- 1.2 Integration by rational function.
- 1.3 Integration by partial fraction.
- 1.4 Integration by parts.
- 1.5 Integration of special function

2. Integral Calculus - II: (20 Periods)

- 2.1 Meaning and properties of definite integrals, Evaluation of definite integrals..
- 2.2 Application : Length of simple curves, Finding areas bounded by simple curves
Volume of solids of revolution, centre of mean of plane areas.
- 2.3 Simposns 1/3rd and Simposns 3/8th rule and Trapezoidal Rule : their application in simple cases. Numerical solutions of algebraic equations; Bisections method, Regula-Falsi method, Newton-Raphson's method(without proof), Numerical solutions of simultaneous equations; Gauss elimination method(without proof)

3. Co-ordinate Geometry (2 Dimension) (18 Periods)

- 3.1 Circle
Equation of circle in standard form. Centre - Radius form, Diameter form, Two intercept form.

4. Co-ordinate Geometry (3 Dimension)

(12 Periods)

4.1 Straight lines and planes in space

Distance between two points in space, direction cosine and direction ratios,
Finding equation of a straight line (without proof)

INSTRUCTIONAL STRATEGY

Basic elements of Differential Calculus, Integral Calculus and differential equations can be taught conceptually along with real engineering applications in which particular algorithm and theory can be applied. Numerical examples will be helpful in understanding the content of the subject.

MEANS OF ASSESSMENT

- Assignments and Quiz/Class Tests
- Mid-term and End-term Written Tests
- Model/Prototype Making

RECOMMENDED BOOKS

1. Elementary Engineering Mathematics by BS Grewal, Khanna Publishers, New Delhi
2. Engineering Mathematics, Vol I & II by SS Sastry, Prentice Hall of India Pvt. Ltd.,
3. Applied Mathematics-II by Chauhan and Chauhan, Krishna Publications, Meerut.
4. Applied Mathematics-I (B) by Kailash Sinha and Varun Kumar; Aarti Publication, Meerut

SUGGESTED DISTRIBUTION OF MARKS

Topic	Time Allotted (Periods)	Marks Allotted (%)
1.	20	28
2.	20	28
3.	18	24
4	12	20
Total	70	100

2.2 APPLIED PHYSICS – II

L T P
5 - 2

RATIONALE

Applied physics includes the study of a diversified topics related to the world around us. It aims to give an understanding of this world both by observation and by prediction of the way in which objects behave. Concrete knowledge of physical laws, analysis and applications in various fields of engineering and technology are given prominence in this course content.

Note: Teachers should give examples of engineering/technology applications of various concepts and principles in each topic so that students are able to learn and appreciate these concepts and principles. In all contents, SI units should be followed.

LEARNING OUTCOMES

After undergoing this subject, the student will be able to;

- Define wave motion its types (Transverse and Longitudinal), Periodic and Simple Harmonic Motion, solve simple problems.
- Define the terms: frequency, amplitude, wavelength, velocity of a wave.
- Explain various Engineering, Medical and Industrial applications of Ultrasonics.
- Apply acoustics principles to various types of buildings to get best sound effect
- Explain diffraction, interference, polarization.
- Define capacitance and its unit. They will be able to explain the function of capacitors in simple circuits, solve simple problems using $C=Q/V$
- Explain the role of free electrons in insulators, conductors and semiconductors, qualitatively the terms: potential, potential difference, electromotive force.
- Explain the concept of electric current, resistance and its measurement.
- List the effects of an electric current and their common applications, State and apply Ohm's law, calculate the equivalent resistance of a variety of resistor combinations, determine the energy consumed by an appliance, distinguish between AC and DC electricity
- Explain Biot-Savart Law, Ampere's law, Lorenz Force.
- State the laws of electromagnetic induction, describe the effect on a current-carrying conductor when placed in a magnetic field
- Explain operation of moving coil galvanometer, simple DC motor
- Apply the knowledge of diodes in rectifiers, adapters IC's and various electronic circuits. Apply the concept of light amplification in designing of various LASER based instruments and optical sources.
- Explain total internal reflection and apply this concept for optical fibre and its uses in Medical field and Communication.

DETAILED CONTENTS

1. Wave motion and its applications (12 periods)
 - 1.1 Wave motion, transverse and longitudinal wave motion with examples, sound and light waves, relationship among wave velocity, frequency and wave length and its application

- 1.2 Wave equation $y = r \sin wt$, phase, phase difference, principle of superposition of waves
- 1.3 Simple Harmonic Motion (SHM): definition and characteristic, expression for displacement, velocity, acceleration, time period, frequency in S.H.M., Energy of a body executing S. H. M., simple pendulum, concept of simple harmonic progressive wave,
- 1.4 Free, Damped and forced oscillations, Resonance with examples, Q-factor
- 1.5 Definition of pitch, loudness, quality and intensity of sound waves, intensity level, Echo and reverberation, Sabine formula for reverberation time(without derivation), coefficient of absorption of sound, methods to control reverberation time and their applications, Acoustics of building defects and remedy.
- 1.6 Ultrasonics –production, detection, properties and applications in engineering and medical applications.

2. Wave Optics (6 periods)
- 2.1 Dual nature of light, wave theory of light, laws of reflection and refraction, Snell's law, Power of lens, magnification.
- 2.2 Two-Source Interference, Double-Slit interference, Interference due to thin films, Fresnel's biprism.
- 2.3 use of interference making highly efficient solar panel.
- 2.4 diffraction, Single Slit diffraction, Intensity calculation etc.
- 2.5 Polarization of electromagnetic waves, polarizing sheets, polarizing by Reflection (Brewer's law), Malus law, use of Polaroids.

3. Electrostatics (12 periods)
- 3.1 Concept of charge, Coulombs law, Electric field of point charges, Electric lines of force and their properties, Electric flux, Electric potential and potential difference.
- 3.2 Gauss law of electrostatics: Application of Gauss law to find electric field intensity of straight charged conductor, plane charged sheet and charged sphere.
- 3.3 Capacitor and its working principle, Capacitance and its units. Capacitance of parallel plate capacitor. Series and parallel combination of capacitors (numerical), charging and discharging of a capacitor.
- 3.4 Dielectric and its effect on capacitance, dielectric break down.
- 3.5 Application of electrostatics in electrostatic precipitation of microbes and moisture separation from air and gases in industry for pollution control (Brief explanation only)

4. Current Electricity (12 periods)
- 4.1 Electric Current, Resistance, Specific Resistance, Conductance, Specific Conductance, Series and Parallel combination of Resistances. Factors affecting Resistance, Colour coding of carbon Resistances, Ohm's law. Superconductivity.
- 4.2 Kirchhoff's laws, Wheatstone bridge and its applications (meter bridge and slide wire bridge)
- 4.3 Concept of terminal potential difference and Electro motive force (EMF), potentiometer.
- 4.4 Heating effect of current, Electric power, Electric energy and its units (related numerical problems), Advantages of Electric Energy over other forms of energy
- 4.5 Examples of application of DC circuits in various electrical and electronics equipment such as C.R.O, T.V., Audio-Video System, Computers etc.

5. Magneto Statics and Electromagnetism (12 periods)
 - 5.1 Magnetic poles, force on a moving charge, circulating charges, force on a current carrying wire, Hall effect, torque on a current loop.
 - 5.2 Magnetic field due to moving charge(Biot-Savart Law), due to current (Biot-Savart Law), parallel currents, field of a solenoid, Ampere's law.
 - 5.3 Faraday's law, Lenz' law, motional emf, induced electric fields.
 - 5.4 Magnetic dipole and force on a magnetic dipole in a non-uniform field, Magnetization, Gauss' law for magnetism.
 - 5.5 Types of magnetic materials. Dia, para and ferromagnetic materials with their properties,
 - 5.6 Application of electromagnetism in ac/dc motors and generators.
6. Semiconductor physics (8 periods)
 - 6.1 Types of materials (insulator, semiconductor, conductor), intrinsic and extrinsic semiconductors, p-n junction diode and its V-I characteristics
 - 6.2 Diode as rectifier – half wave and full wave rectifier (centre taped),
 - 6.3 Semiconductor transistor, pnp and npn (concepts only)
 - 6.4 Application of semiconductor diodes (Zener, LED) and that of transistor as amplifier and oscillator.
7. Modern Physics (8 Periods)
 - 7.1 Lasers: concept of energy levels, ionizations and excitation potentials; spontaneous and stimulated emission; laser and its characteristics, population inversion, Types of lasers; Ruby and He-Ne lasers, engineering and medical applications of lasers.
 - 7.2 Fibre optics: Total internal reflection and its applications, Critical angle and conditions for total internal reflection, introduction to optical fibers, light propagation, types, acceptance angle and numerical aperture, types and applications of optical fibre in communication.
 - 7.3 Introduction to nanotechnology, nanoparticles and nano materials,

LIST OF PRACTICALS (To perform minimum six experiments)

1. To determine the velocity of sound with the help of resonance tube.
2. To find the focal length of convex lens by displacement method.
3. To find the refractive index of the material of given prism using spectrometer.
4. To find the wavelength of sodium light using Fresnel's biprism.
5. To verify laws of resistances in series and parallel combination
6. To verify ohm's laws by drawing a graph between voltage and current.
7. To measure very low resistance and very high resistances using Slide Wire bridge
8. Conversion of Galvanometer into an Ammeter and Voltmeter of given range.
9. To draw hysteresis curve of a ferromagnetic material.
10. To draw characteristics of a pn junction diode and determine knee and break down voltages.
11. To find wave length of the laser beam.
12. To find numerical aperture of an optical fiber.

INSTRUCTIONAL STATREGY

Teacher may use various teaching aids like live models, charts, graphs and experimental kits etc. for imparting effective instructions in the subject. The teacher should explain about field applications before teaching the basics to develop proper understanding of the physical phenomenon. Use of demonstration and animations can make the subject interesting and may develop scientific temper in the students. Teacher must plan a tour of Science Park/planetarium available in nearby areas in order to enhance the interest in this course.

MEANS OF ASSESSMENT

- Assignment & Quiz,
- Mid-Term and End-Term written test,
- Model Making,
- Actual Lab & Practical Work,
- Viva-Voice

RECOMMENDED BOOKS

1. Text Book of Physics (Part-I, Part-II); N.C.E.R.T., Delhi
2. Concepts in Physics by HC Verma, Vol. I & II, Bharti Bhawan Ltd. New Delhi
3. A Text Book of Optics, Subramanian and Brij Lal, S Chand & Co., New Delhi
4. Practical Physics, by C. L. Arora, S Chand publications
5. Engineering Physics by PV Naik, Pearson Education Pvt. Ltd, New Delhi
6. Modern Engineering Physics by SL Gupta, Sanjeev Gupta, Dhanpat Rai Publications.
7. Physics Volume 2, 5th edition, Haliday Resnick and Krane, Wiley publication
8. Fundamentals of Physics by Haliday, Resnick & Walker 7th edition, Wiley publication

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	12	18
2	6	8
3	12	18
4	12	16
5	12	16
6	8	12
7	8	12
Total	70	100

2.3 APPLIED CHEMISTRY

L T P
5 - 2

RATIONALE

The use of various chemicals and chemical products in diverse technical and engineering fields have repeatedly proved the importance of Applied Chemistry, which enhances its role to a new peak. On the other hand, ever increasing use of such materials will compel engineers, technocrats to acquire essential applied chemistry knowledge in order to select engineering materials, which not only suit them but also provide more environmental compatibility. This situation demands principles of Applied Chemistry in diploma-engineering courses. Principles of Applied Chemistry will enable budding engineers and technocrats to develop scientific temper and appreciate physical, chemical and engineering properties of materials. Hence the subject of Applied Chemistry.

LEARNING OUTCOMES

After undergoing this subject, the student will be able to:

- Classify various substances based on state of aggregation
- Substantiate the laws and principles on which structure of atom is established.
- Explain and predict properties of substances.
- Explain sources of water and various characteristics of water (quantitatively).
- Explain cause and factors which can adversely affecting natural water quality and remedial measures available for water purification
- Think critically, develop and adapt water conservation techniques.
- Explain corrosion of metal and their preventive measures.
- explain chemical nature and causes of corrosion
- apply correct and efficient methods of corrosion prevention.
- explain chemistry of fuels and their relative advantages.
- select most efficient fuel for the engine and engineering applications.
- suggest how to subside air pollution caused by the use of fossil fuels
- explain the chemistry of various polymers and plastics
- verify suitability and select polymer/rubber/plastic materials for engineering applications.

DETAILED CONTENTS

1. Atomic Structure, Periodic Table and Chemical Bonding (14 periods)
 - 1.1 Fundamental particles- mass and charges of electrons, protons and neutrons with names of the scientists who discovered these fundamental particles.
 - 1.2 Bohr's model of atom and successes and limitations of atomic theory (qualitative treatment only).
 - 1.3 Atomic number, atomic mass number isotopes and isobars.
 - 1.4 Definition of orbit and orbitals, shapes of s and p orbitals only, quantum numbers and their significance,
 - 1.5 Aufbau's principle, Pauli's exclusion principle and Hund's rule electronic configuration of elements with atomic number (Z) = 30 only. (Electronic configurations of elements with atomic number greater than 30 are excluded).
 - 1.6 Modern periodic law and periodic table, groups and periods, classification of elements into s, p, d and f blocks (periodicity in properties - excluded)
 - 1.7 Chemical bonding and cause of bonding and types such as ionic bond in NaCl sigma (σ) and pi (π) covalent bonds in H₂, HCl, Cl₂, elementary idea of hybridization in BeCl₂, BF₃, CH₄, NH₃ and H₂O, VSEPR, Molecular orbital Theory
 - 1.8 States of Matter: Solid, Liquid & Gas, Metallic bonding- explanation with the help of electron gas (sea) model.
2. Fuels and Lubricants (18 periods)
 - 2.1 Definition of fuel, classification of fuels, characteristics of good fuel, relative merits of gaseous, liquid and solid fuels
 - 2.2 Calorific value-higher calorific value, lower calorific value, determination of calorific value of solid or liquid fuel using Bomb calorimeter and numerical examples.
 - 2.3 Coal - types of coal and proximate analysis of coal
 - 2.4 Fuel rating – Octane number and Cetane number, fuel-structural influence on Octane and Cetane numbers
 - 2.5 Gaseous fuels – chemical composition, calorific value and applications of natural gas (CNG), LPG, producer gas, water gas and biogas.
 - 2.6 Elementary ideal on – hydrogen as future fuels, nuclear fuels.
 - 2.7 Lubricants: Definition and properties, mechanism, industrial application and its function in bearings.
 - 2.8 Synthetic lubricants and cutting fluids.
3. Water (14 periods)
 - 3.1 Demonstration of water resources on Earth using pie chart.
 - 3.2 Classification of water – soft water and hard water, action of soap on hard water, types of hardness, causes of hardness, units of hardness – mg per liter (mgL⁻¹) and part per million (ppm) and simple numerical, pH and buffer solutions and their applications.

- 3.3 Disadvantages caused by the use of hard water in domestic and boiler feed water. Priming and foaming and caustic embrittlement in boilers.
- 3.4 Removal of hardness -Permutit process and Ion-exchange process.
- 3.5 Physico-Chemical methods for Water Quality Testing
 - a) Determination of pH using pH meter, total dissolved solids (TDS)
 - b) Testing and Estimation of- alkalinity, indicator their types and application total hardness by EDTA method and O'Hener's Method. (chemical reaction of EDTA method are excluded).
 - c) Understanding of Indian Water Quality standards as per WHO
- 3.6 Natural water sterilization by chlorine and UV radiation and reverse osmosis.
- 3.7 Municipality waste water treatment. Definition of B.O.D and C.O.D.

4. Electrochemistry (4 periods)

Redox Reaction, Electrode Potential, Nernst equation, Electrochemical cell (Galvanic and Electrolytic); Nernst equation.

5. Corrosion and its Control (10 periods)
 - 5.1 Definition of corrosion and factors affecting corrosion rate.
 - 5.2 Theories of
 - a) Dry (chemical) corrosion- Pilling Bedworth rule
 - b) Wet corrosion in acidic atmosphere by hydrogen evolution mechanism
 - 5.3 Definition of passivity and galvanic series
 - 5.4 Corrosion control:
 - α) Metal coatings – Cathodic protection, Cementation on Base Metal Steel – Application of Metal Zn (Sheradizing), Cr (Chromozing) and Al (Aluminizing), Sacrificial protection and impressed current voltage
 - β) Inorganic coatings – Anodizing and phosphating,
 - χ) Organic coatings - use of paints varnishes and enamels
 - δ) Internal corrosion preventive measures- alloying (with reference to passivating, neutralizing and inhibition) and heat treatment (quenching, annealing)

6. Organic compounds, Polymers and Plastics (10 periods)
 - 6.1 Classification of organic compounds and IUPAC Nomenclature
 - 6.2 Definition of polymer, monomer and degree of polymerization
 - 6.3 Brief introduction to addition and condensation polymers with suitable examples (PE, PS, PVC, Teflon, Nylon -66 and Bakelite)
 - 6.4 Definition of plastics, thermo plastics and thermo setting plastics with suitable examples, distinctions between thermo and thermo setting plastics
 - 6.5 Applications of polymers in industry and daily life

LIST OF PRACTICALS

1. Estimation of total hardness of water using standard EDTA solution

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

2. Estimation of total alkalinity of given water sample by titrating it against standard sulfuric acid solution
3. Proximate analysis of solid fuel)
4. Estimation of temporary hardness of water sample by O' Hener's Method.
5. Determination of flash and fire point of given lubricating oil using Able's flash point apparatus

INSTRUCTIONAL STRATEGY

Teachers may take help of various models and charts while imparting instructions to make the concept clear. More emphasis should be laid on discussing and explaining practical applications of various chemical process and reactions. In addition, students should be encouraged or motivated to study those processes in more details, which may find practical application in their future professional career.

MEANS OF ASSEMENTS

- Assignment & Quiz,
- Mid-Term and End-Term written test,
- Model Making,
- Actual Lab & Practical Work,
- Viva Voce

RECOMMENDED BOOKS

1. Chemistry in Engineering by J.C. Kuricose & J. Rajaram, Tata McGraw Hill, Publishing Company Limited, New Delhi.
2. Engineering Chemistry by P.C. Jain & Monika Jain, Dhanapat Rai Publishing Company, New Delhi.
3. Eagle's Applied Chemistry - I by S. C. Ahuja & G. H. Hugar, Eagle Prakashan, Jalandhar.
4. Engineering Chemistry – A Text Book by H. K. Chopra & A. Parmar, Narosa Publishing House, New Delhi.
5. Applied Chemistry - I by Dr. P. K Vij & Shiksha Vij, Lords Publications, Jalandhar.
6. Engineering Chemistry by Dr. Himanshu Pandey, Goel Publishing House, Meerut, India

SUGGESTED DISTRIBUTION OF MARKS

Topics	Time Allotted (hrs)	Marks Allotted (%)
1	14	20
2	18	24
3	14	20
4	4	6
5	10	15
6	10	15
Total	70	100

2.4 TEXTILE FIBRES-II

(Common with Textile Technology and Textile Engineering)

L	T	P
4	-	2

RATIONALE

Textile Fibre being the primary input to textile industry, any education in the field of textiles remains incomplete with some knowledge of textile fibres, so whether it is textile technologist or textile chemist knowledge of textile fibres is inevitable. The paper aims to expose the vital aspect of subject to the reader.

LEARNING OUTCOMES

(After completing the course student will be able to:)

1. Explain classification of synthetic fibres, the role of degree of polymerization, molecular weight & other properties needed for fibre forming polymer
2. Explain the process of viscose fibre manufacture & its properties
3. Understand and able to explain different fibre spinning systems viz. melt spinning, solution spinning, dry spinning etc
4. Explain the process of forming fibres like polyester, polyamide, polypropylene & their properties
5. Explain the process of manufacture of PAN, & other high performance fibre

DETAILED CONTENTS

Unit 1:

Classification of man made fibres, definition of regenerated and synthetic fibres, Concepts of molecular weight, Degree of polymerization, Orientation and Crystallinity, Characteristics of fibre forming polymer.

Unit 2

Introduction to methods of fibre formation by melt spinning, dry spinning, & wet spinning, manufacturing process of Polyester fibre. Physical & chemical properties of polyester fibres, applications.

Unit 3

Polyamide Fibres – History of development, Different types of polyamide fibres, Manufacturing process of Nylon-6, Nylon-66, Physical & chemical properties of Nylon-6 & Nylon-66 and applications.

Unit 4

Polyacrylonitrile fibres, Manufacturing process of Acrylic fibre, physical and chemical properties of acrylic fibres & its applications.

Unit 5

Introduction to regenerated fibre, Raw material for viscose rayon, Manufacturing sequence of viscose fibre, Introduction to Acetate and Cuprammonium rayons.

Recommended Books :

6. वस्त्र रेशे –उत्पादन विशेषताएँ एवं उपयोग –DR. D.B. Shakyawar & Dr. M.K. Singh, abhishek Publication Chandigarh/ New Delhi.
7. Textile Fibre by Ghol and Valanslk`
8. S. P. Mishra, A text book of Fibres Science and technology, New Age International (p) Ltd 2000.
9. H V S Murthy, Textile Fibres- Textile Association Publication 1995.
10. Textile Fibres –I By Dr. V.A. Shenai

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	16	20
2	14	20
3	16	20
4	10	20
5	10	20
Total	56	100

List of Experiments

1. To distinguish
 - i) Nylon from other fibres
 - ii) Polysters from other fibres
 - iii)Viscose rayon, Cuprammonium rayon and Acetate rayon from other fibres.
2. To distinguish Orlon Acrylic fibres from other fibres.
3. To identify fibres such as viscose rayon, Polyester, Nylon and Acrylic fibres under microscope and to draw their longitudinal and cross-sectional views.
4. Checking moisture regain of different man made textile fibres by shirley moisture meter and by good brand conditioning oven.
5. To identify the man made fibres by
 - (i) Staining test
 - (ii) Solubility test
 - (iii) Burning test
6. To do quantitative estimation of fibers in a blend.

2.5 TEXTILE CHEMICAL PROCESSING

L T P

6 - -

RATIONALE : The fabrics prepared go under variety of chemical processing before it reaches the hands of consumer. The processes have different objectives but they are important for quality and aesthetic sense added to the fabric so is this paper here.

LEARNING OUTCOMES

: After undergoing the subject, the students will be able to:

1. Understand the different Preparatory Process Required for dyeing of textile Materials.
2. Understand the different Dyeing Process Required for textile Materials.
3. Understand the different Printing Process Required for fabrics.

DETAILED CONTENTS

(A) PREPARATORY PROCESS

General Introduction of following : 1. Impurities in raw cotton, jute, wool and silk, their removal., 2. Cropping, Shearing, Cropping and Gas Singeing 3. Desizing., 4. Scouring of cotton., 5. Bleaching of cotton with Sodium Hypochlorite and Hydrogen peroxide., 6. Scouring of wool., 7. Carbonization of wool., 8. Milling., 9. Crabbing of wool., 10. Decatising., 11. Degumming of silk., 12. Jute retting, Heat setting of synthetic and synthetic blends (object, process, stenter used for the process) (Details of processes are not required

(B) MERCERISATION

1. Object. 2. Mercerization process for yarn and cloth. 3. Physical changes in fibers after mercerisation.

(C) DYEING: 1. Classification of dyes according to their mode of application. 2. Dyeing of cotton with direct, Sulphur, vat, solubilised vat, reactive. 3. Dyeing of wool and silk. 4. Dyeing of Nylon, acetate and terylene with disperse dyes. 5. Dyeing of acrylics with modified basic dyes. 6. Basic idea about dope dyeing. 7. Introduction of natural dyes-vegetables, minerals and animal dyes, dying of wool, silk & cotton with these dyes.

(D) PRINTING 1. Object of Printing 2. Methods of printing: Block, screen and spray printing. 3. Styles of printing : Elementary knowledge of direct. resists, discharge styles of printing.

(E) FINISHING: Object of Finishing - Elementary knowledge of different finishing processes.

RECOMMENDED BOOKS

1. Basics of Textile Chemical Processing

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

2. Textile Chemical Processing (Central Board of Secondary Education in Collaboration with NIFT)
3. Bleaching, Mercerizing & Dyeing of cotton materials by R.S.Prayag

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	20	30
2	8	10
3	20	25
4	16	15
5	14	15
Total	84	100

2.6 WORKSHOP PRACTICE

L T P
- - 10

RATIONALE

In order to have a balanced overall development of diploma engineers, it is necessary to integrate theory with practice. General workshop practices are included in the curriculum in order to provide hands-on experience about use of different tools and basic manufacturing practices. This subject aims at developing general manual and machining skills in the students. In addition, the development of dignity of labour, safety at work place, team working and development of right attitude are the other objectives.

LEARNING OUTCOMES

After completing the course, the students will be able to:

- Identify tools and equipment used and their respective functions.
- Identify different types of materials and their basic properties.
- Use and take measurements with the help of basic measuring tools/equipment.
- Select proper tools for a particular operation.
- Select materials, tools, and sequence of operations to make a job as per given specification/drawing.
- Prepare simple jobs independently and inspect the same.
- Follow safety procedures and precautionary measures.
- Use safety equipment and Personal Protection Equipment.

DETAILED CONTENTS (PRACTICAL EXERCISES)

Note: The students are supposed to come in proper workshop dress prescribed by the institute. Wearing shoes in the workshop(s) is compulsory. Importance of safety and cleanliness, safety measures and upkeep of tools, equipment and environment in each of the following shops should be explained and practiced. The students should prepare sketches of various tools/jobs in their practical Notebook.

The following shops are included in the syllabus:

- 1 Fitting Shop
- 2 Sheet Metal Shop
- 3 Welding Shop
- 4 Foundry Shop
- 5 Machine Shop

1. FITTING SHOP

1.1 Use of personal protective equipment and safety precautions while working.

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

- 1.2 Basic deburring processes.
- 1.3 Introduction to fitting shop tools, marking and measuring devices/equipment.
- 1.4 Identification of materials. (Iron, Copper, Stainless Steel, Aluminium etc.)
- 1.5 Identification of various steel sections (flat, angle, channel, bar etc.).
- 1.6 Introduction to various fitting shop operations/processes (Hacksawing, Drilling, Chipping and Filing).
- 1.7 Job Practice
 - Job I Marking of job, use of marking tools, filing and use of measuring instruments. (Vernier caliper, Micrometer and Vernier height gauge).
 - Job II Filing a rectangular/square piece to maintain dimensions within an accuracy of ± 0.25 mm.
 - Job III Making a cut-out from a square piece of MS flat using hand hacksaw and chipping
 - Job IV Drilling and tapping practice on MS Flat.

2. SHEET METAL SHOP

- 2.1 Introduction to sheet metal shop, use of hand tools and accessories e.g. different types of hammers, hard and soft mallet, sheet and wire gauge, necessary allowance required during job fabrication, selection of material.
- 2.1 Introduction and demonstration of hand tools used in sheet metal shop.
- 2.2 Introduction and demonstration of various machines and equipment used in sheet metal shop e.g. Shearing Machine, Bar Folder, Burring Machine,
- 2.4 Introduction and demonstration of various raw materials used in sheet metal shop e.g. black-plain sheet, galvanized-iron plain sheet, galvanised corrugated sheet, aluminium sheet etc.
- 2.5 Study of various types of nuts, bolts, rivets, screws etc.
- 2.6 Job Practice
 - Job I: Shearing practice on a sheet using hand shears.
 - Job II: Practice on making Single riveted lap joint/Double riveted lap Joint.
 - Job III: Practice on making Single cover plate chain type, zig-zag type and single rivetted Butt Joint.

3 WELDING SHOP – I

- 3.1 Introduction and importance of welding as compared to other material joining processes. Specifications and type of welding machines, classification and coding of electrodes, welding parameters, welding joints and welding positions. Materials to be welded, safety precautions.
- 3.2 Job Practice
 - Job I Practice of striking arc (Minimum 4 beads on 100 mm long M.S. flat).
 - Job II Practice of depositing beads on plate at different current levels. (Minimum 4 beads on M.S. plate at four setting of current level).
 - Job III Preparation of lap joint using arc welding process.

Job IV Preparation of T-joint using gas welding or arc welding on 100 mm x 6 mm MS Flat

4 FOUNDRY SHOP

- 4.1 Study of metal and non-metals
- 4.2 Study and Sketch of the Foundry tools
- 4.3 Study and sketch of Cupola and pit furnace
- 4.4 To prepare green moulding sand and to prepare moulds (single piece and double piece pattern sweep mould)
- 4.5 Casting of non-ferrous (lead or aluminum)

5 MACHINE SHOP

- 5.1 Study and sketch of lathe machine
- 5.2 Study and Sketch of grinders, milling machine, drilling machine and CNC machine.
- 5.3 Plain and step turning and knurling practice.
- 5.4 Study and sketch of planing/shaping machine and to plane a rectangle of cast iron.

MEANS OF ASSESSMENT

- Workshop jobs
- Report writing, presentation and viva voce

RECOMMENDED BOOKS

- 1.1 Workshop Technology I,II,III, by SK Hajra, Choudhary and AK Choudhary; Media Promoters and Publishers Pvt. Ltd. Mumbai.
- 1.2 Workshop Technology Vol. I, II, III by Manchanda; India Publishing House, Jalandhar.
- 1.3 Workshop Training Manual Vol. I, II by S.S. Ubhi; Katson Publishers, Ludhiana.
- 1.4 Manual on Workshop Practice by K Venkata Reddy; MacMillan India Ltd., New Delhi
- 1.5 Basic Workshop Practice Manual by T Jeyapoovan; Vikas Publishing House (P) Ltd., New Delhi
- 1.6 Workshop Technology by B.S. Raghuwanshi; Dhanpat Rai and Co., New Delhi
- 1.7 Workshop Technology by HS Bawa; Tata McGraw Hill Publishers, New Delhi.

Third Semester

3.1 - FABRIC STRUCTURE & DESIGN

L T P
6 2 -

Rationale

The importance of the paper lies in the fact that it introduces the reader with different varieties of the fabric and designs and related technical terminology. Knowledge of these things very base of textile designer's working.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1- To understand about classification of woven fabrics.
- 2-To understand various technical items used in cloth construction.
- 3-Able to analysis the woven fabric structure.
- 4-To construct the elementary weaves.
- 5-To understand about special types of weaves.

DETAILED CONTENTS

1. INTRODUCTION:

Introduction to fabric structure. Explanation of woven structure and other fabric structures. e.g. Knitted, Non-woven, Bonded etc.

- i. Definition of Warp and Weft, Ends and Picks. Determination of warp and weft in a given fabric. Design, Repeat of a design, Draft, Lifting or Peg plan and Denting order.
- ii. Types of drafts used in the manufacture of the fabrics.
- iii. Construction of plain weaves on point or graph paper. Relation of draft, design and peg plan.
- iv. Construction of plain weave and its derivatives in the form of simple Matt or Hopsack and Ribbed Structures.
- v. Various Hopsack or Matt weave designs with warp face, weft face and reversible effects.
- vi. Ornamentation of plain fabrics by different methods.

2. TWILL WEAVES:

Construction of Twill weaves and their classification under the following heads.

- i. Continuous regular twills.
- ii. Pointed twills.

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

- iii. Combined twills.
- iv. Rearranged twills.
- v. Broken twills.
- vi. Fancy twills.
- vii. Herring bone twills.

3. ANALYSIS OF FABRICS:

- i. Analysis of a fabric and its objects. Confirmation of warp and weft and determination of weaving particulars from the given sample of a fabric.
- ii. Procedure for transferring the interlacement of ENDS and PICKS on graph paper for obtaining the design of the given sample of the fabric.

4. SATIN AND SATEEN WEAVE:

Characteristics and uses of satin and sateen weaves. Construction of regular and irregular satin and sateen.

5. DESIGN:

Construction of the following design on point paper along with their draft, peg plan, denting order and weaving particulars.

- i. Diamond and Diaper weaves on pointed draft.
- ii. CREPE weaves by different methods and their characteristics.
- iii. Simple Honeycomb, Brighton Honeycomb, Huck-a back, weaves.
- iv. Mock-leno weaves.

6. FABRICS :

Calculation of fabric weight (GSM).

7. Miscellaneous Weaves

Design of following weaves only.

- i. Sponge weaves
- ii. Devon huck
- iii. Barley Corn
- iv. Stitched hop-sack
- v. Twilled hop-sack
- vi. Stripe and Check Weave

8. Application of colour and weave effect.

- i. Continuous Line Effect
- ii. Dog's Tooth
- iii. Hairline Effect
- iv. Bird's Eye

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

- v. Step Pattern
- vi. All Over Effect
- vii. Check, stripe, shot, cross over effect in fabric

INSTRUCTIONAL STRATEGY

Teacher should take theory lecture, demonstration of concepts and prototype

MEANS OF ASSESSMENT

- Assignments and quiz/class tests, mid-semester and end-semester written tests
- Actual practical work, exercises and viva-voce
- Presentation and viva-voce

RECOMMENDED BOOKS

1. Fabric Structure and Design by N.Gokarveshan
2. Watson's textile design & colour by Z.J.Grosicki.
3. Woven fabric structure design and product planning by Dr. J. Hayavadana
4. Mastering weaves structure- Sharon Alderman-Inter weave Press

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	12	15
2	15	18
3	10	12
4	8	12
5	15	18
6	8	5
7	6	10
8	10	10
Total	84	100

3.2 ELECTRICAL TECHNOLOGY & ELECTRONICS

(Common With Three Year Diploma Course Carpet Technology, Textile Chemistry)

L T P
5 - 2

RATIONALE

The superiority of electricity as power over other means in use in home or industry cannot be denied. So, it is imperative to introduce the mechanical engineering students to electrical machines and their various uses.

LEARNING OUTCOMES

After completing the course, the students will be able to: • Faraday's Laws of electromagnetic induction. Self and mutual induction. • Relationship of voltage and current for pure resistance, pure inductance, and pure capacitive reactance, impedance. • Production of Three-phase voltage, advantages of three-phase supply. Concept of star and delta connections. • Measurement of power in a single phase and three-phase circuits by wattmeter, Use of digital multimeter for measurement of voltage, current, and testing of devices. • Basic idea of semiconductors P & N type. Semiconductor diodes, Zener diodes, and their applications in rectifiers. • Working principle, Constructional details of D.C. Generators & D.C. Motors. • Working principle and constructional details of a single-phase and 3-phase transformers.

DETAILED CONTENTS

- 1. Electric Induction (6 Periods)**
 - 1.1. Faraday's Laws of electromagnetic induction. Self and mutual induction. Statically and dynamically induced e.m.f., Lenz's law. Fleming's left-hand and right-hand rule.
- 2. A. C. Theory (6 Periods)**
 - 2.1. Production of alternating e.m.f. Definition of cycle, frequency, amplitude, time period, instantaneous, average, R.M.S. maximum values of sinusoidal wave. Form factor, peak factor. Representation of a sinusoidal quantity by a mathematical expression and phasor, phase and phase difference. Relationship of voltage and current for pure resistance, pure inductance, and pure capacitive reactance, impedance. Solution and phasor diagrams of simple R.L.C. series and parallel circuits. Active and reactive power. Significance of P.F.
- 3. Three Phase Circuits (6 Periods)**
 - 3.1. Production of Three-phase voltage, advantages of three-phase supply. Concept of star and delta connections. Relationship between phase and line values of currents and voltages, Power in three-phase circuits, simple numerical problems.
- 4. Measurement & Measuring Instruments (8 Periods)**
 - 4.1. Primary and secondary instruments-Indicating, Recording and Integrated instruments.
 - 4.2. Working principle and construction of the following instruments.
 - 4.3. Ammeter & Voltmeter (Moving coil & Moving Iron). Extension of their ranges.
 - 4.4. Dynamometer type wattmeter.

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

4.5. Single Phase A. C. Energy Meter.

- 4.5.1. Measurement of power in a single phase and three-phase circuits by wattmeter, Use of digital multimeter for measurement of voltage, current, and testing of devices.

5. Electronics (6 Periods)

- 5.1. Basic idea of semiconductors P & N type. Semiconductor diodes, Zener diodes, and their applications in rectifiers. Transistors-PNP and NPN-their characteristics and uses as an amplifier (Brief description only). Principle characteristics and application of SCR. Devices like UJT, FET, DIAC, TRIAC (Brief introduction, Introduction to operational amplifier, Introduction to basic logic gates and microprocessors.

6. D. C. Machines (6 Periods)

- 6.1.D. C. Generator:
- 6.2. Working principle, Constructional details, e.m.f. equation, Types of generators and their applications.
- 6.3.D. C. Motor:
- 6.4. Working principle, Back e.m.f., Types of D. C. motor and elementary idea of their characteristics. Torque equation, Methods of speed control (Description Only).

7. Transformers (6 Periods)

- 7.1. Working principle and constructional details of a single-phase and 3-phase transformers, e.m.f. equation, Losses and efficiency, Cooling of transformers, Elementary idea of auto transformers and welding transformers.

8. Synchronous machines (8 Periods)

- 8.1. Alternators:
 - 8.1.1. Working principle, Types of alternators, Constructional details, E.M.F. equation, Condition for parallel operation.
- 8.2. Synchronous Motors:
 - 8.2.1. Working principle, Constructional details, Vector diagram, Effect of excitation on armature current and power factor, Synchronous condenser.

9. Induction Motors (8 Periods)

- 9.1. Three Phase Induction Motors:
 - 9.1.1. Working principle and constructional details-Types of induction motors- Slip ring and Squirrel cage. Slip in induction motors. Speed torque characteristic, Starting and speed control. Application of induction motors in industry. General faults and their remedies.
- 9.2. Single Phase Induction Motors:
 - 9.2.1. Working principle and constructional details and application of single-phase motors (Split phase, Capacitor start and Run Motor). A. C. series motors, General faults and their remedies.

10. Electro Heating (5 Periods)

- 10.1. Types of electro heating. Brief description of resistance ovens and induction furnace and core furnaces.

11. Electroplating (5 Periods)

- 11.1. Importance of electroplating, Principle of electroplating and equipment used. Processes used in electroplating, Anodizing.

RECOMMENDED BOOKS

1. A Textbook of Electrical Technology Vol - I | Basic Electrical Engineering | By S. Chand'sby B L Theraja and AK Theraja
2. A Textbook of Electrical Technology Volume II : AC And DC Machines Book 1 of 1: A Textbook of Electrical Technology | by B L Theraja and A K Theraja
3. Electrical & Electronics Engineering Materials, Asian Publishers. Ram Prakash Gupta and Pooja Yadav.

LIST OF PRACTICALS

1. To change the speed and direction of rotation of d.c. shunt motor by
 - 1.1. Armature control method.
 - 1.2. Field control method.
2. To change the speed and direction of rotation of d.c. compound motor by
 - 2.1. Armature control method.
 - 2.2. Field control method.
3. To measure the terminal voltage with variation of load current of
 - 3.1. D.C. shunt generator.
 - 3.2. D.C. compound generator.
4. To perform load test on a single-phase transformer and determine its efficiency.
5. To start and run an induction motor by
 - 5.1. Star Delta Starter.
 - 5.2. Auto Transformer Starter.
6. To measure slip of an induction motor by direct loading.
7. To start and change the direction of rotation of an induction motor.
8. To measure the transformation ratio of a single-phase transformer.
9. To measure power and P.F. in a single-phase circuit by Ammeter, Voltmeter, and Wattmeter.
10. To measure power and P.F. in a 3 phase/A.C. circuit by two-wattmeter method.
11. To calibrate a single-phase energy meter at different P.F.'s and different loads.
12. To locate the faults in an electrical machine by a megger.
13. To connect a fluorescent tube and note its starting and running current.
14. To draw characteristics of Silicon Controlled Rectifier (SCR).
15. Testing of electrical devices - Zener, Diode, Transistor, FET, UJT, SCR.
16. Use of operational amplifier as an adder, subtractor, comparator, differentiator, and integrators.

INSTRUCTIONAL STRATEGY

Lectures, assignments, tutorial, group discussion, and literature review.

MEANS OF ASSESSMENT

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

As per BTE, UP guidelines.

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1.	6	8
2.	6	8
3.	6	8
4.	8	12
5.	6	8
6.	6	8
7.	6	8
8.	8	13
9.	8	13
10.	5	7
11.	5	7
Total	70	100

3.3 SPINNING PREPARATION

L T P
6 - 6

Rationale

In the manufacture of textiles spinning is inevitable process. It involves variety of activities before a fibre can be converted into yarn. This paper deals with pre spinning activities. The subject has been divided in three papers other two are Spinning Technology-I and Spinning Technology-II in the further semester of the course. They deal with various spinning processes and other relevant informations.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1- Able to understand cotton ginning process i.e. saw ginning, roller ginning, macarthy ginning.
- 2-Able to understand about blowroom process.
- 3-Able to understand the cotton carding.

DETAILED CONTENTS

1. Introduction to various processes involve in conversion of fiber into yarn with objective.
2. **GINNING AND BALING:**
 - i. Ginning, objects of ginning.
 - ii. Classification of ginning machines.
 - iii. Description and working of knife roller gins e.g. Single roller gin, Double roller gin.
 - iv. Description and working of Macarthy gins e.g. Single macarthy gin, Double Macarthy gin.
 - v. Description and working of saw gins e.g. Single saw gin, Double saw gin and Improved saw gin.
 - vi. Defects in ginning and their removal.
 - viii. Pressing and baling and its importance.
3. **BLOWROOM:**
 - i. Mixing and its importance, method of mixing. Advantages and disadvantages.
 - ii. Description and working of auto mixer and other modern blenders.
 - iii. Role of mixing oil, antistatic agents, antifly agents in mixing

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

iv. Blow Room: Objects of Blow room. Importance of opening and cleaning

v. Study of opening and cleaning machines e.g. Blending bale opener, hopper feeders, Step cleaner, S.R.R.L. opener, Shirley opener, Whitinaxiflow machine, Air stream cleaner, Three bladed beater and Kirschner beater. E. R. M. cleaner Metal separators, and Mono cylinder beaters.

vi. Study of Modern Blowroom- Bale Plucker(Blend Mat, Uni Flock), Coarse Cleaner(Uni Clean, CLP, Vario Clean), Multimixer(Uni mix, Truschler multimixer), Fine Cleaner(Supremo Clean, CLC-III), Contamination Clearer(Magic EYE, Securo Mat)

vii. Study of Scutcher Machine, Object of Lap forming mechanism, and mechanism of Calendar Roller.

(viii) Calculation of production of scutchers and other machines and efficiency.

(ix) Calculation of lap length and measuring motions.

4. CARDING:

i. Objects of carding, passage of material through the card, cards parts and their functions e.g. Feeding system Licker-in, mote knives, Back plate front plate, Cylinder, Flats, Doffer Under casing etc.

ii. Theory of carding actions in a revolving flat card.

iii. Drive of card parts.

CARD CLOTHING:

i. Flexible and metallic card clothing. Types of clothing wires and its geometry.

ii. Method of mounting the card with flexible and metallic card clothing.

MAINTENANCE:

iii. Objective of Card grinding, Grinding instruments, Card grinding routine, Flat grinding, Integrated grinding system.

iv. Card stripping, its objects, effects of stripping stripping equipment e.g. Plain stripping roll and vacuum stripper.

v. DEVELOPMENTS IN CARDING Special features of high production carding machines.

-Tandem cards with chute feed system.

CARDING CALCULATIONS:-

(vi) Calculation of speeds, drafts and productions of card

(vii) Calculation of production, efficiency, draft and waste percentage.

NOTE :

Question paper must contain at least 25% numerical problem.

INSTRUCTIONAL STRATEGY

Teacher should take theory lecture, demonstration of concepts and prototype

MEANS OF ASSESSMENT

- Assignments and quiz/class tests, mid-semester and end-semester written tests
- Actual practical work, exercises and viva-voce
- Presentation and viva-voce

RECOMMENDED BOOKS

1. Technology of Sort Staple Spinning by W.Klein
2. Principle of Spinning by A.R. Khare

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	5	5
2	7	10
3	38	45
4	34	40
Total	84	100

SPINNING PREPARATION

LIST OF EXPERIMENTS

1. Operation, Setting and Gauging of blending bale opener (hopper feeder) and To measure the dimension of various important parts of the machine.
2. To calculate the speed of different moving parts of blending bale opener (hopper feeder).
3. Operate and gauge the porcupine opener, step cleaner and other opening machines available in the workshop and also calculate speeds of different moving parts.
4. Operation, setting and maintenance of Kirschner beater and to calculate number of beats per inch of feed material.
5. Operate the card machine and produce sliver and to practice piecing lap and sliver.
6. Grinding of Cylinder and Doffer Wire.
7. Grinding of Flat Tops.
8. To set and gauge different part of card machine..
9. Calculate the speeds of cylinder, flats, doffer and lick-in and other moving parts of card machine.
10. To calculate all tension drafts, all intermediate drafts, total drafts and draft constants of a card machine.
11. To calculate number of laps consumed per shift of eight hours.

3.4 WEAVING PREPARATION

L T P
6 - 6

RATIONALE:

Weaving is interlacing of yarn into fabric. It is vital process in the textile industry. The subject has been divided into three papers the other two are Weaving Technology-I and Weaving Technology-II in the final year of the course deal with various activities involved in process. This paper deals with preparatory activities involve in the weaving process.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1- Able to understand winding process of cotton yarn
- 2- Able to understand warping process of cotton yarn
- 3- Able to understand sizing process of cotton yarn

DETAILED CONTENTS

Introduction to various processes involved in the conversion of yarn into fabric.

I. WINDING:

1. Types of packages, Introduction to drum and precision winding.
2. Traversing mechanisms (Rotary, Reciprocating)
3. Uses and limitations of slow speed winding machines and essentials of high speed winding machines.
4. High speed and super high speed warp winding machines-Schlafhorst Autoconer, Savio, Murata winding machine.
5. Study of various types of slub catchers, traversing devices, tensioning devices, ribbon formation and methods of eliminating them. Full package stop motions. Different types of high speed pirn winding machines with special reference to Leeson's pirn winder.
6. Commonly occurring faults in warp winding, their causes and remedies.
7. Norms for slub catcher setting and tension levels.
8. Features of automatic pirn winding machines.
9. Bunch building mechanisms.
10. Commonly occurring faults in pirn winding, their causes and remedies.

II. WARPING :

11. Introduction to various ways of warping.
12. Types of creel and their description.
13. Slow speed and high speed beam warping machines.
14. Sectional warping machine.
15. Stop motions. measuring motions and tensioning devices.
16. Commonly occurring faults in warping and their causes and remedies.

III. SIZING:

17. Object of warp sizing.
18. Introduction to various methods of sizing.
19. Study of slasher sizing machine and multi cylinder sizing machine
20. Detailed study of sizing machine, measuring and marking motion, beam creels, brake guide and tension rollers, sizing and squeezing rollers, drying cylinders, steam trap, sow box construction, Features of modern sow box leasing rods, adjustable comb, beam pressing motion, slipping friction motion.
21. Multicylinders and drying system machines with special reference to drying unit, Merits and demerits of slasher, multicylinder and hot air sizing machines. Introduction to foam, hot melt and cold sizing.
22. Various kinds of sizing ingredients used for cotton, polyester, viscose and their blends.
23. Preparation of size paste for light medium and heavy size for cotton and man-made fibers blend.
24. Manual and mechanical methods of drawing-in, and knotting, twisting of warp.
25. Commonly occurring faults in sizing, drawing in denting and knotting.

INSTRUCTIONAL STRATEGY

Teacher should take theory lecture, demonstration of concepts and prototype

MEANS OF ASSESSMENT

- Assignments and quiz/class tests, mid-semester and end-semester written tests
- Actual practical work, exercises and viva-voce
- Presentation and viva-voce

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

RECOMMENDED BOOKS.

1. Industrial Practices in weaving preparatory by Dr. Mukesh kr. Singh
2. Weaving Preparation technology by Dr. N .Gokarneshan
3. Principal of woven fabric manufacturing by AbjitMajumdar CRC press

Websites for Reference:

<https://nptel.ac.in/courses/116102005>

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	28	34
2	28	34
3	28	36
Total	84	100

WEAVING PREPARATION

LIST OF EXPERIMENTS

1. Practice in preparing cones, cheeses and pirns from hanks or ring bobbins.
2. Practice in creeling and preparation of warp on sectional warping machine of required number of ends and width.
3. Practice in creeling and preparation of warpers beam on High Speed warping machine of required warp plan.
4. Practice in operating sizing machine (if working model of sizing plant available).
5. Practice of size paste preparation in laboratory.
6. Practice of making weaver's knot in laboratory.
7. Practice in drafting and denting for different design draft.
8. Study and sketch the important parts of pirn winding machine.
9. Study and sketch the important parts of warp winding machine.

3.5 PRINCIPLE OF DESIGN AND COLOUR

L	T	P
6	-	-

RATIONALE

Adding aesthetic sense to the fabric by use of colour and development of designs to make it attractive to the consumer is most essential activity in textile manufacturing. This paper aims to equip the incumbent with principles and practices relevant to achieve this goal.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1- Draw and sketch flowers, buds and other figures on fabric.
- 2- Understand the light theory and pigment theory.
- 3- Understand primary and secondary colours.
- 4- Understand colour harmony, tints and hues.
- 5- Understand the weave effect.

DETAILED CONTENTS

1. Drawing, tracing, enlarging reducing and transferring of simple and elaborate figures.
2. Sketching of flowers, buds, leaves, geometrical figures and their assembly to obtain an all over effect in fabric.
3. Preparation of sketches for striped, check, spotted geometric and diaper patterns, suitable for fabrics.
4. Light and pigment theory of colours.
5. Complementary colours, the chromatic circle.
6. Pigment theory of colour. Classification of colours and attributes of the primary and secondary colours. Modification of colours.
7. Colours in combination, general principles of colour contrast, colour harmony, tints, shades and broken hues.
8. Application of colour and weave effect.

9. Development of textile patterns on different basis such as drop, turn over, drop reverse etc. Unit and repeat compared.
10. Transfer of design of motives on graph paper and pilling of weaves according to structure/texture.

INSTRUCTIONAL STRATEGY

Teachers should show different sketches of leaves, flowers and figures. Teachers should show and prepare chart of light and pigment theory also prepare chart of primary and secondary colour.

MEANS OF ASSESSMENT

1. Assignments and quiz/class tests
2. Mid-term and end-term written tests

RECOMMENDED BOOKS

1. Principle of Design- Watson

Websites for Reference:

www.nptel.ac.in

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	12	16
2	12	16
3	9	12
4	8	7
5	8	7
6	10	12
7	9	10
8	6	7
9	6	7
10	6	6
Total	84	100

Fourth Semester

4.1 COMMUNICATION SKILLS – II

L	T	P
4	-	2

RATIONALE

Knowledge of English Language plays an important role in career development. This subject aims at introducing basic concepts of communication besides laying emphasis on developing listening, speaking, reading and writing skills as parts of Communication Skill.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- Frame correct sentences with illustrations
- Comprehend the language correctly
- Interpret the language correctly
- Use given material in new situations.
- Correspond effectively using various types of writings like letters, memos etc.
- Communicate effectively in English with appropriate body language making use of correct and appropriate vocabulary and grammar in an organised set up and social context.

DETAILED CONTENTS

1. Functional Grammar (16 periods)
 - 1.1 Prepositions
 - 1.2 Framing Questions
 - 1.3 Conjunctions
 - 1.4 Tenses
- 2 Reading (16 periods)
 - 2.1 Unseen Passage for Comprehension (Vocabulary enhancement - Prefixes, Suffixes, one word substitution, Synonym and Antonym) based upon the passage should be covered under this topic.
- 3 Writing Skill (24 periods)
 - 3.1 Correspondence
 - a) Business Letters- Floating Quotations, Placing Orders, Complaint Letters.
 - b) Official Letters- Letters to Government and other Offices
 - 3.2 Memos, Circular, Office Orders
 - 3.3 Agenda & Minutes of Meeting
 - 3.4 Report Writing

LIST OF PRACTICALS

Note: Teaching Learning Process should be focused on the use of the language in writing reports and making presentations.

Topics such as Effective listening, effective note taking, group discussions and regular presentations by the students need to be taught in a project oriented manner where the learning happens as a byproduct.

Speaking and Listening Skills

1. Debate
2. Telephonic Conversation: general etiquette for making and receiving calls
3. Offering- Responding to offers.
4. Requesting – Responding to requests
5. Congratulating
6. Exploring sympathy and condolences
7. Asking Questions- Polite Responses
8. Apologizing, forgiving
9. Complaining
10. Warning
11. Asking and giving information
12. Getting and giving permission
13. Asking for and giving opinions

INSTRUCTIONAL STRATEGY

Students should be encouraged to participate in role play and other student-centered activities in class rooms and actively participate in listening exercises

MEANS OF ASSESSMENT

- Assignments and quiz/class tests
- Mid-semester and end-semester written tests
- Actual practical work, exercises and viva-voce
- Presentation and viva-voce

RECOMMENDED BOOKS

1. Communicating Effectively in English, Book-I by Revathi Srinivas; Abhishek Publications, Chandigarh.
2. Communication Techniques and Skills by R. K. Chadha; Dhanpat Rai Publications, New Delhi.

3. High School English Grammar and Composition by Wren & Martin; S. Chand & Company Ltd., Delhi.
4. e-books/e-tools/relevant software to be used as recommended by AICTE/UBTE/NITTTR, Chandigarh.

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	16	28
2	16	28
3	24	44
Total	56	100

4.2 INDUSTRIAL SAFETY

(Common To Three Year Diploma Course Textile Chemistry, Textile Design)

L T P
4 - -

RATIONALE

Textile industry is one of the major industries of the country. Its safety problems are much more different than those of others. So it is vital to give youngsters willing to enter into this field, knowledge of general principles of industrial safety focusing on problems in textile industry.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1- Understand the importance of safety in industry.
- 2- Prevent the primary level accidents
- 3- Understand the safety related engineering concepts
- 4- Understand industry related acts

DETAILED CONTENTS

1. INTRODUCTION:

Need for Industrial Safety - Legal Humanitarian, Economic and Social consideration. Safe working conditions and productivity, Unsafe conditions and Hazards. Cost of accidents- Direct or Indirect social cost, financial cost. Role of management and workers participation in Industrial Safety. Safety management principles and practices.

2. PRINCIPLES OF ACCIDENT PREVENTION:

Definitions - Accident, Injury, Dangerous occurrences, Unsafe acts, Unsafe conditions and hazards. Theories of accidents prevention, Principles and methods of accidents preventions.

3. SAFETY PRECAUTIONS IN SPINNING AND WEAVING:

Safe guarding of machines- Statutory provisions related to safe guarding of machinery and working near unguarded machines. Ergonomics of machine guarding. Types of guards and guarding machines in textile industry. Incidental safety devices. Guarding of machines and safety precautions in Opening, Cleaning, Carding, Drawing, Combing, Fly frame, Ring frames, Rotors (spinning), Winding, Doubling, Warping, Sizing and Weaving operations.

4. SAFETY PRECAUTION IN CHEMICAL PROCESS :

Safety Precautions in Bleaching, Dyeing, Printing, Finishing and Accidental Hazards. Chemical Hazards in Wet Processing. Effluent in textile processing.

4 SAFETY ENGINEERING

Material Handling:

Ergonomics of material handling, Principles of correct method of lifting objects of different size, shape and weight with safe use of accessories for manual handling.

Safety aspects of design and construction and use of material handling machinery use in textile industry- Lifts, Forks, Motor Trolleys, Over head cranes and Chain Pullies.

Principle of good illumination at work place and its recommended minimum standard. Lighting and Colour.

Danger From Electricity:

Safe limits of amperage and voltages. Means for cutting over loads and short circuit protection. earth fault protection. Protection of joints and conductors.

Fire explosion, Common cause for industrial fire detection and alarm. Knowledge of water system, Carbon Dioxide System, Foam Extinguishers system and Dry Chemical Extinguishing Systems for extinguishing fire, Sprinklers.

Health and Welfare:

Health hazards in Textile industry, Occupational diseases. Personal production equipment. Special precautions for specific work environment.

6. SAFETY STATUTES:

Employees welfare and legislation. Indian Boiler Act and Regulation. The Water (Control of Pollution) Act and Rules. The Air (Pollution) Act and Rules. The Noise (Pollution) Act and Rules.

INSTRUCTIONAL STRATEGY

Teacher should take theory lecture, demonstration of concepts and prototype

MEANS OF ASSESSMENT

- Assignments and quiz/class tests
- Mid-term and end-term written tests

RECOMMENDED BOOKS

Health and Safety for Textile Industry by R Vettriselvan, T Jeya Sudha
A Text Book on Industrial Safety by Harsimran Singh Sodhi, Doordarshi Singh

Websites for Reference:

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

<https://nptel.ac.in/>

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	10	18
2	6	11
3	10	18
4	10	18
5	14	24
6	6	11
Total	56	100

4.3 TEXTILE TESTING-I

(Common To Textile Chemistry)

L T P
6 - 4

RATIONALE

As the name implies this paper aims to develop in the incumbent the capability of testing the products and its components for desired results. Without it a product can never be claimed for any standard.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1- To understand the importance of textile testing
- 2- To understand use of statistics in testing
- 3- To understand fiber testing for various parameters
- 4- To understand yarn testing for various parameters

DETAILED CONTENTS

1. IMPORTANCE OF TEXTILE TESTING:

Introduction to textile testing, properties of fibres, yarns and fabrics and their relevance in assessing the performance, of textiles during and after manufacture. Brief introduction of ISO.

2 Sampling and Quality Control :

Definition of sample, sample size, sampling Technique, Introduction to quality control, Accuracy of measurement, presentation and analysis of data, SQC charts analysis of defects, difference between average and correlation. Standard deviation and coefficient of variation.

3. FIBRE TESTING:

- i. Fibre Length (mean length, effective length and staple length. .Fiber Length Measurement - Use of Baer sorter, Fibrograph, Uster-stapler, their principles of operation.
- ii. Fibre Fineness Measurement - By cutting and weighing method, Sheffield micronaire, Aerlometer, Maturity of cotton by caustic soda method and by airflow methods.
- iii. Role of Humidity - Absolute Humidity, Relative Humidity, moisture Regain, Moisture content.
- iv. Introduction to H.V.I. (High Volume Instruments)
- v. Fiber strength testing by Precisely strength tester, stelometer.

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

4. YARN TESTING:

- i. Concept of count, its measurement by different methods. Concepts of S & Z twist, relation between tpi, twist multiplier and count.
- ii. Measurement of yarn twist by Rock bank twist tester, continuous twist tester and by twist and untwist methods.
- iii. Measurement of yarn diameter by microscope.
- iv.

5. EVENNESS:

Nature of irregularities – short term, medium term and long term variations, periodic and non-periodic irregularities. Analysis of classmate and classifaults

INSTRUCTIONAL STRATEGY

Teacher should take theory lecture, demonstration of concepts and prototype

MEANS OF ASSESSMENT

- Assignments and quiz/class tests
- Mid-term and end-term written tests

RECOMMENDED BOOKS

1. Textile Testing- J.E.Booth
2. Physical testing of textile by B P Saville

Websites for Reference:

<https://nptel.ac.in/>

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	10	10
2	14	20
3	25	30
4	25	25
5	10	15
Total	84	100

TEXTILE TESTING-I

LIST OF EXPERIMENT

1. To find the count of yarn
 - (i) by physical balance
 - (ii) by yarn quadrants balance.
 - (iii) by Beasley yarn balance.and to calculate Coefficient of variation (CV).
2. To calculate yarn count by wrap reel and to calculate C.V..
3. Determine the twist of yarn per inch/per meter in double yarn and its individual components by continuous twist tester and twist and untwist tester.
4. Find out the hank of sliver and roving with the aid of wrap block machine.
5. Find the staple length of fiber by Bare Sorter.
6. Measure fibre fineness by flowing air through a sample of fibre by micronaire.
7. Find out fibre length by analytical digital fibrograph.
8. Find out lea strength of cotton yarn by lea strength tester (Power driven) and CSP.
9. Test evenness of the yarn by evenness tester.
10. Fiber Strength Testing by Stelometer.

4.4 BASICS OF INFORMATION TECHNOLOGY

L T P
- - 6

RATIONALE

Information technology has great influence on all aspects of life. Primary purpose of using computer is to make the life easier. Almost all work places and living environment are being computerized. The subject introduces the fundamentals of computer system for using various hardware and software components. In order to prepare diploma holders to work in these environments, it is essential that they are exposed to various aspects of information technology such as understanding the concept of information technology and its scope; operating a computer; use of various tools using MS Office/Open Office/Libre Office using internet etc., form the broad competency profile of diploma holders. This exposure will enable the students to enter their professions with confidence, live in a harmonious way and contribute to the productivity.

Note:

Explanation of Introductory part should be demonstrated with practical work. Following topics may be explained in the laboratory along with the practical exercises. There will not be any theory examination.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- Identify Computer Hardware Components, Network Components and Peripherals.
- Explain the role of an Operating System.
- Install System and Application Software.
- Explain the function of the system components including Processor, Motherboard and Input-output devices.
- Use Word Processing Software to prepare document.
- Use Spreadsheet Software to create workbooks and automate calculation.
- Use Presentation Software to create interactive presentation.
- Perform fundamental tasks common to most application software including print, scan, save, edit, cut, copy, paste, format, spell and grammar check.
- Find and evaluate information on the Web.
- Install Antivirus.
- Safeguard against Online Frauds, threats and crimes.
- Use online office tools(Google suits)

TOPICS TO BE EXPLAINED THROUGH DEMONSTRATION

1. Introduction to Computers and Peripherals.

Components of Computer, Types of Computer, CPU, RAM, ROM, Hard disk, USB, Flash drive, CD, DVD, Blue ray, Keyboard, Mouse, Monitor, LCD, Printer, Plotter, Scanner, Modem, Sound Cards, Speakers, CMOS battery, Sharing of Printers.

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

2. Operation System and Application Software

System Software, Application Software, Virtualization Software, Utility Software, MS Office/Open Office/Libre office, Working with window, Desktop components, Menu bars, creating shortcut of program. Installation of Application software, Antivirus and Drivers.

3. Word Processing, Spreadsheet and Presentation

Usage and creation of word document, spreadsheets and presentation, Google Suits (Google drive, google sheet, google doc. Google presentation)

4. Internet

Basics of Networking – LAN, WAN, Wi-Fi technologies, Concept of IP Addrsses, DNS, Search Engines, e-mail, Browsing and cyber laws.

LIST OF PRACTICAL EXERCISES

1. Identify various components, peripherals of computer and list their functions.
2. Installation of various application software and peripheral drivers
3. Installation of operating system (windows/linux/others)
4. Creation and Management (Rename, delete, search of file and folders)
5. Installation of Antivirus and remove viruses
6. Scanning and printing documents
7. Browsing, Downloading, Information using Internet
8. E-Mail ID creation, comparing, sending and receiving e-mail. Attaching a file with e-mail message.
9. Word Processing (MS Office/Open Office)
 - a) File Management:
 - Opening, creating and saving a document, locating files, copying contents in some different file(s), protecting files, giving password protection for a file
 - b) Page set up:
 - Setting margins, tab setting, ruler, indenting
 - c) Editing a document:
 - Entering text, cut, copy, paste using tool- bars
 - d) Formatting a document:
 - Using different fonts, changing font size and colour, changing the appearance through bold/italic/underlined, highlighting a text, changing case, using subscript and superscript, using different underline methods
 - Aligning of text in a document, justification of document, inserting bullets and numbering
 - Formatting paragraph, inserting page breaks and column breaks, line spacing
 - Use of headers, footers: Inserting footnote, end note, use of comments, autotext
 - Inserting date, time, special symbols, importing graphic images, drawing tools
 - e) Tables and Borders:
 - Creating a table, formatting cells, use of different border styles, shading in tables, merging of cells, partition of cells, inserting and deleting a row in a table

- Print preview, zoom, page set up, printing options
- Using find, replace options
- f) Using Tools like:
 - Spell checker, help, use of macros, mail merge, thesaurus word content and statistics, printing envelopes and labels
 - Using shapes and drawing toolbar,
 - Working with more than one window .

10. Spread Sheet Processing (MS Office/Open Office/Libre Office)

- a) Starting excel, open worksheet, enter, edit, data, formulae to calculate values, format data, save worksheet, switching between different spread sheets
- b) Menu commands:
Create, format charts, organise, manage data, solving problem by analyzing data. Programming with Excel Work Sheet, getting information while working
- c) Work books:
Managing workbooks (create, open, close, save), working in work books, selecting the cells, choosing commands, data entry techniques, formula creation and links, controlling calculations
Editing a worksheet, copying, moving cells, pasting, inserting, deletion cells, rows, columns, find and replace text, numbers of cells, formatting worksheet, conditional formatting
- d) Creating a chart:
Working with chart types, changing data in chart, formatting a chart, use chart to analyze data
Using a list to organize data, sorting and filtering data in list
- e) Retrieve data with query:
Create a pivot table, customizing a pivot table. Statistical analysis of data
- f) Exchange data with other application:
Embedding objects, linking to other applications, import, export document.

11. PowerPoint Presentation (MS Office/Open Office/Libre office)

- a) Introduction to PowerPoint
 - How to start PowerPoint
 - Working environment: concept of toolbars, slide layout & templates.
 - Opening a new/existing presentation
 - Different views for viewing slides in a presentation: normal, slide sorter.
- b) Addition, deletion and saving of slides
- c) Insertion of multimedia elements
 - Adding text boxes
 - Adding/importing pictures
 - Adding movies and sound
 - Adding tables and charts etc.
 - Adding organizational chart
 - Editing objects
 - Working with Clip Art
- d) Formatting slides
 - Using slide master

- Text formatting
- Changing slide layout
- Changing slide colour scheme
- Changing background
- Applying design template

12. Google Suits

Using Google drive, Google shut, Google docs, Google slides.

INSTRUCTIONAL STRATEGY

Since this subject is practice oriented, the teacher should demonstrate the capabilities of computers to students while doing practical exercises. The students should be made familiar with computer parts, peripherals, connections and proficient in making use of MS Office/Open Office/Libre office/Google Suit in addition to working on internet. The student should be made capable of working on computers independently.

MEANS OF ASSESSMENT

- Class Tests/Quiz
- Software Installation and Use
- Viva-Voce
- Presentation

RECOMMENDED BOOKS

1. Fundamentals of Computer by V Rajaraman; Prentice Hall of India Pvt. Ltd., New Delhi
2. Information Technology for Management by Henery Lucas, Tata McGraw Hills, New Delhi
3. Computers Fundamentals Architecture and Organisation by B Ram, revised Edition, New Age International Publishers, New Delhi
4. Computers Today by SK Basandara, Galgotia publication Pvt Ltd. Daryaganj, New Delhi.
5. Internet for Every One by Alexis Leon and Mathews Leon; Vikas Publishing House Pvt. Ltd., Jungpura, New Delhi
6. A First Course in Computer by Sanjay Saxena; Vikas Publishing House Pvt. Ltd., Jungpura, New Delhi
7. Computer Fundamentals by PK Sinha; BPB Publication, New Delhi
8. Fundamentals of Information Technology by Leon and Leon; Vikas Publishing House Pvt. Ltd., Jungpura, New Delhi
9. On Your Marks - Net...Set...Go... Surviving in an e-world by Anushka Wirasinha, Prentice Hall of India Pvt. Ltd., New Delhi
10. Fundamentals of Information Technology by Vipin Arora, Eagle Parkashan, Jalandhar

4.5 SPINNING TECHNOLOGY-I

L T P
4 - 4

RATIONALE

Spinning is the vital process of the textile industry for Yarn Manufacturing. Spinning Technology-I papers deals with the activities involved in the process of Drawing, Combing and Roving

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1- To Understand about the principle and function of Drawing process.
- 2-To Understand about the principle and function of Combing process.
- 3-To Understand about the principle and function of Roving process
- 4- To able to calculate the production and different parameters of above process.

DETAILED CONTENTS

1. DRAWING:

- i. Objects of drawing, Construction of draw frame, its parts and their functions and passage of material through drawing frame.
- ii. Drawing rollers, Top and Bottom drafting rollers and their construction.
- iii. Principles of doubling and drafting.
- iv. Gauging and setting of drafting rollers. Roller pressure and its distributions.
- v. Importance of stop motions, study of electrical stop motions. Study of different drafting systems e.g. 3/3, 3/4, 3/5, 4/4 and 4/5 drafting systems.
- vi. Importance and study of Auto levellers
- vii. Special features of high speed draw frame, their names and different models.
- viii. Defects and remedies in drafting operating.
- ix. Calculations based on draft & production in draw frame.

2. COMBING -

- (i) Importance and use of combing.
- (ii) Sliver lapper - Its object, construction and methods of feeding slivers to the sliver lapper.

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

- (iii) Draft and production, lap winding and roll setting of sliver lapper.
- (iv) Ribon lapper - Its importance and construction, draft and production of ribbon lapper. Stop motion of ribbon lapper.
- (v) Construction and working of super lapper and lap former Machin.
- (vi) Drawing lap formation combination its advantages. Study of automatic lap former.
- (vii) Modern methods of lap preparation-Super Lap, Omega Lap, historical development, Comber, combing cycle, detailed study of Nasmith comber, Modern trends in combing and control of comber waste, Comber Noil study of modern comber and study of various parts and their functions, settings, speeds and mechanism. Production and efficiency of comber, Degree of Combing.
- (viii) Calculation of Noil% , Draft and production of comber,

3. ROVING :

- (i) Objects of roving study and construction and functions of various parts of speed frame/simplex and passage of material through them.
- (ii) Drafting mechanism, drive of drafting rollers, pressure on drafting rollers.
- (iii) Basic principles of Cone drum.
- (iv) Twisting mechanism, study of motions required for twisting flyer and its functions.
- (v) Winding : Principle of winding, bobbin leading and flyer leading winding, drive of winding mechanism. Traverse motion given to bobbins, building motion and its functions.
- (vi) Differential motion, its objects and working principles, study of differential motion.
- (vii) Electronic Differential and Building Motion.
- (viii) Roving Breakages and Its Control.
- (ix) Recent Development in Roving Frame.
- (vii) Calculation pertaining to production, twist, draft and winding.

NOTE :

Question paper must contain at least 30% numerical problem.

INSTRUCTIONAL STRATEGY

Teacher should take theory lecture, demonstration of concepts and prototype

MEANS OF ASSESSMENT

- Assignments and quiz/class tests, mid-semester and end-semester written tests
- Actual practical work, exercises and viva-voce
- Presentation and viva-voce

RECOMMENDED BOOKS

1. Technology of Sort Staple Spinning by W.Klein
2. Principle of Spinning by A.R. Khare
3. Spun Yarn Technology by Carl A. Lawrence

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	16	30
2	20	35
3	20	35
Total	56	100

SPINNING TECHNOLOGY-I

List of Experiments

1. Calculate the draft constant, twist constant, spindle speed, front roller speed and production per spindle from machine particulars in the workshop.
2. To prepare sliver laps on the sliver lap machines and to gauge the rollers.
3. To calculate all tensions drafts, Intermediate drafts, Total draft, Draft constant and Production of sliver lap machine.
4. Operate the ribbon lap machine and prepare laps and gauge the rollers of the machine.
5. To calculate all tensions drafts, Intermediate drafts, total drafts, Draft constant and Production of ribbon lap machine.
6. To operate and set timing of comber and prepare sliver.
7. Set and gauge various parts of comber.
8. To calculate and analyze the comber waste percentage practically and evaluate the combing efficiency.
9. Operate the fly frame with material and practice the piecing of roving.
10. Set building motion and traverse motion according to hank of roving.
11. Calculate spindle speed, front roller speed and rate of traverse from machine particulars.
12. To Gauge the drafting rollers and to practice changing of draft change pinion (DCP), lifter change, change wheel, twist wheel, ratchet wheel and winding wheel.
13. Operate the drawing machine and to practice piecing of sliver.
14. Setting and gauging of drafting rollers for given staple length of fibres.
15. To lubricate and put the stop motion in proper working order of draw frame.
16. To calculate the speed of different moving parts of a draw frame machine
18. To calculate the production on draw frame per delivery per machine per shift of eight hours

4.6 WEAVING TECHNOLOGY - I

L T P
4 - 4

RATIONALE

Weaving is a vital activity in textile industry for fabric manufacturing. This paper Weaving Technology-I deals with the activities involves in different weaving motions.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1-To understand handloom weaving process
- 2-To understand the different primary, secondary and auxiliary motion
- 3- To calculate the loom production, weight of warp and weight of weft.
- 4- To calculate the average yarn count and resultant yarn count.

DETAILED CONTENTS

1. HANDLOOM WEAVING :

Its main features, Its uses. Difference in quality of product woven by Handloom and that by Powerloom. Special features of handloom woven fabrics. Description and working of Handloom machines showing all necessary parts and their working.

2. PLAIN LOOM

- (i) History of weaving.
- (ii) Terminology.
- (iii) Power loom - primary, Secondary and auxiliary motions of plain tappet loom.

3. A. SHEDDING :

1. Different types of healds, reeds and shuttles.
2. Different types of sheds, their merits and demerits.
3. Tappet shedding mechanism and warp easing mechanism.
4. Introduction to various types of tappets.
5. Designing of negative shedding tappets.
6. Merits and demerits of tappet shedding.
7. Heald reversing motions.
8. Timing of shedding motions. Early and late shedding.
9. Commonly occurring faults in shedding mechanism their remedies.
10. Calculations pertaining of healds and reed.

B. PICKING AND BEATING UP

- (i) Introduction to various parts of motions and their setting/adjustments.

- (ii) Mechanism of over pick and under pick motions their merits and demerits - Methods of varying the intensity of picking in each case. Velocity of shuttle.
- (iii) Causes and remedies of shuttle flying and trapping.
- (iv) Remedies of early and late picking.
- (v) Beating up motion :Mechanism of beating motion. Eccentricity of sley.

C. TAKE-UP MOTIONS AND LET OFF MOTIONS

- (i) Various types of take up motions.
- (ii) Study of five and seven wheel intermittent positive take up motion and calculations.
- (iii) Continuous positive take up motion.
- (iv) Negative take up motion.
- (v) Let off motions:
 1. Various types of let off motions.
 2. Study of negative let off motions.
 3. Study of semi-positive & positive let off motion

4. WEFT STOP MOTIONS

- (i) Various types of weft stop motions.
- (ii) Study of side weft fork motions.
- (iii) Study of center weft fork motions.

5. WARP PROTECTORS

- A. (i) Study of loose reed motion.
- (ii) Study of fast reed motion.

B. OTHERS

- (i) Temples.- Types of Temples
- (ii) Shuttles guards.

6. CALCULATION

- (i) Calculation pertaining to resultant count, average count, moisture content, tape length. Crimp%
- (ii) Calculation of wt- of warp, weight of weft, wt/sq. yard etc.

INSTRUCTIONAL STRATEGY

Teacher should take theory lecture, demonstration of concepts and prototype

MEANS OF ASSESSMENT

- Assignments and quiz/class tests, mid-semester and end-semester written tests
- Actual practical work, exercises and viva-voce
- Presentation and viva-voce

RECOMMENDED BOOKS

1.Weaving: Machine, mechanism and Management by M.K. Talukdar

2.Principle Of Weaving by Mark&Rabinson

3.WeavingTechnology-I by NCUTE

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	8	5
2	8	10
3	16	50
4	8	10
5	8	10
6	8	15
Total	56	100

WEAVING TECHNOLOGY I

LIST OF EXPERIMENTS

1. Practice of beam gaiting.
2. Practice of fixing and tuning the whole loom to run for perfect weaving.
3. Prepare Sketch and study of cross Sectional View of Weaving Machine.
4. Prepare Sketch and study of positive and negative Shedding Motion
5. Prepare tappet of Plain, 2/1, 2/2 CAM
6. Prepare Sketch and study of Positive and negative CAM
7. Practice of mending broken ends after levelling the healds.
8. Prepare Sketch and study of Loose Reed and Fast Reed Motion
9. Prepare Sketch and study of side weft fork and centre weft fork motion
10. Study the Electrical Warp Stop Motion.
11. Sketching of Handloom and its operation.

4.6 ENERGY CONSERVATION

L T P
3 - 2

RATIONALE

The requirement of energy has increased manifold in last two decades due to rapid urbanization and growth in industrial/service sector. It has become a challenging task to meet ever increasing energy demands with limited conventional fuels and natural resources. Due to fast depletion of fossil fuels and a tremendous gap between supply and demand of energy, it is essential to adopt energy conservation techniques in almost every field like industries, commercial and residential sectors etc. Energy conservation has attained priority as it is regarded as an additional energy resource. Energy saved is energy produced. This course covers the concepts of energy management and its conservation. It gives the insight to energy conservation opportunities in general industry and details out energy audit methodology and energy audit instruments.

LEARNING OUTCOMES

After undergoing this subject, the students will be able to:

- define principles and objectives of energy management and energy audit.
- understand Energy Conservation Act 2001 and its features.
- understand various forms & elements of energy.
- identify electrical and thermal utilities. Understand their basic principle of operation and assess performance of various equipments.
- identify areas of energy conservation and adopt conservation methods in various systems.
- evaluate the techno economic feasibility of the energy conservation technique adopted.

DETAILED CONTENTS

1. Basics of Energy

- 1.1 Classification of energy- primary and secondary energy, commercial and non-commercial energy, non-renewable and renewable energy with special reference to solar energy, Capacity factor of solar and wind power generators.
- 1.2 Global fuel reserve
- 1.3 Energy scenario in India and state of U.P. Sector-wise energy consumption (domestic, industrial, agricultural and other sectors)
- 1.4 Impact of energy usage on climate

2. Energy Conservation and EC Act 2001

- 2.1 Introduction to energy management, energy conservation, energy efficiency and its need

- 2.2 Salient features of Energy Conservation Act 2001 & The Energy Conservation (Amendment) Act, 2010 and its importance. Prominent organizations at centre and state level responsible for its implementation.
 - 2.3 Standards and Labeling: Concept of star rating and its importance, Types of product available for star rating
3. Electrical Supply System and Motors
 - 3.1 Types of electrical supply system
 - 3.2 Single line diagram
 - 3.3 Losses in electrical power distribution system
 - 3.4 Understanding Electricity Bill: Transformers Tariff structure, Components of power (kW, kVA and kVAR) and power factor, improvement of power factor, Concept of sanctioned load, maximum demand, contract demand and monthly minimum charges (MMC)
 - 3.5 Transformers: Introduction, Losses in transformer, transformer Loading, Tips for energy savings in transformers
 - 3.6 Electric Motors
Types of motors, Losses in induction motors Features and characteristics of energy efficient motors, Estimation of motor loading, Variation in efficiency and power factor with loading, Tips for energy savings in motors
- 4 Energy Efficiency in Electrical Utilities
 - 4.1 Pumps: Introduction to pump and its applications, Efficient pumping system operation, Energy efficiency in agriculture pumps, Tips for energy saving in pumps
 - 4.2 Compressed Air System: Types of air compressor and its applications, Leakage test, Energy saving opportunities in compressors.
 - 4.3 Energy Conservation in HVAC and Refrigeration System: Introduction, Concept of Energy Efficiency Ratio (EER), Energy saving opportunities in Heating, Ventilation and Air Conditioning (HVAC) and Refrigeration Systems.
- 5 Lighting and DG Systems
 - 5.1 Lighting Systems: Basic definitions- Lux, lumen and efficacy, Types of different lamps and their features, Energy efficient practices in lighting
 - 5.2 DG Systems: Introduction, Energy efficiency opportunities in DG systems, Loading estimation
- 6 Energy Efficiency in Thermal Utilities
 - 6.1 Thermal Basics: Thermal energy, Energy content in fuels, Energy Units and its conversions in terms of Metric Tonne of Oil Equivalent (MTOE)

- 6.2 Energy Conservation in boilers and furnaces : Introduction and types of boilers, Energy performance assessment of boilers, Concept of stoichiometric air and excess air for combustion, Energy conservation in boilers and furnaces, Do's and Don'ts for efficient use of boilers and furnaces
- 6.2 Cooling Towers: Basic concept of cooling towers, Tips for energy savings in cooling towers
- 6.3 Efficient Steam Utilization
- 7. Energy Conservation Building Code (ECBC)
 - 7.1 ECBC and its salient features
 - 7.2 Tips for energy savings in buildings: New Buildings, Existing Buildings
- 8 Waste Heat Recovery and Co-Generation
 - 8.1 Concept, classification and benefits of waste heat recovery
 - 8.2 Concept and types of co-generation system
- 9 General Energy Saving Tips

Energy saving tips in:

 - 9.1 Lighting
 - 9.2 Room Air Conditioner
 - 9.3 Refrigerator
 - 9.4 Water Heater
 - 9.5 Computer
 - 9.6 Fan, Heater, Blower and Washing Machine
 - 9.7 Colour Television
 - 9.8 Water Pump
 - 9.9 Cooking
 - 9.10 Transport
- 10 Energy Audit
 - 10.1 Types and methodology
 - 10.2 Energy audit instruments
 - 10.3 Energy auditing reporting format

PRACTICAL EXERCISES

1. To conduct load survey and power consumption calculations of small building.
2. To check efficacy of different lamps by measuring power consumption and lumens using lux meter.

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

3. To measure energy efficiency ratio (EER) of an air conditioner.
4. To measure effect of valve throttling and variable frequency drive (VFD) on energy consumption by centrifugal pump.
5. To measure and calculate energy saving by arresting air leakages in compressor.
6. To measure the effect of blower speed on energy consumed by it.

STUDENT ACTIVITIES ON ENERGY CONSERVATION/ENERGY EFFICIENCY

- Presentations of Case Studies
- Debate competitions
- Poster competitions
- Industrial visits
- Visual Aids

INSTRUCTIONAL STRATEGY

Teachers are expected to lay considerable stress on understanding the basic concepts in energy conservation, principles and their applications. For this purpose, teachers are expected to give simple problems in the class room so as to develop necessary knowledge for comprehending the basic concepts and principles. As far as possible, the teaching of the subject must be supplemented by demonstrations and practical work in the laboratory. Visits to industries must be carried out. Expert from industry must be invited to deliver talks on energy conservation to students and faculty.

RECOMMENDED BOOKS

1. Guide book on General Aspects of Energy Management and Energy Audit by Bureau of Energy Efficiency, Government of India. Edition 2015
2. Guide book on Energy Efficiency in Electrical Utilities, by Bureau of Energy Efficiency, Government of India. Edition 2015
3. Guide book on Energy Efficiency in Thermal Utilities, by Bureau of Energy Efficiency, Government of India. Edition 2015
4. Handbook on Energy Audit & Environmental Management by Y P Abbi & Shashank Jain published by TERI. Latest Edition

FIFTH SEMESTER

5.1 INDUSTRIAL MANAGEMENT AND ENTREPRENEURSHIP DEVELOPMENT

L	T	P
5	-	-

RATIONALE

In the present day scenario, it has become imperative to impart entrepreneurship and management concepts to students so that a significant percentage of them can be directed towards setting up and managing their own small enterprises. It may be further added that an entrepreneurial mindset with managerial skills helps the student in the job market. This subject focuses on imparting the necessary competencies and skills of enterprise set up and its management.

LEARNING OUTCOMES

After undergoing this course, the students will be able to :

- Know about various schemes of assistance by entrepreneurial support agencies
- Conduct market survey
- Prepare project report
- Explain the principles of management including its functions in an organisation.
- Have insight into different types of organizations and their structures.
- Inculcate leadership qualities to motivate self and others.
- Manage human resources at the shop-floor
- Maintain and be a part of healthy work culture in an organisation.
- Use marketing skills for the benefit of the organization.
- Maintain books of accounts and take financial decisions.
- Undertake store management.
- Use modern concepts like TQM, JIT and CRM.

DETAILED CONTENTS

SECTION – A

ENTREPRENEURSHIP

1. Introduction (04 Periods)

1.1 Concept /Meaning and its need

1.2 Qualities and functions of entrepreneur and barriers in entrepreneurship

1.3 Sole proprietorship and partnership forms and other forms of business organisations

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

- 1.4 Schemes of assistance by entrepreneurial support agencies at National, State, District –level, organisation: NSIC, NRDC, DC, MSME, SIDBI, NABARD, NIESBUD, HARDICON Ltd., Commercial Banks, SFC's TCO, KVIB, DIC, Technology Business Incubators (TBI) and Science and Technology Entrepreneur Parks
2. Market Survey and Opportunity Identification/Ideation (04 Periods)
 - 2.1 Scanning of the business environment
 - 2.2 Salient features of National and Haryana State industrial policies and resultant business opportunities
 - 2.3 Types and conduct of market survey
 - 2.4 Assessment of demand and supply in potential areas of growth
 - 2.5 Identifying business opportunity
 - 2.6 Considerations in product selection
 - 2.7 Converting an idea into a business opportunity
3. Project report Preparation (06 Periods)
 - 3.1 Preliminary project report
 - 3.2 Detailed project report including technical, economic and market feasibility
 - 3.3 Common errors in project report preparations
 - 3.4 Exercises on preparation of project report
 - 3.5 Sample project report

SECTION –B

MANAGEMENT

4. Introduction to Management (06 Periods)
 - 4.1 Definitions and importance of management
 - 4.2 Functions of management: Importance and process of planning, organising, staffing, directing and controlling
 - 4.3 Principles of management (Henri Fayol, F.W. Taylor)
 - 4.4 Concept and structure of an organisation
 - 4.5 Types of industrial organisations and their advantages
 - 4.6 Line organisation, staff organisation
 - 4.7 Line and staff organisation
 - 4.8 Functional Organisation
5. Leadership and Motivation (08 Periods)

- 5.1 Leadership: Definition and Need, Qualities and functions of a leader, Manager Vs leader, Types of leadership, Case studies of great leaders
- 5.2 Motivation: Definition and characteristics, Importance of self motivation, Factors affecting motivation, Theories of motivation (Maslow, Herzberg, Douglas, McGregor)

6. Management Scope in Different Areas (14 Periods)
 - 6.1 Human Resource Management: Introduction and objective, Introduction to Man power planning, recruitment and selection, Introduction to performance appraisal methods
 - 6.2 Material and Store Management: Introduction functions, and objectives, ABC Analysis and EOQ
 - 6.3 Marketing and sales: Introduction, importance, and its functions, Physical distribution, Introduction to promotion mix, Sales promotion
 - 6.4 Financial Management: Introductions, importance and its functions, knowledge of income tax, sales tax, excise duty, custom duty, VAT, GST

7. Work Culture (08 Periods)
 - 7.1 Introduction and importance of Healthy Work Culture in organization
 - 7.2 Components of Culture
 - 7.3 Importance of attitude, values and behavior
 - 7.4 Behavioural Science – Individual and group behavior.
 - 7.5 Professional ethics – Concept and need of Professional Ethics and human values.

8. Basic of Accounting and Finance (10 Periods)
 - 8.1 Basic of Accounting: Meaning and definition of accounting, Double entry system of book keeping, Trading account, PLA account and balance sheet of a company
 - 8.2 Objectives of Financial Management: Profit Maximization v/s Wealth Maximization

9. Miscellaneous Topics (10 Periods)
 - 9.1 Total Quality Management (TQM): Statistical process control, Total employees Involvement, Just in time (JIT)
 - 9.2 Intellectual Property Right (IPR) : Introduction, definition and its importance, Infringement related to patents, copy right, trade mark

INSTRUCTIONAL STRATEGY

Some of the topics may be taught using question/answer, assignment, seminar or case study method. The teacher will discuss stories and case studies with students, which in turn will develop appropriate managerial and entrepreneurial qualities in the students. In addition, expert lecturers may also be arranged from outside experts and students may be taken to nearby industrial organisations on visit. Approach extracted reading and handouts may be provided.

MEANS OF ASSESSMENT

- Assignments and quiz/class tests
- Mid-term and end-term written tests
- Model/Prototype making.

RECOMMENDED BOOKS

1. A Handbook of Entrepreneurship, Edited by BS Rathore and Dr JS Saini; Aapga Publications, Panchkula (Haryana)
2. Entrepreneurship Development and Management by J.S.Narang; Dhanpat Rai & Sons, Delhi.
3. Entrepreneurship Development by CB Gupta and P Srinivasan, Sultan Chand and Sons, New Delhi
4. Handbook of Small Scale Industry by PM Bhandari
5. Entrepreneurship Development and Management by MK Garg
6. E-books/e-tools/relevant software to be used as recommended by AICTE/UBTE/NITTTR, Chandigarh.

Websites for Reference:

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	04	06
2	04	06
3	06	08
4	06	08
5	08	12
6	14	20
7	08	12
8	10	14
9	10	14
Total	70	100

5.2 SPINNING TECHNOLOGY-II

L	T	P
6	-	4

RATIONALE

Spinning is the vital process of the textile industry. Spinning Technology- II deals with the activities involved in the Yarn manufacturing in ring frame machine and post spinning operation.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1-To understand the various aspect of cotton spinning.
- 2-To understand the various aspect of Yarn Doubling
- 3- To understand the concept of Reeling
- 4- To Calculate production, Twist, TM in ring frame and doubling machine.

DETAILED CONTENTS

1. RING SPINNING:

- (i) Objects of ring frames, construction and functions of various parts of ring frames
Viz Rings, Spindles, Balloon Control Rings, Spacer, Aprons, Cots, Spindle tape, Rising and Falling Lappets.
- (ii) Traveller, Function of Traveller, Traveller type, size and No.
- (iii) Passage of material through ring frames.
- (iv) Twisting of Yarn, Effect of Twist, Twist terminology, Concept of twist multiplier, Factors affecting twist in spinning.
- (v) Principles of Roller drafting and Drafting systems e.g. Spring and, Pneumatic drafting and their advantages, break draft and its effect.
- (vi) Building motion, its objects construction and working, Types of builds (i) Warp (ii) Filling (iii) Combination
- (vii) Drive of ring frame, Different systems of Ring Frame drive like Group drive, Single Motor Drive, VPS (Variable Pitch Seath) and Dual Drive, Inverter drive.
- (viii) Causes of end breaks in ring frame.
- (ix) Limitation of Large Package Spinning.
- (x) System of waste collection at ring frames and different types of spinning wastes.

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

- (xi) Factor's responsible for less efficiency in spinning.
- (xii) Limitations of ring spinning
- (xiii) Yarn faults and their remedies.
- (xiv) Principle & Working of compact spinning.
- (xv) Recent developments in Ring Spinning.

RING FRAME CALCULATION:

- (i) Calculation of Draft twist, Production and efficiency for different counts of Yarns.
- (ii) Calculation of balancing machines used in spinning processes for various counts- Spin Plan.
- (iii) Concept of average mill count
- (iv) Traveller speed, traveller lag calculation.

2. DOUBLING:-

- (i) Object of ring doubling, doubling and its effects, dry and wet system of doubling. Detailed study of Ring Doubler and Two for One Twister - Basic principles, Machine geometry, Different types of T.F.O. twister. Production and efficiency calculation and Advantages over ring doubling.
- (ii) Fancy doubling Yarns, their objects and their production Viz. Ply Yarn, Tape Yarn, Core Yarn and Sewing Threads.
- (iii) Production of folded yarn, cord and tape yarn.
- (iv) Calculation of folded yarns.

3. REELING BUNDLING:

Object and terminology, Types of Reels, Construction and working of Reels, Different system of Reeling. Yarn bundling and bailings.

NOTE:

Question paper must contain at least 30% numerical problems.

INSTRUCTIONAL STRATEGY

Teacher should take theory lecture, demonstration of concepts and prototype

MEANS OF ASSESSMENT

- Assignments and quiz/class tests, mid-semester and end-semester written tests
- Actual practical work, exercises and viva-voce
- Presentation and viva-voce

RECOMMENDED BOOKS

1. Technology of Sort Staple Spinning by W.Klein
2. Principle of Spinning by A.R. Khare
3. Spun Yarn Technology by Carl A. Lawrence
4. Cotton Spinning Calculation and Yarn Cost by James Winterbottom

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	40	60
2	25	30
3	5	10
Total	70	100

SPINNING TECHNOLOGY-II

List of Experiments

1. To make cheeses on parallel winding machine and calculate drum speed and production.
2. Operate the doubling machine and produce folded yarn and to calculate twists constant, TPI, Spindle speed and production.
3. Make hanks of yarn on reeling machine by straight reeling method and cross reeling method
4. Make bundles of yarn on the bundling machine.
5. To Calculation twist constant and draft constant and production from machine particulars of ring frame.
6. Operate the machine and produce yarn.
7. Gauge the Spindle and Lappets.
8. To learn the changing the draft change pinon and twist wheel, traveller and ratchet wheel at ring frames and mount the spindle tape and set it for 'S' and 'Z' twist.
9. Set the building motion according to the count of yarn.
10. Set the top arm and gauge the top and bottom rollers.
11. Carry out the maintenance of ring frame practically.
12. To calculate spindle speed , Twist Constant, TPI & Production of ring doubler.
13. To learn about making spin plan, taking breaking study, snap study of idle spindles, labour allocation in Ring frame dept on assumption basis.
14. To study traveler speed & doff weight of Ring frame.
15. To Study The Ring Frame Breakges.

5.3 WEAVING TECHNOLOGY - II

L T P
6 - 4

RATIONALE

Weaving is a vital activity in textile industry. The paper Weaving Technology-II deals with the activities involved in the fabric Manufacturing of Dobby and Jacquard design.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1-To Understand the Various advanced shedding technique i.e. Dobby, Jacquard.
- 2-Prepare Dobby Lattice and Jacquard Card
- 3-To Understand various techniques of more than two colored weft insertion.
- 4- To Understand the Automation in Shuttle Weaving

DETAILED CONTENTS

1. DOBBIES :

- (i) Classification of dobbies.
- (ii) Study of single lift dobbie Keighley and Climax dobbies.
- (iii) Positive dobbies (any two dobbies).
- (iv) Timing and setting of dobbies.
- (v) Method of preparing dobbie lattice and Pattern cards
- (vi) Cross border dobbie.
- (vii) R. H. and L. H. dobbie, dobbie mounting, dwell of dobbie.
- (viii) working Principle of Staubli Electronics Dobby
- (ix) Commonly occurring faults and their remedies.
- (x) Calculation relating to production, efficiency yarn requirements, waste etc for looms.

2. MULTIPLE BOX MOTIONS

- (i) Introduction to multiple box motions.
- (ii) Kinds of multiple box motions.
- (iii) Study of Cow burn and Peck's box motion its card saving device, safety devices.

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

- (iv) Study of Knowle's box motion.
- (v) Study of pick at will box arrangement.
- (vi) Study of non skip and skip motions.
- (vii) Preparation of chain for given pattern of weft.
- (viii) Commonly occurring faults in boxes of the above mechanisms and their remedies.

3. JACQUARD:

- (i) Introduction to figure weaving.
- (ii) Kinds of jacquard.
- (iii) Single lift single cylinder jacquard
- (iv) Double lift single cylinder jacquard.
- (v) Double lift double cylinder jacquard.
- (vi) Cross border jacquard.
- (vii) Twilling jacquard.
- (viii) Sectional harness.
- (ix) Harness ties.
- (x) Card cutting, Piano card cutting machine and lacing of cards
- (xi) Repairing, adjustments and timing of the above machines.
- (xii) Functional principle of electronically controlled Double lift Jacquard Machine.
- (xiii) Commonly occurring faults in jacquard weaving and their remedies.

4. AUTOMATIC WEAVING:

- (i) Feeler, cutter and three pick try motion.
- (ii) Warp stop motion.
- (iii) Weft Fork motion.
- (vi) Pirn changing mechanism.
- (v) Shuttle protector.
- (vi) Shuttle changing mechanism.

INSTRUCTIONAL STRATEGY

Teacher should take theory lecture, demonstration of concepts and prototype

MEANS OF ASSESSMENT

- Assignments and quiz/class tests, mid-semester and end-semester written tests
- Actual practical work, exercises and viva-voce
- Presentation and viva-voce

RECOMMENDED BOOKS

1.Weaving: Machine, mechanism and Management by M.K. Talukdar

2.Principle Of Weaving by Mark&Rabinson

3.WeavingTechnology-II by NCUTE

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	15	30
2	15	30
3	15	30
4	11	10
Total	56	100

WEAVING TECHNOLOGY II

LIST OF EXPERIMENTS

1. Harness preparation of jacquard.
2. Sketching of cylinder & Knife movement of various types of jacquard.
3. Development of jacquard pattern and their execution after card cutting and card lacing.
4. Settings for feeler, battery, warp stop motion, let off motion and their sketches.
5. Timing and adjustment of dobby for giving connection of T lever, Arm and Eccentric provided on the shaft. Barrel setting.
6. Practice of preparing dobby lattice.
7. Finding and removing faults in dobby weaving.
8. Fixing and tuning of drop box motion.
9. Chain preparation for different weft plans of Drop Box.
10. Sketching of various parts of drop box motion

5.4 TEXTILE TESTING-II

(Common To Textile Chemistry)

L T P
4 2 4

RATIONALE

As the name implies this paper aims to develop in the incumbent the capability of testing the products and its components for desired results. Without it a product can never be claimed for any standard.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1- Understand the different dimension of fabric.
- 2- Learn the tensile testing concepts of textile.
- 3- Learn the basic Textile chemical testing.

DETAILED CONTENTS

1. FABRIC DIMENSIONS:

- i. Measurement of fabric thickness. Measurement of crimp by crimp tester.
- ii. Air permeability of fabrics, its measurement by air permeability tester.
- iii. Crease recovery of fabrics, factors effecting crease recovery, measurements of crease recovery by crease recovery tester.
- iv. Water repellency tests.
- v. Abrasion resistance test on fabric by Mortindale Abrasion Tester.

2. TENSILE TESTING OF TEXTILES:

- ii. Yarn strength testing, types of testing machines, single yarn strength testing and Lea strength testing.
- iii. Fabric strength testing by cut strip, grab strip and revealed strip methods.
- iv. Fabric tear testing by tongue tear, trapezoid tear test.
- v. Bursting strength testing by hydraulic strength tester.

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

3. TEXTILE CHEMICAL TESTING:

- i. estimation of blend composition (Nylon, Polyester, Acrylic, Polyethylene, Cotton, wool, silk).
 - ii. Colour fastness to light
 - i. Colour fastness to washing
 - ii. Colour fastness to rubbing
 - iii. Colour fastness to perspiration
 - iv. Colour fastness to chlorine
 - v. Water absorbency test

TEXTILE TESTING-II

LIST OF EXPERIMENT

1. Examine the bursting strength of a fabric by bursting strength tester.
2. Find out the relative abrasion properties of fabrics by Martindale abrasion tester.
3. Find the breaking strength of different textile fabrics by means of cloth strength tester (power driven).
4. Measure crimp by Shirley crimp meter.
5. Find out air permeability of fabric by air permeability tester.
6. Measure crease recovery of fabric by crease recovery tester.
7. Test of pilling of fabrics by computerized pilling tester.
8. Estimation of final pH value of finished fabric.
9. Light fastness test
10. Washing fastness test
11. Rubbing fastness test
12. Perspiration fastness test
13. Absorbency test

INSTRUCTIONAL STRATEGY

Teacher should take theory lecture, demonstration of concepts and prototype

MEANS OF ASSESSMENT

- Assignments and quiz/class tests
- Mid-term and end-term written tests

RECOMMENDED BOOKS

TEXTILE TESTING – J.E.BOOTH
PHYSICAL TESTING OF TEXTILE – B.P SAVILLE

Websites for Reference:

www.nptel.ac.in

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	20	36
2	20	36
3	16	29
Total	56	100

5.5 INTRODUCTION TO TECHNICAL TEXTILE AND NON WOVEN TECHNOLOGY

L	T	P
6	-	-

RATIONALE

Technical textiles and Nonwoven fabrics are defined as textile materials and products used primarily for their technical performance and functional properties rather than their aesthetic or decorative characteristics. This course targets the specific areas of technical textiles depending on the product characteristics, functional requirements and end-use applications.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1-Able to understand the different types of woven, knitted & nonwoven fabric and its application area..
- 2- Understand the role of different kind of special fabrics.
- 3-Understand the use of textile in Medical, construction & industrial purpose.
- 4- Understand the manufacturing process of nonwoven and its application area.

Unit -1 :

Definition, classification, products, Fibres used in technical textiles, yarns and fabric structures in technical textiles and their relevant properties. Fibres used for technical textile - their characteristics and application areas

Unit -2 :

Manufacture and properties of protective textiles- water proof/coated and water repellent, antimicrobial, flame retardant, chemical resistance, Nuclear and biological resistance, mechanical resistance such as bullet proof, cut proof, stab proof

Unit -3:

Medical textiles, fibres used, classification of medical textiles- non-implantable material wound dressings, bandages, plasters, etc, Extra-corporal devices – Artificial kidney, liver lung, implantable material- suture, soft tissue implant, Orthopedic implants, Cardiovascular implants, Healthcare/ hygiene products, medical cost, surgical gown, face mast etc.

Unit- 4:

Automotive textiles: type cord, seat belt, air bag, seat upholstery, carpets, headliners, helmets etc, Agro textile: Shade net, green house film, Mulch net, crop cover, anti hail and bird protection net, finishing net etc.

Unit -5 :

Introduction of Geo textile, classification of geo textiles, functions of geo textiles oil reinforcement, drainage (fluid transmission), filtration, separation, erosion control/absorption, objective of geo textiles, manufacturing of geo textile, essential properties of geo textiles- Mechanical determinants, Hydraulic determinants, durability determinants.

Unit -6: Nonwovens: Overview of Nonwovens, Definition of Nonwoven, Classification of Nonwoven. Steps of making nonwoven. ii) Polymer based Technology : Meltblown, Spunbond, SMS iii) Staple fibre based Technology: a) Formation of Web: Carding, Air laid, Randoweb, Wet laid b) Bonding Technique: Mechanical (needle punching, Stitch bonding), Thermal bonding, Chemical Bonding, Water jet Bonding (SPUNLACE), Application area of Nonwoven

INSTRUCTIONAL STRATEGY

Teacher should take theory lecture, demonstration of concepts and prototype

MEANS OF ASSESSMENT

- Assignments and quiz/class tests
- Mid-term and end-term written tests

RECOMMENDED BOOKS

- **Hand book on technical textile**(Wood head publishing series in textile),[A R Horrocks](#)(Editor), [Subhash C. Anand](#)(Editor)
- **High performance technical textile by roshan Paul**
- Nonwoven Fabrics: Raw Materials, Manufacture, Applications, Characteristics, Testing Processes Edited by W. Albrecht, H. Fuchs, W. Kittelmann
- Handook of Nonwoven Edited by S.J. Russell

Total	84	100

5.6 UNIVERSAL HUMAN VALUES

L T P
2 - 1

COURSE OBJECTIVES

This introductory course input is intended

- 1 To help the students appreciate the essential complementarity between 'VALUES' and 'SKILLS' to ensure sustained happiness and prosperity, which are the core aspirations of all human beings
- 2 To facilitate the development of a Holistic perspective among students towards life and profession as well as towards happiness and prosperity based on a correct understanding of the Human reality and the rest of Existence. Such a holistic perspective forms the basis of Universal Human Values and movement towards value-based living in a natural way
- 3 To highlight plausible implications of such a Holistic understanding in terms of ethical human conduct, trustful and mutually fulfilling human behavior and mutually enriching interaction with Nature

Thus, this course is intended to provide a much-needed orientational input in value education to the young enquiring minds.

COURSE METHODOLOGY

1. The methodology of this course is explorational and thus universally adaptable. It involves a systematic and rational study of the human being vis-à-vis the rest of existence.
2. It is free from any dogma or value prescriptions.
3. It is a process of self-investigation and self-exploration, and not of giving sermons. Whatever is found as truth or reality is stated as a proposal and the students are facilitated to verify it in their own right, based on their Natural Acceptance and subsequent Experiential Validation.
4. This process of self-exploration takes the form of a dialogue between the teacher and the students to begin with, and then to continue within the student leading to continuous self-evolution.
5. This self-exploration also enables them to critically evaluate their pre-conditionings and present beliefs.

The syllabus for the lectures is given below:

- After every two lectures of one hour each, there is one hour practice session.
- The assessment for this subject is as follows:
- Sessions Marks (Internal): 20
- Practical Marks (External): 30
- Total Marks: 50

**UNIT 1: Course Introduction - Need, Basic Guidelines, Content and Process for Value Education
(8 Periods)**

1. Understanding the need, basic guidelines, content and process for Value Education
2. Self-Exploration–what is it? - its content and process; ‘Natural Acceptance’ and
3. Experiential Validation- as the mechanism for self-exploration
4. Continuous Happiness and Prosperity- A look at basic Human Aspirations
5. Right understanding, Relationship and Physical Facilities- the basic requirements for fulfillment of aspirations of every human being with their correct priority
6. Understanding Happiness and Prosperity correctly- A critical appraisal of the current scenario
7. Method to fulfill the above human aspirations: understanding and living in harmony at various levels

UNIT 2: Understanding Harmony in the Human Being - Harmony in Myself!(8 Periods)

1. Understanding human being as a co-existence of the sentient ‘I’ and the material the Body’
2. Understanding the needs of Self (‘I’) and ‘Body’ - Sukh and Suvidha
3. Understanding the Body as an instrument of ‘I’ (I being the doer, seer and enjoyer)
4. Understanding the characteristics and activities of ‘I’ and harmony in ‘I’
5. Understanding the harmony of I with the Body: Sanyam and Swasthya; correct appraisal of Physical needs, meaning of Prosperity in detail
6. Programs to ensure Sanyam and Swasthya
-Practice Exercises and Case Studies will be taken up in Practice Sessions.

UNIT 3: Understanding Harmony in the Family and Society- Harmony in Human-Human Relationship (8 Periods)

1. Understanding Harmony in the family – the basic unit of human interaction
2. Understanding values in human-human relationship; meaning of Nyaya and program for its fulfillment to ensure Ubhay-tripti;
 - a. Trust (Vishwas) and Respect (Samman) as the foundational values of relationship
3. Understanding the meaning of Vishwas; Difference between intention and competence
4. Understanding the meaning of Samman, Difference between respect and differentiation; the other salient values in relationship
5. Understanding the harmony in the society (society being an extension of family): Samadhan, Samridhi, Abhay, Sah-astitva as comprehensive Human Goals
6. Visualizing a universal harmonious order in society- Undivided Society (AkhandSamaj), Universal Order (SarvabhaumVyawastha)- from family to world family!
 - a. -Practice Exercises and Case Studies will be taken up in Practice Sessions.

UNIT 4: Understanding Harmony in the Nature and Existence - Whole existence as Co-existence (8 Periods)

1. Understanding the harmony in the Nature
2. Interconnectedness and mutual fulfillment among the four orders of nature-recyclability and self-regulation in nature

3. Understanding Existence as Co-existence (Sah-astitva) of mutually interacting units in all-pervasive space
4. Holistic perception of harmony at all levels of existence
-Practice Exercises and Case Studies will be taken up in Practice Sessions.

**UNIT 5: Implications of the above Holistic Understanding of Harmony on Professional Ethics
(10 Periods)**

1. Natural acceptance of human values
2. Definitiveness of Ethical Human Conduct
3. Basis for Humanistic Education, Humanistic Constitution and Humanistic Universal Order
4. Competence in professional ethics:
 - a. Ability to utilize the professional competence for augmenting universal human order
 - b. Ability to identify the scope and characteristics of people-friendly and eco-friendly production systems,
 - c. Ability to identify and develop appropriate technologies and management patterns for above production systems.
5. Case studies of typical holistic technologies, management models and production
 - a. systems
6. Strategy for transition from the present state to Universal Human Order:
7. At the level of individual: as socially and ecologically responsible engineers, technologists and managers
8. At the level of society: as mutually enriching institutions and organizations
9. To inculcate Human Values among Students: The Role of self ,Parents and Teachers
10. -Practice Exercises and Case Studies will be taken up in Practice Sessions.

Practical Session also Includes Different Yogic Exercises and Meditation Session

INSTRUCTIONAL STRATEGY

The content of this course is to be taught on conceptual basis with plenty of real world examples.

MEANS OF ASSESSMENT

- Assignments and quiz/class tests,
- Mid-term and end-term written tests
- Practical assessment

REFERENCE MATERIAL

The primary resource material for teaching this course consists of

1. The text book (Latest Edition)
Gaur, R Asthana, G P Bagaria, A foundation course in Human Values and professional Ethics, Excel books, New Delhi.
2. The teacher's manual (Latest Edition)
Gaur, R Asthana, G P Bagaria, A foundation course in Human Values and professional Ethics – Teachers Manual, Excel books, New Delhi.
3. In addition, the following reference books may be found useful for supplementary reading in connection with different parts of the course:

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

SUGGESTED DISTRIBUTION OF MARKS

Unit	Time Allotted (Periods)	Marks Allotted (%)
1	8	20
2	8	20
3	8	20
4	8	20
5	10	20
Total	42	100

5.7 INDUSTRIAL TRAINING (4 Week)

Viva Voce	100
Sessional Marks	40

Total	140

PROPOSED GUIDE FOR STUDENTS TO PREPARE THEIR INDUSTRIAL VISIT REPORT

1. Name & Address of the unit
2. Date of
 - i. Joining.
 - ii. Leaving.
3. Nature of Industry
 - i. Product & Capacity.
 - ii. Services.
 - iii. Working Hrs.
4. Sections of the unit visited and activities there in.
5. Details of machines/Tools & instruments used in working in the section of the unit visited and its layout.
6. Work procedure in the section visited.
7. Specifications of the product of the section and materials used.
8. Work of repair and maintenance cell.
9. Details of the shops (welding, Foundry, Machines shop etc) related to repair and maintenance work.
10. Name of checking and Inspecting Instruments and their details. Quality controls measures taken.
11. Details of hadraulics/pneumatic/thermal units or appliances used. Material Handling Equipment's.
12. Discription of any breakdown and its restoring.
13. Use of computer - if any.

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

14. Visit of units store, Manner of keeping store items, Their receiving & distribution.
15. Safety measures on work place & working conditions in general - comfortable, convenient & hygienic.

TRAINEES ASSESSMENT

The Institute invites the comments on the work & behavior of student during his stay in the industry from his immediate supervisors on the following points.

1. Name of the trainee
2. Date of
 - i. Joining.
 - ii. Leaving.
3.
 - i. Regularity & Punctuality
 - ii. Sense of responsibility
 - iii. Readiness to work/learn
 - iv. Obedience
 - v. Skill acquired
4. Name of the sections of the unit he attended during his stay. His activities/worth of being there.
5. Any thing specific

Signature of the Assessor

Date :-Designation

SIX SEMESTER

6.1 ENVIRONMENTAL STUDIES

L T P
3 - 2

RATIONALE

A diploma holder must have knowledge of different types of pollution caused due to industries and constructional activities so that he may help in balancing the ecosystem and controlling pollution by various control measures. He should also be aware of environmental laws related to the control of pollution. He should know how to manage the waste. Energy conservation is the need of hour. He should know the concept of energy management and its conservation.

LEARNING OUTCOMES

After undergoing the subject, the student will be able to:

- Comprehend the importance of ecosystem and sustainable
- Demonstrate interdisciplinary nature of environmental issues
- Identify different types of environmental pollution and control measures.
- Take corrective measures for the abatement of pollution.
- Explain environmental legislation acts.
- Define energy management, energy conservation and energy efficiency
- Demonstrate positive attitude towards judicious use of energy and environmental protection
- Practice energy efficient techniques in day-to-day life and industrial processes.
- Adopt cleaner productive technologies
- Identify the role of non-conventional energy resources in environmental protection.
- Analyze the impact of human activities on the environment

DETAILED CONTENTS

1. Introduction (04 Periods)
 - 1.1 Basics of ecology, eco system- concept, and sustainable development, Resources renewable and non renewable.
2. Air Pollution (04 Periods)
 - 2.1 Source of air pollution. Effect of air pollution on human health, economy, plant, animals. Air pollution control methods.
3. Water Pollution (08 Periods)
 - 3.1 Impurities in water, Cause of water pollution, Source of water pollution. Effect of water pollution on human health, Concept of dissolved O₂, BOD, COD. Prevention

of water pollution- Water treatment processes, Sewage treatment. Water quality standard.

4. Soil Pollution (06 Periods)

4.1 Sources of soil pollution

4.2 Types of Solid waste- House hold, Hospital, From Agriculture, Biomedical, Animal and human, excreta, sediments and E-waste

4.3 Effect of Solid waste

4.4 Disposal of Solid Waste- Solid Waste Management

5. Noise pollution (06 Periods)

Source of noise pollution, Unit of noise, Effect of noise pollution, Acceptable noise level, Different method of minimize noise pollution.

6. Environmental Legislation (08 Periods)

Introduction to Water (Prevention and Control of Pollution) Act 1974, Introduction to Air (Prevention and Control of Pollution) Act 1981 and Environmental Protection Act 1986, Role and Function of State Pollution Control Board and National Green Tribunal (NGT), Environmental Impact Assessment (EIA).

7. Impact of Energy Usage on Environment (06 Periods)

Global Warming, Green House Effect, Depletion of Ozone Layer, Acid Rain. Eco-friendly Material, Recycling of Material, Concept of Green Buildings.

LIST OF PRACTICALS

1. Determination of pH of drinking water
2. Determination of TDS in drinking water
3. Determination of TSS in drinking water
4. Determination of hardness in drinking water
5. Determination of oil & grease in drinking water
6. Determination of alkalinity in drinking water
7. Determination of acidity in drinking water
8. Determination of organic/inorganic solid in drinking water
9. Determination of pH of soil
10. Determination of N&P (Nitrogen & Phosphorus) of soil
11. To measure the noise level in classroom and industry.
12. To segregate the various types of solid waste in a locality.
13. To study the waste management plan of different solid waste
14. To study the effect of melting of floating ice in water due to global warming

INSTRUCTIONAL STRATEGY

In addition to theoretical instructions, different activities pertaining to Environmental Studies like expert lectures, seminars, visits to green house, effluent treatment plant of any industry, rain water harvesting plant etc. may also be organized.

MEANS OF ASSESSMENT

- Assignments and quiz/class tests,
- Mid-term and end-term written tests

RECOMMENDED BOOKS

1. Environmental and Pollution Awareness by Sharma BR; Satya Prakashan, New Delhi.
2. Environmental Protection Law and Policy in India by Thakur Kailash; Deep and Deep Publications, New Delhi.
3. Environmental Pollution by Dr. RK Khitoliya; S Chand Publishing, New Delhi
4. Environmental Science by Deswal and Deswal; Dhanpat Rai and Co. (P) Ltd. Delhi.
5. Engineering Chemistry by Jain and Jain; Dhanpat Rai and Co. (P) Ltd. Delhi.
6. Environmental Studies by Erach Bharucha; University Press (India) Private Ltd., Hyderabad.
7. Environmental Engineering and Management by Suresh K Dhamija; S K Kataria and Sons, New Delhi.
8. E-books/e-tools/relevant software to be used as recommended by AICTE/UBTE/NITTTR, Chandigarh.

1	04	10
2	04	10
3	08	20
4	06	14
5	06	14
6	08	20
7	06	12
Total	42	100

6.2 ADVANCE FABRIC STRUCTURE

L T P
6 2 -

RATIONALE

The paper deals with more complicated structures of Woven fabrics. This knowledge is essential for modern textile technologists to sustain in the competition of recent market trends.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1- Construct the advanced design on graph paper.
- 2- Understand the manufacturing technique of the advanced design in weaving machine
- 3- Identify the Application Area of the advanced design.
- 4- Differentiate between basic weave and advanced weave.

DETAILED CONTENTS

1. WELTS AND PIQUES:

Varieties and characteristics of piques and welts, methods of embellishing pique fabrics, their structure, plain pique, backed pique, fast backed welts and waved pique.

2. BED FORD CORDS:

Plain faced bedford, wadded bedford cord, bedford cord arranged with alternate picks and cords containing odd number of ends. twill-faced bedford cord.

3. BACKED FABRICS (WARP AND WEFT):

Backed fabrics, wadded warp and weft backed fabrics, their beaming and drafting procedure.

4. EXTRA WARP AND WEFT:

Principles of figuring with extra warp and weft one and one i.e. pick and pick wefting, two and two wefting. Methods of disposing of extra threads on the back of the fabric. Spot figures with extra warp and extra weft arranged in a particular order.

5. DOUBLE CLOTH:

Construction of double and multiple cloths on design paper, their beaming, drafting and pegging. Double Cloth according to types of stitching. Types of double structures viz.

(i) Tubular Fabrics.

(ii) Double-faced Fabrics.

With wadded thread in both warp and weft direction.

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

(iii) Fabrics opening to double the width.

(iv) Centre stitched double cloth.

A. Centre Warp Stitched

B. Centre Weft Stitched

6. GAUZE AND LENO FABRICS:

Structure of gauze and leno fabrics, bottom and top douping. Different types of sheds formed in gauge and leno fabrics, comparison of gauge and leno. Combination of gauge and other weaves, striped patterns.

7. TURKISH TOWELLING:

Principles of formation of pile, construction of three, four, five and six pick terry fabrics their methods of drafting and denting. Terry ornamentation.

8. 3D WOVEN STRUCTURE:

Structure and principle of formation of (i) Solid 3D Structure (Angle Interlock, Orthogonal), (ii) Hollow 3D Structure

9. PILE FABRICS:

Classification of Pile Fabric. Designing of plain warp pile fabrics in detail. reversible warp pile structure and double plush weaving. Weft pile fabrics, twill back velveteens, Corduroy fabrics, weft plushes. Varieties of suiting fabrics.

10. LAPPET AND SWIVEL WEAVING:

Introduction Only

11. CAD in Textiles : Introduction only

INSTRUCTIONAL STRATEGY

Teacher should take theory lecture, demonstration of concepts and prototype

MEANS OF ASSESSMENT

- Assignments and quiz/class tests, mid-semester and end-semester written tests
- Actual practical work, exercises and viva-voce
- Presentation and viva-voce

RECOMMENDED BOOKS

1. Fabric Structure and Design by N. Gokarveshan
2. Watson's textile design & colour by Z.J. Grosicki.

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

3. Woven fabric structure design and product planning by Dr. J. Hayavadana
4. Mastering weaves structure- Sharon Alderman-Inter weave Press
5. Advanced Textile Design by Watson
- 6. Woven Textile Tructure by B. K. Behera and P. K. Hari**
- 7. Advances in 3D Textiles by Xiaogang Chen**
- 8. Practical Approach to 3D Weaving**

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)

11	2	4
Total	84	100

6.3 PROCESS CONTROL IN SPINNING AND ADVANCE SPINNING

L T P
6 2 -

RATIONALE

Controls of activities in any process is an essential part of manufacturing process. This paper deals with process control in Spinning and Advance Yarn Manufacturing Process.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1-Understand the different process parameter in all spinning machine in yarn manufacturing
- 2-Understand the modern spinning technique i.e. open end spinning,
- 3-Understand the concept of texturing and various texturing technique.
- 4-Differentiate between woolen, worsted and semi worsted spinning system.

DETAILED CONTENTS

(1) PROCESS CONTROL IN SPINNING:

1. Control of mixing quality and cost, waste and cleaning in blow room and carding, comber waste, yarn realization.
2. Measurements and analysis of productivity, of different M/c.
3. Control of yarn count, strength, evenness and imperfections, statistical interpretation of data.
4. Breakage and efficiency studies and their analysis.

(2) ADVANCE SPINNING:

- (i) Open end spinning, Different styles of open end spinning such as Rotor spinning, Airjet spinning, Friction spinning(Dref-II and Dref-III)Air vortex spinning, Electrostatic spinning, Mule Spinning, Wrap Spinning, Siro Spinning, Core Spun Spinning.
- (ii) Brief study of different processes involved in woolen, semi worsted and worsted spinning Properties woolen , semi worsted and worsted yarns.
- (iii) Tow To Top conversion processes- Stretch breaking and cutting methods. Tow characteristics, Different methods of tow to yarn conversion.
- (iv) Principle of texturing, its importance and application, Method of texturing, Heat setting and texturing, False twisting, Development of false twisting machines, Stuffer box crimping.

Principle of draw texturizing machines involved e.g. Draw twister for texturized yarn, Draw winder, Cone winder. Edge crimping, Principle of air bulking and properties of air textured yarns. Effect of process variable on textured yarn quality.

INSTRUCTIONAL STRATEGY

Teacher should take theory lecture, demonstration of concepts and prototype

MEANS OF ASSESSMENT

- Assignments and quiz/class tests, mid-semester and end-semester written tests
- Actual practical work, exercises and viva-voce
- Presentation and viva-voce

RECOMMENDED BOOKS

1. Technology of Short Staple Spinning by W.Klein
2. Principle of Spinning by A.R. Khare
3. Spun Yarn Technology by Carl A. Lawrence
4. Cotton Spinning Calculation and Yarn Cost by James Winterbottom:

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	40	40
2	44	60
Total	84	100

6.4 PROCESS CONTROL IN WEAVING AND ADVANCE WEAVING

L T P
6 2 -

RATIONALE

This paper deals with new developments in weaving processes basically in shuttle less weaving. In current time for high fabric production rate shuttle less weaving is necessary. To produce quality product ones should know about the process control in different stages of weaving.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1- Understand different process parameters in weaving to control the production and quality of fabric
- 2-Understand the working mechanism of Shuttle less loom i.e. Projectile, Rapier, Jet loom
- 3-Understand the multiphase loom.
- 4-Understand the Application area of Technical Textile.

DETAILED CONTENTS

(1) PROCESS CONTROL IN WEAVING:

1. Measurement and control of quality and productivity and waste in winding, warping, sizing, drawing-in and weaving.
2. Common faults in weaving and their analysis and remedies.
3. Breakage and efficiency studies and their analysis and their improvement.

(2) ADVANCE WEAVING:

(i) Basic Principle of unconventional shuttleless loom- Drawbacks of Conventional Shuttle Loom, advantages of shuttle less loom, Types of shuttle less loom.

(ii) Formation of Unconventional Selvedges– Tucked-in, Leno, Fused, chain Stithced.

(iii) Projectile weft Insertion System- Weft Insertion cycle, Picking Mechanism(Torsion Bar), Beat-up Mechanism, Merits of Projectile weft insertion system.

(iv) Rapier/Gripper Weft Insertion System- Classification of Rapier, weft Insertion Cycle- Gabler and Dewas, Details Construction of Rapier Head, Rapier Driving Mechanism. Merits of Rapier weft insertion system.

(v) Airjet weft insertion System – Parts of Weft insertion System, Weft Insertion cycle, Air quality, Types of nozzles, Construction of Main and Relay Nozzles, Merits of Airjet weft insertion system.

(vi) Water Jet weft Insertion- Parts of weft insertion system, weft insertion cycle, quality of water. Merits of Water Jet weft insertion system.

(vii) Basic Principles of multi-phase weaving- Classification, Details of warp way and weft way multiphase weaving, circular weaving. Advantages of multiphase weaving machine.

INSTRUCTIONAL STRATEGY

Teacher should take theory lecture, demonstration of concepts and prototype

MEANS OF ASSESSMENT

- Assignments and quiz/class tests, mid-semester and end-semester written tests
- Actual practical work, exercises and viva-voce
- Presentation and viva-voce

RECOMMENDED BOOKS

1. Weaving: Machine, mechanism and Management by M.K. Talukdar

2. Principle Of Weaving by Mark & Robinson

3. Handbooks of Weaving by Sabit Adanur

SUGGESTED DISTRIBUTION OF MARKS

Topic No.	Time Allotted (Periods)	Marks Allotted (%)
1	40	40
2	44	60
Total	84	100

6.5 INTRODUCTION TO KNITTING AND GARMENT TECHNOLOGY (COMMON TO TEXTILE CHEMISTRY)

L T P
4 - 4

RATIONALE

This paper deals with new developments in knitting and garment technology. This knowledge is the need of the hour to pace with the time.

LEARNING OUTCOMES

After undergoing the subject, the students will be able to:

- 1-To understand the basic concept of knitting
- 2-To understand concept of loop formation with help of needles
- 3-To understand garment making

DETAILED CONTENTS

1. KNITTING :

Introduction and general terms of knitting, Difference in woven and knitted fabrics, properties-knit Vs woven. Warp and weft knitting-mechanism and comparison.

2. LOOP FORMATION WITH NEEDLE :

Running position, clearing position, Feeding position, Knocking over positions, Knitting position.

3. KNITTING NEEDLES :

Beard, Latch, Compound type of knitting needles, Advantages and disadvantages of beard and latch type.

4. STITCHES :

Knit, tuck and floats and its comparison.

5. TYPES OF LOOPS :

Types of loops, Classification of weft knitted fabrics - single knit (single jersey), Double knit (double jersey), Factors responsible for production is weft knitting machine.

6. GARMENT CLASSIFICATION :

Garment classification for men and women. Fabric selection for garment and properties. Measurement and its importance, Methods of taking important body measurements for gents

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

and ladies garments.

7. PATTERNING AND GRADING :

Patterning, importance of paper patterns, Types of patterns, Study of pattern drafting, Identification of fitting problems and its remedy.

8. TYPES OF SLEEVES, COLLARS, POCKETS, ETC.

9. SPREADING, CUTTING AND SORTING :

Objectives of spreading, Methods of spreading, cutting and sorting.

10. SEWING TECHNOLOGY :

Classification of stitch, Types of seams sewing tools and part of sewing machine.

11. STITCHING DEFECTS & THEIR REMEDIES.

INTRODUCTION TO KNITTING AND GARMENT TECHNOLOGY (COMMON TO TEXTILE CHEMISTRY)

LIST OF PRACTICALS

1. Standard measurement for children.
2. Bodies block for
 - i. 3 Years child
 - ii. Grown up woman
 - iii. Grown up man
3. Application of the principle and technique of pattern making for design and construction of -
 - i. Blouse
 - ii. Ladies suit
 - iii. Gents shirts
 - iv. Pant.
4. Drafting of different types of sleeves and collars.
5. Study of construction and working of knitting machine Parts.

INSTRUCTIONAL STRATEGY

Student should be encouraged to participate in role play and other student centered activities in class room and actively participate in listening exercises

MEANS OF ASSESSMENT

- Assignments and quiz/class tests, mid-semester and end-semester written tests
- Actual practical work, exercises and viva-voce
- Presentation and viva-voce

RECOMMENDED BOOKS

1. Knitting Technology by Ajgaonkar
2. Fundamentals and advances in knitting technology by H C Ray
3. Garment manufacturing process practices and technology by Prasanta Sarkar

6.5 PROJECT

L T P
- - 8

Ten periods per week are allotted for project work in the final year of the course. In classroom students (i) be encouraged and helped for developing new designs in yarn/weave (ii) be given clear idea of establishing a spinning/weaving unit of given size beginning from selection of site, deciding type of building construction/shed, units of machinery required, their layout. Fundamental requirements of spinning and weaving mill organization. Deciding number of workers and their type. Process control in spinning and weaving departments, elements of costing and costing procedures in various sections, Factors affecting productivity and efficiency of men and machines, sources of finance and development of resources. For general awareness students be introduced to organisations involved in certification, standardisation, research and development of textile products Viz. BIS, Centre Silk Board, Textile Committee, Textile Commission, Jute Commission, ATIRA, NITRA, BTRA, etc.

This will contain the problems to evaluate students learning.

It will contain two types of problems

- (i) relating to development of designs in yarn/weave and preparing their samples.
- (ii) relating to establishment of a spinning/weaving unit of given size.

The student will be allowed to choose one either kind of the problem to solve.

1. Examination Marks	100

RESOURCE REQUIREMENT

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

10.1 PHYSICAL RESOURCES

(A) Space requirement

Norms and standards laid down by All India Council for Technical Education (AICTE) are to be followed to work out space requirement in respect of class rooms, tutorial rooms, drawing halls, laboratories, space required for faculty, student amenities and residential area for staff and students.

(B) Equipment requirement:

Following Laboratories are required for Diploma Programme in Textile Technology

- Communication Laboratory
- Applied Physics Laboratory
- Applied Chemistry Laboratory
- Engineering Drawing
- General; Mechanical Engineering
- Basics of Information Technology/Computer Laboratory
- Carpentry Shop
- Painting and Polishing Shop
- Electrical Shop
- Smithy Shop
- Fitting and Plumbing Shop
- Sheet Metal Shop
- Welding Shop
- Foundry Shop
- Machine Shop
- Spinning Preparation Laboratory
- Weaving Preparation Laboratory
- Textile Testing Laboratory
- Spinning Technology Laboratory
- Weaving Technology Laboratory
- Introduction to Knitting and Garment Laboratory
- Environmental Engineering Lab
- Energy Conservation Lab

EQUIPMENT REQUIREMENT FOR TEXTILE TECHNOLOGY

Sr. No.	Description	Qty	Total Price (Rs)
COMMUNICATION LABORATORY			
1.	Stools	40	10,000
2.	Display Board/Screen	2	6,000
3.	Sound recording and playing system	1	6,000
4.	Audio cassettes	60	2,000
5.	Overhead Projector	1	5,000
6.	Transparencies slides	100	500
7.	TV, VCR and camera for video recording	1 each	20,000
8.	English spoken course	1	2,000
9.	A Quiz room equipped with two way audio system, back projection system and slide projector	1	30,000
10.	Miscellaneous	LS	1,500
APPLIED PHYSICS LABORATORY			
1.	Vernier calipers Working length 160 mm, Internal and external dia with locking arrangement	12	2,000
2.	Screw Gauges Working length 15 mm, pitch 0.5 mm, least count .005 mm	12	2,000
3.	Spherometers Distance between legs 2.5 mm, pitch 0.5 mm, least count .005 mm.	12	2,000
4.	Mirrors (convex, concave)	5 Each	1,500
5.	Pendulum Setup	02	4,000
6.	Gravesand's Apparatus	02	3,000
7.	Inclined Plane Setup	02	2,000
8.	Flywheel Setup	02	4,000
9.	Prism	05	1,500
10.	Spectrometer	02	25,000
11.	DC Ammeters Moving coil weston-type ammeter with ebonite stand	10	3,500
12.	DC Miliammeters	2	1,000
13.	DC Microammeters	2	700
14.	DC voltmeters	10	700
15.	DC Millivoltmeters	10	2,000
16.	Sensitivity Galvanometer	2	800
17.	Student Galvanometers	10	4,000
18.	Demonstration type DC Ammeters Range; 0 to 1 Amp.	2	1,000
19.	D type DC Voltmeter Range : 0 to 1 Volt	2	1,000

Sr. No.	Description	Qty	Total Price (Rs)
20.	D type Galvanometers Sensitivity : 20 microamperes per scale division,	8	8,000
21.	Resistance boxes (dial type) assorted	8	8,000
22.	Rheostats	10	4,000
23.	Miscellaneous items (Spring, Pan, Glycerine, Optic fibre, Ferromagnetic material)	LS	2,000
24.	Fortin's Barometer (Wall type)	2	20,000
25.	Stoke's Apparatus	2	10,000
26.	Gumther's Apparatus	2	16,000
27.	Resonance Tube Apparatus with accessories and Tuning fork set	2	14,000
28.	Sodium Lamp setup with Biprism	2	10,000
29.	Ohmic resistance coil	10	5,00
30.	Slide wire bridge	2	8,000
31.	PN Junction diode Apparatus	2	10,000
32.	Laser (as per requirement)	1	1,00,000
33.	Numerical aperture setup	1	25,000
34.	Miscellaneous	LS	3,000

APPLIED CHEMISTRY LABORATORY

1.	Digital Balance	1	80,000
2.	Burette 50ml	30	3,000
3.	Pipette 25ml	60	4,000
4.	Beakers 100ml	60	4,000
5.	Burette stand	30	30,000
6.	Glazed tile	30	1,000
7.	Conical flask 50ml (Titration flask)	60	4,000
8.	Standard (Measuring) flask (to prepare standard solution) 250ml/100ml	30	6,000
9.	Able's Flash Point apparatus	2	10,000
10.	(1/10)°C thermometer	06	6,000
11.	Candles	20	100
12.	Crucible with lid	06	2,000

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

13.	Muffle furnace	1	18,000
14.	Decicators	06	8,000
15.	Pair of tongue (small and big)	24 (small) 2 (big)	2,000
Sr. No.	Description	Qty	Total Price (Rs)
16.	Chemicals - EDTA-1 kg - Eriochrome Black-T(solochrome black T)-200g - Buffer solution (NH ₃ - 2.5 ltr, NH ₄ Cl – 1 kg) - Zinc sulphate- 500g - H ₂ SO ₄ - 2.5 ltr - Phenolphthalein indicator (as per requirement) - Methyl orange indicator (as per requirement) - Charcoal (as per requirement) - Kerosene- 1 ltr	LS	20,000
17.	Miscellaneous	LS	2,000
ENGINEERING DRAWING			
1.	Drawing Boards (700 x 500mm)	60	25,000
2.	Draughtsman Tables	60	1,80,000
3.	Draughtsman Stools	60	40,000
4.	Computer Aided Drawing (CAD) Software	30 User	5,00,000
5.	Model of different wooder joints	1	1,000
6.	Model of different screw threads	1	1,000
7.	Model of various locking devices	1	1,000
8.	Model of various joints	1	1,000
9.	Cut section Model of various couplings	1	3,000
10.	Miscellaneous	LS	5,000
APPLIED MECHANICS LABORATORY			
1.	Polygon law of forces apparatus	1	2,000
2.	Jib crane	1	4,000
3.	Apparatus for reaction at supports	1	5,000
4.	Inclined plane and friction apparatus	1	2,500
5.	Screw jack	1	1,000
6.	Worm and worm wheel	1	3,500
7.	Single Purchase Winch Crab	1	4,000
8.	Miscellaneous	LS	1,000
BASICS OF IT LABORATORY/COMPUTER LABORATORY			
1.	Computer System with latest configuration	30	8,00,000
2.	Printer (MFP)	1	25,000
3.	Printer (Laser)	1	35,000
4.	Plotter	1	75,000

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

5.	Digitiser	1	50,000
6.	Antivirus Software	LS	10,000
Sr. No.	Description	Qty	Total Price (Rs)
7.	Internet Facility on Computers	LS	2,00,000
8.	AutoCAD/Solid Works/Unigraphics/Pro-C (any one software)	30 user	5,00, 000
9.	LCD Projector	1	35,000
10.	UPS	60	1,20,000
11.	Software (latest windows, latest MS Office)	1	1,00,000
12.	Scanner	1	10,000
13.	Miscellaneous	LS	5,000
CARPENTRY SHOP			
1	Work benches fitted with carpenter vices	5	20,000
2.	Circular saw grinder	1	6,000
3.	Wood cutting band saw-vertical	1	10,000
4.	Bench grinder	1	5,000
5.	Drilling machine	1	8,000
6.	Wood turning lathe	1	40,000
7.	Wood Planner	1	20,000
8.	Tool accessories measuring and marking Instruments	25	25,000
9.	Band saw blade brazing unit	1	10,000
10.	Miscellaneous	LS	1,500
PAINTING AND POLISHING SHOP			
1.	Spray gun with hose pipe	1	1,000
2.	Paint brushes	20	2,000
3.	Paint/Varnish	LS	2,000
4.	Air Compressor with 2 hp motor	1 set	10,000
5.	Miscellaneous	LS	2,000
ELECTRICAL SHOP			
1.	Tool kit (Plier, Srew driver, Knife, Steel rule, hammer, sciber, pincer steel tape etc.)	20	20,000
2.	Fuses, Switches, Plugs, Sockets, Ceiling rose, Wires, cleats, Clamps, Test lamp, Tester.(as per requirement)		8,000
3.	Electric Iron	1	1,500
4.	Electric kettle	1	1,500
5.	Ceiling fan/table fan	1	2,500
6.	Desert cooler	1	5,000
7.	Lead acid battery	2	8,000
8.	Battery Charger	1	6,000

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

9.	Miscellaneous		3,000
----	---------------	--	-------

Sr. No.	Description	Qty	Total Price (Rs)
SMITHY SHOP			
1.	Black smithy forge (with open hearths, accessories to match the forge)	20	40,000
2.	Wrought iron anvils	20	20,000
3.	Swage blocks	4	8,000
4.	Blower with accessories, motor switch etc	1	6,000
5.	Work benches with vices	2	6,000
6.	Power hammer	1	20,000
7.	Tools and accessories – hammers, swages, tongs, pokers, pullers etc	20	10,000
8.	Miscellaneous	LS	1,500
FITTING AND PLUMBING SHOP			
1.	Work benches with vices (4 vices on each bench)	5	30,000
2.	Marking tables with scribes	4	24,000
3.	Surface plates	5	20,000
4.	Accessories like calipers, V blocks, height, gauges steel rules and scribes	25	50,000
5.	Tool kits – taps, dies, drills	25	40,000
6.	Tool kits – chisels, hammers, files, hacksaw	25	25,000
7.	Drilling machine	2	12,000
8.	Pipe vice	4	1,000
9.	Chain wrenches	5	1,250
10.	Ring spanner set	5	600
11.	Pipe die set 2"	2 set	1,000
12.	Pipe bending device	1	5,000
13.	Various plumbing fittings	LS	2,000
14.	Miscellaneous	LS	1,500
SHEET METAL			
1.	Hammers	8	3,000
2.	Mallets (Hard & Soft)	5	2,000
3.	Sheet and wire Ganges	LS	8,00

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

Sr. No.	Description	Qty	Total Price (Rs)
4.	Shearing Machine	1	20,000
5.	Bar folding Machine	1	20,000
6.	Burring machine	1	10,000
7.	Various sheet (black plain, galvanized iron, corrugated, Aluminium)	1 Each	1,000
8.	Hand Shears/Snippers	4	2,000
9.	Nuts, Bolts, Rivets, Screw	LS	5,00
10.	Miscellaneous	LS	1,000
WELDING SHOP			
1.	Electrical welding transformer set with accessories	3	30,000
2.	Gas Cutting Unit	1	3,000
3.	Work benches with vices	3	5,000
4.	Welding generator set	1	10,000
5.	Oxy acetylene welding set with accessories	1	7,000
6.	Acetylene generating set	1	6,000
7.	Electric welder tool kit	10	10,000
8.	Projection welding machine	1	15,000
9.	Brazing equipment with accessories	1	10,000
10.	Soldering irons	3	1,000
11.	Pedestal grinder	1	10,000
12.	Metal spraying gun	1	10,000
13.	Spot welder	1	25,000
14.	TIG welding set	1	1,00,000
15.	MIG welding set	1	1,00,000
16.	Welding Partition Screen	5	2,500
17.	Miscellaneous	LS	3,000

Sr. No.	Description	Qty	Total Price (Rs)
FOUNDRY SHOP			
1.	Moulding boxes	40	8,000
2.	Ladles	5	2,000
3.	Tool Kits	10 set	5,000
4.	Quenching tanks	2	5,000
5.	Portable grinder	1	3,000
6.	Pit furnace with blower	1	10,000
7.	Miscellaneous	LS	1,000
MACHINE SHOP			
1.	Centre lathes	10	6,00,000
2.	Grinder	1	10,000
3.	Universal milling machine	1	1,25,000
4.	Shaper	2	1,20,000
5.	Plainer	2	1,20,000
6.	Work bench	3	10,000
7.	Precision instruments	1	10,000
8.	Hand tools and accessories	2	8,000
9.	CNC trainer lathe	1	4,00,000
10.	Miscellaneous	LS	5,000
ENVIRONMENT ENGINEERING LABORATORY			
1.	pH Meter	01	500
2.	Turbidity Meter	01	5000
3.	Oven with Temperature Controller and Forced Air Circulation Type	01	20000
4.	B.O.D. Incubator	01	25000
5.	Water Analysis Kit	01	5000
6.	High Volume Sampler	01	40000

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

7.	Electrical Balance for weighing upto 1/10 of milligram (capacity)	01	1000
ENERGY CONSERVATION LABORATORY			
1	Clamp meter	02	5000
2	Multimeter	02	2000
3	Power Analyser	01	20000
4	Different types of lamps (LS) – 60 W lamp, 230 V , 100 V – 200 W lamp – 500 W lamp – 100 W lamp, 110 V, 150 V	10	500
5	Lux meter	02	5000
6	Centrifugal pump, 1 kW	1	15,000
7	Standard window A.C.	01	20000
8	Anemometer	02	5000
9	Thermometer	03	2000
10	Flow meter	02	10000
11	Pumping set with at least two pumps of different capacity.	1 set	10000
12	Pressure gauge fitted on discharge lines	1 set	2000
13	Variable Frequency Drive	02	50000
14	A small compressor with a small network of pipe line fitted with suitable pipeline, pressure gauge, safety valve and loading / unloading pressure switch.	1	3000
15	Stop watch	2	1000
16	Small blower (1.5 kW motor) with inlet and outlet ducts of approximately one meter length on both sides	1	10000

17	Black Box (for checking lamp efficacy including stand and luxmeter)	1	25000
----	---	---	-------

GENERAL MECHANICAL ENGINEERING LAB

S.No.	Name of Equipment	No.	@ Rs.	Amt.in Rs.
1.	Biogas Plant	1		
2.	Windmill	1		
3.	Experimental Solar Cooker Box Type Instrumented To Measure Temperature its Performance & Temperature At Various Location.	1	500	500
4.	Photo Voltage Solar Cell	1	10000	10000
5.	Throttling & Separating Colorimeter. (Thermal Engg. Lab)	1	10000	10000
6.	Jib Head Key, Flat Key, Saddle Key, Wood Ruff Key, Feather Key Pinkey & A piece of splined shaft.	1 Set	L.S.	500
7.	Pins- Split Pin, Taper Cottor Type Split Pin, Cottor or Cottor Pin, Cottor Bolts; Lewis or Rag Foundation Bolt, Fish Tail & Square Head Foundation Bolts.	1 Set	L.S.	500
8.	Friction Clutches & Couplings-Cone Clutch, Single Plate Muff Coupling, Flange Coupling Universal Coupling or Hooks Joint. Flexible Coupling-Belt & Pin Type, Coil Spring Type.	1 Set	L.S.	2500
9.	Bearings- Plane, Bushed, Split Step, Ball, Rollar Bearings, Thrust Bearings.	1 Set	L.S.	1000
10.	Spur gear Single & Double Helical Gears, Bevel Gears.	1 Set	L.S.	1000
11.	Simple Spur Gear train	1	1500	1500
12.	Compound Gear Train	1	1500	1500
13.	Epicyclic Gear Train	1	2000	2000
14.	Compression & Tension Each Helical Springs.	1	200	200
15.	Four Bar Mechanism Fitted on a board.	1	1000	1000
16.	Slider Crank Mechanism	1	1000	1000
17.	Whitworth Quick Return Mechanism Fitted on a board.	1	1000	1000

ELECTRICAL TECHNOLOGY & ELCETRONICS LAB

S.No	Name of Equipment	No.	@ Rs.	Amt.in Rs.
1.	D.C. Shunt Motor 3 Kw. 1500 RPM with 3 Point Starter	2	10000	20000

20.	Uster Evenness Tester	1	2000000	2000000
21.	Trash Analyser	1	150000	150000
22.	Conditioning Oven 220 V With capability of maintaining temperature up to 100oC and facility for smoth variation of temperature inside 27 liter.	1	98500	98500
23.	Stelometer (For bundle Strength)	2	150000	300000
24.	Crease Recovery Tester Size of the Test Specimen - 40mm X 15mm, Crease Load : 1Kg.(Stainless Steel), Angle measurement : On an Engraved circular scale graduated in 1 deg., Scale measurement : 0-180 with all complete accessories or Latest Configuration	2	15000	30000
25.	Water Repellency Tester	1	80000	80000
26.	Pilling Tester	1	30000	30000
27.	Crimp Rigidity Tester Minor Load - 2 Gr. to 10Gr. in a step of one grams Major Load - 100 Gr. to 500 Gr. in step of 50 Grams Digital display 220 V, with all complete accessories or Latest Configuration	1	20000	20000
28.	Air Permeability Tester	1	60000	60000
29.	Sheffield Micronaire with compressor (For Fibre Fineness)	1	150000	150000
31.	Miscellaneous Items-Thermometers, Thermo hydrograph, Whirling Hydrometer, Dry & Wet bulb thermometer, Physical Balance, 1.5 ton Air condisioner for atmosphere control etc.			
32.	Classimate (Yarn faults finding equipment)	1		1200000
34.	Sublimation fastness tester	1	100000	100000
35.	Round Sample of GSM with Electronic balance	1	20000	20000
36.	Stiffness Tester	1	15000	15000
37.	Drape meter	1	25000	25000
38.	Fabric Thickness Tester	1	8000	8000

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

39.	A.S.T.M. Cards For Threads/Inch	1		
-----	---------------------------------	---	--	--

NOTE:

1. Item No. 17,18,25 and 26 are not required for Textile Technology course.
2. Indian make working laboratory models for costly equipment be purchased if available.

SPINNING LAB

S.No.	Name of Equipment	No.	@ Rs.	Amt.in Rs.
1.	Blow Room Line With Six Beating Points (Lab Model) Latest Lab Model of blow room line of 10 inch width or more complete with hopper feeder, Scutcher, beaters with adjustment grid bars, latic, Krischner neater, Feed regulatory system, calendar rollers, lap rollers, lap tray with electric control panel, beating point = 4.5 to 6 with complete accessories or Latest Configuration	1	5000000	5000000
2.	Model of mini carding plant 250 mm working width 250 mm cylinder, doffer, feed roller, opening roller, striping roller, crush roller stainless undercasing, takeup drum suitable for feeding, miniature draw frame with gear and pulleys to drive feed roller, cylinder and doffer and other accessories, Mechanical type possibility of processing 50 gms. per batch 10 "width, metallic wire clothing with complete accessories, Microprocessor based individual drive or Latest Configuration	1No.	800000	800000
3.	Draw Frame : Having 3 over 3 drafting arrangement to process the sliver from miniature carding machine with individual AC variable speed motors with change gears to vary the speeds of front roller, middle and back roller for different Total Draft and break Draft inclusive of motor, rpm indicators control system and other accessories Mechanical type single delivery, 3 over 3 drafting arrangement, range 5-15 Draft Microprocessor based or Latest Configuration	1No.	800000	8,00,000
4.	High Speed Simplex (Lab Model) Latest Lab Model Range :6-12 Spindle Suitable for 110 mm dia package Draft Range=6-18, 3 roller apron drafting arrangement SKF PK 1500, individual AC variable speed motors with control system with	1	480000	480000

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

	automatic stop motion, Inching mechanism, 100 empty PP bobbins with complete accessories and pinion according to draft change with all complete accrssories or Latest Configuration			
5.	Ring Frame Ring Spinning Frame : No. of Spindle6-12, mechanical speed 25000 rpm, ring dia - 38 mm, 70mm gauge, 180 mm lift, SKF PK 2025/2035, 3 over 3 drafting arrangement with short cradles, for gearing arrangement to change the total draft, Break draft and TPI with change gears and other accessories. Mechanical draft 10-50 Microprocessor based or Latest Configuration	1	850000	850000
6.	Sliver Lap Machine	1	250000	250000
7.	Ribbon Lap Machine	1	250000	250000
8.	Comber 6/8 Heads	1	800000	800000
9.	Parallel Winding Machine(24 Drums) (Lab Model) Cheese winding :Range 4-8 or more drum, Speed Range-600-800 y.p.m., Optical cleaner on individual spindle, Steel drum/ Bakelite drum as per parallel winding, 220V, Single phase motor, 100pp cheeses with all complete assessories or latest configuration	1	400000	400000
10.	Yarn Doubling Machine (Lab Model)	1	275000	275000
11.	Hank Reeling Machine	1	25000	25000
12.	Two For One Twister(T.F.O.) TFO type, No. of spindle= range 4-8, 230 mm guage, 150 mm pot dia, suitable for cheese of 170 mm traverse, twist range=3.0 to 45.0, count range 2/8's to 2/80's Ne, Tangential belt drive for S & Z twist both, with automatic shop motorn and other complete accessories, 100 PP empty package with all complete accessories or Latest Configuration	1	600000	600000
13.	Stripping Roller (For Card)	1	5000	5000
14.	Grinding Roller (Transverse wheel Grinder)	1	5000	5000
15.	Metallic Wire Mounting Equipment (With Butt Welder)	1	20000	20000
17.	Assembly Winder	1	250000	250000
18.	Open end spinning M/c of Twelve rotors (Lab Model) Having Range 4-8 head rotor guage-230 mm having 48 mm rotor with OK39/40 opening rollers, automatic stop motion R4/10 navels, built in automatic indicators and quick response sensors to monitor yarn continuity and sliver, trash separator and discharge tunel for better cleaning, Feeding can size of 14" X 42" and take up package cone and cheese both with individual motors with pully to change draft and twist with motors. Electrical PLC system,	1	750000	750000

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

	Computer, UPS, Control system, Dreft range suitable for 2' to 24's and other all complete accessories, draft range-50-200 user friendly menu driven software or Latest Configuration

11. EVALUATION STRATEGY

11.1 INTRODUCTION

Evaluation plays an important role in the teaching-learning process. The major objective of any teaching-learning endeavor is to ensure the quality of the product which can be assessed through learner's evaluation.

The purpose of student evaluation is to determine the extent to which the general and the specific objectives of curriculum have been achieved. Student evaluation is also important from the point of view of ascertaining the quality of instructional processes and to get feedback for curriculum improvement. It helps the teachers in determining the level of appropriateness of teaching experiences provided to learners to meet their individual and professional needs. Evaluation also helps in diagnosing learning difficulties of the students. Evaluation is of two types: Formative and Summative (Internal and External Evaluation)

Formative Evaluation

It is an on-going evaluation process. Its purpose is to provide continuous and comprehensive feedback to students and teachers concerning teaching-learning process. It provides corrective steps to be taken to account for curricular as well as co-curricular aspects.

Summative Evaluation

It is carried out at the end of a unit of instruction like topic, subject, semester or year. The main purpose of summative evaluation is to measure achievement for assigning course grades, certification of students and ascertaining accountability of instructional process. The student evaluation has to be done in a comprehensive and systematic manner since any mistake or lacuna is likely to affect the future of students.

In the present educational scenario in India, where summative evaluation plays an important role in educational process, there is a need to improve the standard of summative evaluation with a view to bring validity and reliability in the end-term examination system for achieving objectivity and efficiency in evaluation.

11.2 STUDENTS' EVALUATION AREAS

The student evaluation is carried out for the following areas:

- Theory
- Practical Work (Laboratory, Workshop, Field Exercises)
- Project Work
- Professional Industrial Training

A. Theory

Evaluation in theory aims at assessing students' understanding of concepts, principles and procedures related to a course/subject, and their ability to apply learnt principles and solve problems. The formative evaluation for theory subjects may be caused through sessional /class-tests, home-assignments, tutorial-work, seminars, and group discussions etc. For end-term evaluation of theory, the question paper may comprise of three sections.

Section-I

It should contain objective type items e.g. multiple choice, matching and completion type. Total weightage to Section-1 should be of the order of 20 percent of the total marks and no choice should be given in this section. The objective type items should be used to evaluate students' performance in knowledge, comprehension and at the most application domains only.

Section-II

It should contain short answer/completion items. The weightage to this section should be of the order of 40 percent of the total marks. Again, no choice should be given in section-II

Section-III

It may contain two to three essay type questions. Total weightage to this section should be of the order of 40 percent of the total marks. Some built-in, internal choice of about 50 percent of the questions set, can be given in this section

Table II : Suggested Weightage to be given to different ability levels

Abilities	Weightage to be assigned
Knowledge	10-30 percent
Comprehension	40-60 percent
Application	20-30 percent
Higher than application i.e. Analysis, Synthesis and Evaluation	Upto 10 percent

B. Practical Work

Evaluation of students performance in practical work (Laboratory experiments, Workshop practicals/field exercises) aims at assessing students ability to apply or practice learnt concepts, principles and procedures, manipulative skills, ability to

Corrected and Approved by BTE, U.P., Lucknow in CDC Meeting held on 19.08.2023

observe and record, ability to interpret and draw conclusions and work related attitudes. Formative and summative evaluation may comprise of weightages to performance on task, quality of product, general behaviour and it should be followed by viva-voce.

C. Project Work

The purpose of evaluation of project work is to assess students ability to apply, in an integrated manner, learnt knowledge and skills in solving real life problems, manipulative skills, ability to observe, record, creativity and communication skills. The formative and summative evaluation may comprise of weightage to nature of project, quality of product, quality of report and quality of presentation followed by viva-voce.

D. Professional Industrial Training

Evaluation of professional industrial training report and viva-voce/ presentation aims at assessing students' understanding of materials, industrial processes, practices in the industry/field and their ability to engage in activities related to problem-solving in industrial setting as well as understanding of application of learnt knowledge and skills in real life situation. The formative and summative evaluation may comprise of weightages to performance in testing, general behaviour, quality of report and presentation during viva-voce.

12. RECOMMENDATIONS FOR EFFECTIVE CURRICULUM IMPLEMENTATION

This curriculum document is a Plan of Action and has been prepared based on exhaustive exercise of curriculum planning and design. The representative sample comprising selected senior personnel (lecturers and HODs) from various institutions and experts from industry/field have been involved in curriculum design process.

The document so prepared is now ready for its implementation. It is the faculty of polytechnics who have to play a vital role in planning instructional experiences for the courses in four different environments viz. class-room, laboratory, library and field and execute them in right perspective. It is emphasized that a proper mix of different teaching methods in all these places of instruction only can bring the changes in stipulated students behaviour as in the curriculum document. It is important for the teachers to understand curriculum document holistically and further be aware of intricacies of teaching-learning process (T-L) for achieving curriculum objectives. Given below are certain suggestions which may help the teachers in planning and designing learning experiences effectively. These are indicative in nature and teachers using their creativity can further develop/refine them. The designers of the programme suggest every teacher to read them carefully, comprehend and start using them.

(A) Broad Suggestions:

1. Curriculum implementation takes place at programme, course and class-room level respectively and synchronization among them is required for its success. The first step towards achieving synchronization is to read curriculum document holistically and understand its rationale and philosophy.
2. An academic plan needs to be prepared and made available to all polytechnics well in advance. The Principals have a great role to play in its dissemination and, percolation upto grass-root level. Polytechnics, in turn are supposed to prepare institutional academic plan.
3. HOD of every Programme Department along with HODs and incharges of other departments are required to prepare academic plan at department level referring to institutional academic plan.
4. All lecturers/Senior lecturers are required to prepare course level and class level lesson plans referring departmental academic plan.

(B) Course Level Suggestions

Teachers are educational managers at class room level and their success in achieving course level objectives lies in using course plan and their judicious execution which is very important for the success of programme by achieving its objectives.

Polytechnic teachers are required to plan various instructional experiences viz. theory lecture, expert lectures, lab/workshop practicals, guided library exercises, field visits, study tours, camps etc. In addition, they have to carry out progressive assessment of theory, assignments, library, practicals and field experiences. Teachers are also required to do all these activities within a stipulated period of time. It is essential for them to use the given time judiciously by planning all above activities properly and ensure execution of the plan effectively.

Following is the gist of suggestions for subject teachers to carry out T-L process effectively:

1. Teachers are required to prepare a course plan, taking into account departmental academic plan, number of weeks available and courses to be taught.
2. Teachers are required to prepare lesson plan for every theory class. This plan may comprise of contents to be covered, learning material for execution of a lesson plan. They may follow steps for preparing lesson plan e.g. drawing attention, state instructional objectives, help in recalling pre-requisite knowledge, deliver planned subject content, check desired learning outcomes and reinforce learning etc.
3. Teachers are required to plan for expert lectures from field/industry. Necessary steps are to plan in advance, identify field experts, make correspondence to invite them, take necessary budgetary approval etc.
4. Teachers are required to plan for guided library exercises by identification of course specific experience requirement, setting time, assessment, etc. The assignments and seminars can be thought of as terminal outcome of library experiences.
5. Concept and content based field visits may be planned and executed for such content of course which is abstract in nature and no other requisite resources are readily available in institute to impart them effectively.
6. There is a dire need for planning practical experiences in right perspective. These slots in a course are the avenues to use problem based learning/activity learning/ experiential learning approach effectively. The development of lab instruction sheets for the course is a good beginning to provide lab experiences effectively.
7. Planning of progressive assessment encompasses periodical assessment in a semester, preparation of proper quality question paper, assessment of answer sheets immediately and giving constructive feed back to every student
8. The student centred activities may be used to develop generic skills like task management, problem solving, managing self, collaborating with others etc.

9. Where ever possible, it is essential to use activity based learning rather than relying on delivery based conventional teaching all the time.
10. Teachers may take initiative in establishing liaison with industries and field organizations for imparting field experiences to their students.
11. Students be made aware about issues related to ecology and environment, safety, concern for wastage of energy and other resources etc.
12. Students may be given relevant and well thought out project assignments, which are purposeful and develop practical skills. This will help students in developing creativity and confidence for their gainful employment.
13. A Project bank may be developed by the concerned department of the polytechnics in consultation with related Industry, research institutes and other relevant field organizations in the state.

13. LIST OF PARTICIPANTS

List of experts who contributed in the development of the curriculum in Review and Revision for the Three year (Six Semester) Diploma Textile Technology (First and Second Semester) at I.R.D.T., U.P., Kanpur on 24 & 25 August 2022 are honorable named below :

- | | | |
|-----|---------------------------|--|
| 1- | Shri B. D. Dixit | Retd. Professor, U.P.T.T.I., Kanpur |
| 2- | Dr. Alka Ali | Professor, U.P.T.T.I., Kanpur |
| 3- | Dr. Prashant Visnoi | Professor, U.P.T.T.I., Kanpur |
| 4- | Shri Arun Kumar Gangwar | Associate Professor, U.P.T.T.I., Kanpur |
| 5- | Shri Sanjeev Kumar Rajput | Associate Professor, U.P.T.T.I., Kanpur |
| 6- | Shri R. K. Srivastava | Deputy Director D.T.E., U.P. Kanpur |
| 7- | Shri D.K. Verma | Professor, I.R.D.T. Kanpur |
| 8- | Shri Pankaj Yadav | Assistant Director D.T.E., U.P. Kanpur |
| 9- | Shri R. K. Gupta | H.O.D./Principal, Govt. Poly., HindalpurHapur |
| 10- | Smt. Anubha Gupta | Lecturer Textile Technology, G. P., Kanpur |
| 11- | Shri Pravesh Verma | Assistant Professor, I.R.D.T., Kanpur
(Course Co-ordinator) |

LIST OF EXPERTS

List of experts who contributed in the development of the curriculum in Semester System for the Three year (Six Semester) Diploma in Textile Chemistry(Third, Fourth, Fifth and Six Semester) at I.R.D.T., U.P., Kanpur on 07.06.2023 & 08.06.2023 are honorable named below .:

- | | | |
|-----|---------------------------|--|
| 1. | Prof. Alka Ali | Retired Professor, U.P.T.T.I., Kanpur |
| 2. | Dr Prasant Vishnoi | Professor, U.P.T.T.I., Kanpur |
| 3. | Shri Arun Kumar Gangwar | Associate Professor, U.P.T.T.I., Kanpur |
| 4. | Shri Sanjeev Kumar Rajput | Associate Professor, U.P.T.T.I., Kanpur |
| 5. | Shri D.K. Verma | Professor, I.R.D.T. Kanpur |
| 6. | Arun Kumar Gautam | Lecturer Textile Technology G. P. Mau |
| 7. | Rahul Kumar Shringirishi | Guest Lecturer Textile Chemistry G.P. Kanpur |
| 8. | Santosh Kumar | Lecturer Textile Technology G. P. Mau. |
| 9. | Palash Kumar Patra | Lecturer Textile Technology G.P. Kuru Pindara
Banaras |
| 10. | Smt. Anubha Gupta | Lecturer Textile Technology, G. P., Kanpur |
| 11. | Arunabh Agnihotri | Lecturer Textile Technology G.P. Farrukhabad |
| 12. | Shri Pravesh Verma | Assistant Professor, I.R.D.T., Kanpur
(Course Co-ordinator) |
