INSTITUTE OF RESEARCH DEVELOPMENT & TRAINING U. P., KANPUR-208002

**To be**

**Approved and Implemented by B.T.E.**

**U.P.**

## CONTENTS

| Sr. No | Particulars                                               | Page No. |
|--------|-----------------------------------------------------------|----------|
| -      | PREFACE                                                   | -        |
| -      | ACKNOWLEDGEMENT                                           | -        |
| -      | LIST OF EXPERTS                                           | -        |
| 1.     | SALIENT FEATURES                                          | 1        |
| 2.     | EMPLOYMENT OPPORTUNITIES                                  | 2-3      |
| 3.     | LEARNING OUTCOMES OF THE PROGRAM                          | 4-5      |
| 4.     | STUDY AND EVALUATION SCHEME                               | 6-9      |
| 5.     | GUIDELINES FOR ASSESSMENTS OF STUDENT CENTERED ACTIVITIES | 10       |
| 6.     | COURSE CONTENTS OF VARIOUS SUBJECTS                       | 11-62    |
| 7.     | EVALUATION METHODOLOGY                                    | 63-67    |
| 8.     | LAB EQUIPMENT LIST                                        | 68-77    |

### THIRD SEMESTER

|     |                                                                                                                       |                |
|-----|-----------------------------------------------------------------------------------------------------------------------|----------------|
| 3.1 | ELECTRONICS DEVICES AND CIRCUITS (THEORY)                                                                             | 11-13          |
| 3.2 | DIGITAL ELECTRONICS (THEORY)                                                                                          | 14-16          |
| 3.3 | LINEAR INTEGRATED CIRCUIT (PRACTICUM)                                                                                 | 17-20          |
| 3.4 | ELECTRIC CIRCUIT AND NETWORK (PRACTICUM)                                                                              | 21-23          |
| 3.5 | ELECTRONICS DEVICES AND CIRCUITS (PRACTICAL)                                                                          | 24-26          |
| 3.6 | DIGITAL ELECTRONICS (PRACTICAL)                                                                                       | 27-28          |
| 3.7 | SKILL DEVELOPMENT<br>1) PRODUCT DESIGN AND DEVELOPMENT <b>OR</b><br>2) FUNDAMENTALS OF INNOVATION AND DESIGN THINKING | 29-31<br>32-34 |

### FOURTH SEMESTER

|     |                                                                              |                |
|-----|------------------------------------------------------------------------------|----------------|
| 4.1 | MICROPROCESSOR AND ITS APPLICATIONS (THEORY)                                 | 35-37          |
| 4.2 | PRINCIPLES OF ELECTRONIC COMMUNICATION (THEORY)                              | 38-40          |
| 4.3 | ELECTRONIC INSTRUMENTATION AND MEASUREMENT (PRACTICUM)                       | 41-44          |
| 4.4 | PROGRAMMING IN C (PRACTICUM)                                                 | 45-47          |
| 4.5 | MICROPROCESSOR AND ITS APPLICATIONS (PRACTICAL)                              | 48-49          |
| 4.6 | PRINCIPLES OF ELECTRONIC COMMUNICATION (PRACTICAL)                           | 50-53          |
| 4.7 | SKILL DEVELOPMENT<br>1) ELECTRIC VEHICLE <b>OR</b><br>2) INDUSTRIAL ROBOTICS | 54-57<br>58-60 |
| 4.8 | ESSENCE OF INDIAN KNOWLEDGE AND TRADITION                                    | 61-62          |

## **PREFACE**

An important issue generally debated amongst the planners and educators' world is how technical education can contribute to sustainable development of the societies struggling hard to come in the same bracket as that of the developed nations. The rapid industrialization and globalization has created an environment for free flow of information and technology through fast and efficient means. This has led to shrinking of the world, bringing people from different culture and environment together and giving rise to the concept of world turning into a global village. In India, a shift has taken place from the forgettable years of closed economy to knowledge based and open economy in the last few decades. In order to cope with the challenges of handling new technologies, materials and methods, we have to develop human resources having appropriate professional knowledge, skills and attitude. Technical education system is one of the significant components of the human resource development and has grown phenomenally during all these years. Now it is time to consolidate and infuse quality aspect through developing human resources, in the delivery system. Polytechnics play an important role in meeting the requirements of trained technical manpower for industries and field organizations.

In order to meet the requirements of future technical manpower, we will have to revamp our existing technical education system and one of the most important requirements is to develop outcome-based curricula of diploma programs. The curricula for diploma programs have been revised by adopting time-tested and nationally acclaimed scientific method, laying emphasis on the identification of learning outcomes of diploma program.

The real success of the diploma program depends upon its effective implementation. However, the best curriculum document is designed, if that is not implemented properly, the output will not be as expected. In addition to acquisition of appropriate physical resources, the availability of motivated, competent and qualified faculty is essential for effective implementation of the curricula.

It is expected of the polytechnics to carry out job market research on a continuous basis to identify the new skill requirements, reduce or remove outdated and redundant courses, develop innovative methods of course offering and thereby infuse the much needed dynamism in the system.

F.R. KHAN  
Director  
I.R.D.T. Kanpur

## **ACKNOWLEDGEMENTS**

We gratefully acknowledge the guidance and contribution received from the following persons:

- i) Sh. Narendra Kumar Bhushan, IAS Additional Chief Secretary, Technical Education Govt. of U.P. for his exemplary vision & approach.
- ii) Sh. F. R. Khan Director I.R.D.T. Kanpur for continually motivating, guiding and taking keen interest in the review of curriculum.
- iii) All the participants from industries, Polytechnics and other technical institutions for their professional inputs during curriculum workshops.
- iv) CDC Officer and other concerning staff of IRDT for their support and assistance in conducting curriculum workshops.
- v) In the last but not least would like to thanks management of the industries who spare not only their precious time but also allowed the visit of their industries to the team making the curriculum.

Ravindra Kumar  
Research Assistant/  
Curriculum In-charge  
I.R.D.T. Kanpur

Dr. Atma Prakash Singh  
(Deputy Director/  
(Curriculum Coordinator)  
I.R.D.T. Kanpur

-

### **LIST OF SUBJECT EXPERTS**

The following experts participated in various workshop for Developing the Curriculum's Structure and Contents of **ELECTRONICS ENGINEERING (Modern consumer electronics)** at I.R.D.T. Kanpur.

1. Shri Vimal Kumar, HOD G. P. Fatehpur.
2. Dr. Abhay Shukla, Professor Rama University Kanpur.
3. Dr. Sonveer Singh, HOD MMIT Hathras.
4. Shri Bhoopendra Ratan, Lecturer G.P Mainpuri.
5. Shri Kulbhaskar Singh, Lecturer G.P. Banda.
6. Shri Durgesh Pratap, Lecturer G.G. P. Cherkhari Mahoba.
7. Smt. Garima Singh, Lecturer G.P. Kanpur.
8. Shri Rajiv Kumar Jaiswal, Lecturer G.P Deeh sadar Unnao.
9. Shri Amit Shrivastav, Lecturer MMIT Kasganj.
10. Shri Avinash Mishra, Lecturer G.P. Talbehat Lalitpur.
11. Miss Priyanka Mishra, Lecturer Manyaver Kashiram G.P Tirwa Kannauj.
12. Smt. Neha Verma, Lecturer G. P. Fathepur.
13. Shri Utpal Pandey, Lecturer G. P. Barabanki
14. Shri Sachin Kumar, Lecturer G.G.P. Shamli

## 1. SALIENT FEATURES

- |                                             |                                                                                                                                     |
|---------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| <b>1. Name of the Program</b>               | ➤ Diploma in Electronics Engineering<br><br><b>(Modern consumer electronics)</b>                                                    |
| <b>2. Duration of the Program</b>           | ➤ Three years (Six Semesters)                                                                                                       |
| <b>3. Entry Qualification</b>               | ➤ Matriculation or equivalent NEP-<br><br>2020/NSQF Level 4 as Prescribed<br><br>by State Board of Technical<br><br>Education, U.P. |
| <b>4. Pattern of the Program</b>            | ➤ Semester System                                                                                                                   |
| <b>5. NSQF Level</b>                        | ➤ Level – 5                                                                                                                         |
| <b>6. Ratio between theory and Practice</b> | ➤ 40% (Theory)/60% (Practical)                                                                                                      |

### 1) Industrial Training/Internship:

Four and six weeks of industrial training is made mandatory after the II and IV semesters during summer vacation. Total marks allotted to industrial training will be respectively 50 & 100.

In the last (6<sup>th</sup> Semester) we have made the one semester Industrial training/Internship as optional along with usual classroom training.

### 2) Audit & Pathways Subjects:

As per AICTE and NEP-2020 directives, Essence of Indian Knowledge & Tradition, Indian Constitution, Entrepreneurship & Startup, subjects on Environmental Studies have been incorporated in the curriculum.

### 3) Student Centered Activities:

A provision of 3-6 Hrs per week has been made for organizing Student Centered Activities for overall personality development of students. Such activities will comprise co-curricular activities such as expert lectures, class room seminars, games, hobby club like photography, painting, singing etc. declamation contests, field visits, NCC, NSS and other cultural activities, etc.

### 4) Project work:

Micro/Mini/Major project work has been included in the curriculum to enable the student to get familiarized with the practices and procedures being followed in the industries and also provide an opportunity to work on some live projects in the industry.

## **2. EMPLOYMENT OPPORTUNITIES**

- 1) Tele-Communication Engineering and related Departments.
- 2) Railways.
- 3) Defence Services, Para-military Forces.
- 4) Civil Aviation.
- 5) Defence Research and Development Organizations.
- 6) Electricity Boards and Corporations etc.
- 7) Research and Development Deptt.
- 8) Maintenance Deptt.
- 9) Communication Industry.
- 10) PCB Design and Fabrication Industry.
- 11) Consumer Electronics Industry.
- 12) Computer Assembling and Computer Peripheral Industry.
- 13) Semi-Conductor Devices Manufacturing Industry.
- 14) Maintenance of Instrumentation and Control in process Industries.
- 15) Internet Service Providers.
- 16) Public Sector Undertakings (like BHEL, BEL, HAL, IOCL, HPCL, ISRO etc).
- 17) D.T.H component Fabrication Industry.
- 18) Mobile Phone Assembly Industries.
- 19) Medical Electronics Equipment Industry.
- 20) EPBX/ Telephone Exchange Manufacturing Industries.
- 21) Automobile Industry.
- 22) Automation and Control Industry (viz bottling plant, cement plant, automobile units, escalators etc.)
- 23) Sales and Services of Electronic Gadgets from Small Scale Industries.
- 24) Call Centres.
- 25) CSIR

**Self-Employment**

1. Marketing and Sales (Distributors - whole sale and retailers).
2. Service Sector (Repair and Maintenance, job work).
3. Cable laying and jointing DBs etc.
4. Preparing Simulated Models.
5. Manufacturing unit (e.g.- LED Bulb manufacturing, Electronic chalk manufacturing, circuit manufacturing, E- Vehicle units etc.).
6. D.T.H service provider.

### 3. LEARNING OUTCOMES OF THE PROGRAM

#### 1. Program Outcomes (POs)

The Program Outcomes (POs) describe the knowledge, skills, and attitudes that students are expected to develop by the time they graduate from the Diploma in Electronics and Communication Engineering program. These outcomes reflect what graduates will be capable of doing because of the learning and training received throughout the course. They represent the professional abilities and attributes that define a diploma holder in engineering.

As per **National Board of Accreditation (NBA)**, the seven Program Outcomes for an engineering diploma graduate are as follows -

---

##### **PO1: Basics and Discipline specific Knowledge**

Assimilate knowledge of basic mathematics, science, engineering fundamentals, and electronics and communication engineering.

##### **PO2: Problem's Analysis and solution**

Identify, analyse and solve problems using standard methods and established techniques.

##### **PO3: Design and Development**

Design solutions for technical problems.

Assist in designing components, systems, or processes to meet specific requirements.

##### **PO4: Engineering Tools, Experimentation, and Testing**

Use modern engineering tools and appropriate techniques to conduct experiments as per BIS standard.

##### **PO5: Socio/ Economic /Environmental impact assessment/remedy.**

Apply relevant technologies while considering societal needs, environmental impact keeping in view sustainable and ethical responsibilities.

##### **PO6: Project Management and Communication**

Apply engineering management principles, work effectively as an individual or in a team, and communicate clearly on activities.

##### **PO7: Lifelong Learning**

Recognize the importance of continuous learning and actively pursue self-improvement to keep pace with technological developments.

**At the end of the diploma program, the students will be able to:**

|     |                                                                                                                                                                                            |
|-----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1.  | To enable Communicate effectively in English.                                                                                                                                              |
| 2.  | Apply basic principles of Mathematics to solve engineering problems                                                                                                                        |
| 3.  | Apply basic principles of Physics and Chemistry to solve engineering problems                                                                                                              |
| 4.  | Prepare computerized reports, presentations using IT tools and computer application software                                                                                               |
| 5.  | Prepare and interpret Engineering Drawings                                                                                                                                                 |
| 6.  | Use cutting tools, equipment and tooling for fabrication of jobs by following safe practices at workplace                                                                                  |
| 7.  | Use appropriate instruments to measure various engineering parameters.                                                                                                                     |
| 8.  | Measure and computing parameters related to basic electrical engineering                                                                                                                   |
| 9.  | Use appropriate procedures for preventing environmental pollution and energy conservation                                                                                                  |
| 10. | Assemble, test and troubleshooting of electronic circuits consisting of passive and active components by applying appropriate soldering, testing and measurement techniques at workplaces. |
| 11. | Understand principles of communication engineering.                                                                                                                                        |
| 12. | Understand basic principles of digital electronics and design combinational and sequential circuits.                                                                                       |
| 13. | Write basic program using C /C++                                                                                                                                                           |
| 14. | Apply principles of various networks, filters and transmission lines and its associated parameters                                                                                         |
| 15. | Use various power-controlled devices in industrial applications                                                                                                                            |
| 16. | Use microprocessor and microcontroller-based system using assembly level language programming                                                                                              |
| 17. | Carry out trouble shooting of different basic consumer electronic products like TV, Audio system and mobile.                                                                               |
| 18. | Use optical fiber engineering for communication systems                                                                                                                                    |
| 19. | Use different digital communication systems                                                                                                                                                |
| 20. | Program microcontroller for Embedded Systems Applications using C /C++                                                                                                                     |
| 21. | Understand Microwave and radar engineering                                                                                                                                                 |
| 22. | Understand basic concepts of control systems                                                                                                                                               |
| 23. | Understand Embedded systems and its applications                                                                                                                                           |
| 24. | Work with various active and passive microwave devices.                                                                                                                                    |
| 25. | Use biomedical instruments                                                                                                                                                                 |
| 26. | Apply acquired knowledge and skill in solving a live problem or Industrial project                                                                                                         |
| 27. | Use modern communication system                                                                                                                                                            |
| 28. | Understand the fundamental of Machine Learning and AI and their practical application. Familiarize with key framework and guidelines governing AI deployment                               |

NOTE:-**(Q)** It is compulsory to appear and to pass the examination, but marks will not be included for percentage and division of obtained marks.

\* Advance skill development mention at 3.7 in the table provide the scope of selecting the course as per choice from the elective list provided in the syllabus conducted by various agency of repute of duration not less than 20 Hrs (Offline/Online).

\*\* SUMMER INTERNSHIP (4-6 WEEKS) duration to be organized after second semester exam. Evaluation will be in third semester.

# Student Centered Activities will comprise of co-curricular activities like extension lectures, games, hobby clubs e.g. photography etc., seminars, declamation contests, educational field visits, N.C.C., NSS, library, Cultural Activities and self-study etc.

NOTE:- (Q) It is compulsory to appear and to pass the examination, but marks will not be included for percentage and division of obtained marks.

\* Advance skill development mention at 4.7 in the table provide the scope of selecting the course as per choice from the elective list provided in the syllabus conducted by various agency of repute of duration not less than 20 Hrs (Offline/Online).

\*\* SUMMER INTERNSHIP (4 WEEKS) duration to be organized after fourth semester exam. Evaluation will be in fifth semester.

# Student Centered Activities will comprise of co-curricular activities like extension lectures, games, hobby clubs e.g. photography etc., seminars, declamation contests, educational field visits, N.C.C., NSS, library, Cultural Activities and self-study etc.

## 5. GUIDELINES FOR ASSESSMENTS OF STUDENT CENTERED ACTIVITIES (SCA)

It was discussed and decided that the maximum marks for SCA should be 50 as it involves a lot of subjectivity in the evaluation. The marks may be distributed as follows:

- i. 15 Marks for general behaviour and discipline  
(by HODs in consultation with all the teachers of the department)
- ii. 10 Marks for attendance as per following:  
(by HODs in consultation with all the teachers of the department)
  - a) 75 - 80% 6 Marks
  - b) 80 - 85% 8 Marks
  - c) Above 85% 10 Marks
- iii. **\* Even Semester:**  
25 Marks maximum for Sports/NCC/Cultural/Co-curricular/NSS activities as per following: (by In-charge Sports/NCC/Cultural/Co-curricular/NSS)
  - a) State/National Level participation
  - b) Participation in two of above activities
  - c) Inter-Polytechnic level participation
  - d)  
**\*\*Odd Semester:**  
25 Marks maximum
  - a) Language Lab Practices
  - b) Group Discussion and Personality Development
  - c) Industrial Visits/Industrial Talks
  - d) Power Point Presentations and Resume Making
  - e) Development of Aptitude and Reasoning Skills
  - f) Participation in the technical Exhibitions, Symposiums, Seminars, Workshops at the Institute /District/State/National Level.

## 1. COURSE OBJECTIVES

This course will enable students to develop the skills required to use basic electronic devices in various electronic circuits. Through the study of this course the students will understand the construction, working, characteristics and applications of various types of semiconductor devices such as diodes and transistors, which are basic building block of amplifier, oscillator, switching circuit, wave shaping circuit and power supply. The knowledge of this core subject is essential for comprehending the courses that will be introduced later in the diploma program as well as developing requisite skills for effective functioning in the industry.

## 2. COURSE OUTCOMES (CO):

The theory should be taught and practical should be carried out in such a manner that students are able to acquire different learning outcomes in cognitive, psychomotor and affective domain to demonstrate following COURSE OUTCOMES.

**Students will be able to**

CO1 • Explain the working of different semiconductor devices.

CO2 • Measure and calculate various parameters of different semiconductor devices.

CO3 • Analyze and interpret the V-I characteristics of various semiconductor devices.

CO4 • Explain the working of different type of amplifiers and design oscillators for specified operating frequencies.

CO5 • Compare the characteristics and applications of SCR, DIAC, TRIAC, and IGBT.

## 3. SUGGESTED COURSE ARTICULATION MATRIX (CAM):

| CO No. | PO1<br>Basic and Discipline Specific Knowledge | PO2<br>Problem Analysis | PO3<br>Design/ Development of Solutions | PO4<br>Engineering Tools | PO5<br>Practices for Society, Sustainability and Environment | PO6<br>Project Management | PO7<br>Life Long Learning | PSO1 | PSO2 |

**Legend:** High (3), Medium (2), Low (1) and No mapping (-)

\* PSOs will be developed by respective programme coordinator at institute level. As per latest NBA guidelines, formulating PSOs is optional.

## 4. CONTENTS

### UNIT 1- SEMICONDUCTOR DIODES CIRCUIT AND APPLICATIONS (06 Periods)

Definition, Extrinsic/Intrinsic, N-type & p-type, P-N junction diode forward & reverse bias characteristics. Different types of diodes, Diode (P-N Junction) as rectifier, Half wave rectifier, full wave rectifier. Construction & Working Principle of Positive, Negative, and Biased Clippers - Construction & Working Principle of Positive and Negative Clampers

## **UNIT 2- BIPOLAR JUNCTION TRANSISTOR** (11 Periods)

PNP and NPN transistor- Operation and characteristics. CB, CE and CC configurations: working, characteristics and their comparison. Concept of leakage current, effect of temperature on leakage current, standard notation for current and voltage polarity. Transistor Biasing, Transistor as an amplifier in CE configuration, DC load line.

## **UNIT 3- UNIPOLAR JUNCTION AND FIELD EFFECT TRANSISTOR** (9 Periods)

Junction Field Effect Transistor: Construction, operation, characteristics and Biasing.

MOSFET: Construction, operation, Characteristics.

CMOS: Construction, operation and Characteristics

Comparison of JEET, MOSFET and Bipolar Transistor.

Introduction to advance non-planer devices like FinFET, GAA.

## **UNIT 4-AMPLIFIERS AND OSCILLATORS** (11 Periods)

Single Stage Transistor Amplifier: Analysis of Single Stage CE, CB and CC amplifier.

Multistage Amplifiers: Need of multistage amplifier, gain of multistage amplifier, RC coupled, and transformer coupled, direct coupled Amplifier, their frequency response and bandwidth. Large Signal Amplifier: Difference between voltage and power amplifiers - Importance of impedance matching in amplifiers - Class A, Class B, Class AB, and Class C amplifiers, Push-pull amplifier.

Feedback Amplifiers: Properties of negative Feedback, impact of feedback on different parameters, Basic Feedback Amplifier Topologies.

Basic Principles, different types of Oscillator-LC, RC and crystal oscillator.

## **UNIT 5- SCR, DIAC, TRIAC and IGBT** (05 Periods)

Construction, working and characteristics, SCR as a Switch, DIAC as bidirectional switch, Comparison of SCR, DIAC, TRIAC, MOSFET and IGBT.

### **5. TEXT BOOKS/REFERENCE BOOKS:**

1. Analog Circuits A.K. Maini Khanna Publishing House Ed. 2018 (ISBN: 978-93-86173-584)
2. Electronic Devices and Circuits. Salivahanan and N. Suresh Kumar McGraw Hill Education; Fourth edition (1 July 2017) ISBN: 978-9339219505
3. Electronics Devices and circuit theory Boyestad & Nashelsky Pearson Education India; 11 edition (2015) ISBN: 978-9332542600
4. Electronic Principles Albert Malvino & David Bates Tata McGraw Hill Publication 2010 ISBN: 978-0070634244
5. Rahul Wadhwa, Electronics Devices & Circuits, Asian Publishers, Muzaffarnagar. ISBN: 978-93-91541-74-3

6. Electronics Devices & Circuits Jacob Millman McGraw Hill Education;4 editions (2015) ISBN: 978-9339219543

## 7. INSTRUCTIONAL STRATEGY

Electronic Components & Devices being a fundamental subject, it needs to be handled very carefully and in a manner such that students develop clear understanding of the related concepts and principles. The teacher may lay more emphasis on laboratory work and give home assignments to students to inculcate self-study and problem-solving abilities amongst them.

## 7. SUGGESTED DISTRIBUTION OF MARKS

| <b>Topic</b> | <b>Time Allotted<br/>(Periods)</b> | <b>Marks Allotted<br/>(%)</b> |
|--------------|------------------------------------|-------------------------------|
| <b>1</b>     | <b>6</b>                           | <b>14</b>                     |
| <b>2</b>     | <b>11</b>                          | <b>25</b>                     |
| <b>3</b>     | <b>9</b>                           | <b>21</b>                     |

## 1. COURSE OBJECTIVES

Digital electronics plays significant role in revolution of Electronics industries. The major focus of the course is to expose students to design process of combinational and sequential logic circuits. This course gives profile to work in hardware industries, process industries. It gives strong foundation to all modern electronics devices and digital systems.

## 2. COURSE OUTCOMES(CO):

The theory should be taught in such a manner that students are able to acquire different learning outcomes in cognitive, psychomotor and affective domain to demonstrate following course outcomes.

### Students will be able to

CO1 • Convert numbers from one number system to other.

CO2 • Formulate Boolean expressions to model given logical situations..

CO3 • Simplify Boolean expressions using K-map.

CO4 • Design and implement combinational circuits and Sequential logic circuits

CO5 • Classify memory devices based on their working principles, modes of access, and physical characteristics.

## 3. SUGGESTED COURSE ARTICULATION MATRIX (CAM):

| CO No. | PO1<br>Basic and Discipline Specific Knowledge | PO2<br>Problem Analysis | PO3<br>Design/ Development of Solutions | PO4<br>Engineering Tools | PO5<br>Practices for Society, Sustainability and Environment | PO6<br>Project Management | PO7<br>Life Long Learning | PSO1 | PS O2 |

| CO5    | 3                                              | 2                       | -                                       | -                        | 1                                                            | -                         | 1                         | *    | *     |

**Legend:** High (3), Medium (2), Low (1) and No mapping (-)

\* PSOs will be developed by respective programme coordinator at institute level. As per latest NBA guidelines, formulating PSOs is optional.

## 4. COURSE CONTENTS

### UNIT 1 – NUMBER SYSTEMS & BOOLEAN ALGEBRA (08 Periods)

Introduction to different number systems – Binary, Octal, Decimal, Hexadecimal. Conversion between the number system, 1's complement and 2's complement, Binary Addition and Subtraction. Special Codes: BCD, Gray Codes, ASCII codes.

Boolean Algebra: Basic Boolean laws, De-Morgan's Theorem, SOP and POS representation

### UNIT 2 – LOGIC GATES (08 Periods)

Logic Gates – NOT, AND, OR, NAND, NOR, XOR, XNOR: Symbol, Logical expression and truth table. Implementation of Boolean expressions and Logic Functions using gates; Simplification of Boolean expressions using Karnaugh Maps (up to 4 variables).

### UNIT 3 – COMBINATIONAL LOGIC CIRCUITS (08 Periods)

Half Adder, Full Adder, Half Subtractor, Full Subtractor, Multiplexer – 2 to 1 MUX, 4 to 1 MUX, 8 to 1 MUX., Demultiplexer – 1 to 2 DEMUX, 1 to 4 DEMUX, Decoder, Encoder. Parity generator and checker.

### UNIT 4 – SEQUENTIAL LOGIC CIRCUITS (10 Periods)

Basic Latches using NAND and NOR gates, Triggering and types of triggering

**Flip Flops** – SR, JK, T, D Flip Flops, JK-MS Flip Flops,

**Counters** – Definition and types of counters, difference between asynchronous and synchronous counters, logic diagram, truth table and operation of Decade Counter, Johnson Counter and Ring Counter, applications of counters

**Registers** –: Types of register, Serial in Serial Out, Serial in Parallel Out, Parallel in Serial Out, Parallel in Parallel Out, applications of registers

### UNIT 5 – MEMORY DEVICES (08 Periods)

Classification of Memories – RAM Organization, Address Lines and Memory Size, SRAM, DRAM,

Read Only memory – ROM organization, PROM, EPROM, EEPROM, Flash memory.

Data Converters – Introduction: Digital to Analog converters, Analog to Digital Converters.

## 5. TEXT BOOKS/REFERENCE BOOKS:

1. Digital principles & Applications Albert Paul Malvino & Donald P. Leach McGraw Hill Education; Eighth edition ISBN: 978-9339203405
2. Digital Electronics Roger L. Tokheim Macmillan McGraw-Hill Education (ISE Editions); International 2 Revised edition ISBN: 978-0071167963
3. Digital Electronics – an introduction to theory and practice William H. Gothmann Prentice Hall India Learning Private Limited; 2 edition ISBN: 978-8120303485
4. Fundamentals of Logic Design Charles H. Roth Jr. Jaico Publishing House; First edition ISBN: 978-8172247744

5. Digital Electronics R. Anand Khanna Publications, New Delhi

(Edition 2018) ISBN: 978-93-82609445

6. Rahul Wadhwa, Digital Electronics, Asian Publishers, Muzaffarnagar. ISBN: 978-93-91541-21-7

## **6. INSTRUCTIONAL STRATEGY**

An effective strategy for digital electronics theory involves clear explanations of concepts like logic gates and Boolean algebra, supported by visual aids and diagrams. Encourage active learning through problem-solving, discussions, and real-world examples.

## **7. SUGGESTED DISTRIBUTION OF MARKS**

| 3.3 | LINEAR INTEGRATED CIRCUIT (Practicum) | L T P |
|     |                                       | 2 0 2 |

## 1. COURSE OBJECTIVES

The fundamentals of operational amplifiers and their linear and non-linear applications are covered in this course. Applications for operational amplifiers include signal conditioning circuits, medical electronics, and instrumentation. An operational amplifier is essential to the functionality of many different electrical circuits. Students who take this course will gain the skills necessary to maintain linear electronic circuits based on integrated circuits.

## 2. COURSE OUTCOMES(CO):

It is important to teach theory and conduct practical exercises in a way that enables students to exhibit the following course results by gaining various learning outcomes in the cognitive, psychomotor, and affective domains. The ability for students to:

- CO1 • Illustrate the fabrications process of the various IC by the semiconductor industry.
- CO2 • Compare the electrical parameters of ideal and practical OP-AMP
- CO3 • Design and implement various electronic circuits using OP-AMP
- CO4 • Construct and test various voltage regulator using IC.
- CO5 • Illustration of various timer ICs.

## 4. CONTENT

### UNIT 1- OPERATIONAL AMPLIFIERS

(6 Periods)

Symbol, pin diagram, ratings of IC 741, Electrical properties, transfer characteristics & parameters of ideal OP AMP, DC and AC performance characteristics, slew rate, Open and

closed loop configurations, Block diagram & operating principle, OP-AMP with positive and negative feedback.

| Ex. No. | Name of Experiment                                                                                                                                                | Periods |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1.      | To Interpret the parameters of given Op-Amplifier from data sheet                                                                                                 | 2       |
| 2.      | To test performance of OP_AMP as an inverting & Non inverting amplifier and observe input/output waveforms. To test performance of OP_AMP as unity gain amplifier | 2       |

## UNIT 2- APPLICATIONS OF OPERATIONAL AMPLIFIERS

(4 Periods)

Open loop configuration–Inverting, Non-inverting, Close loop configuration –Inverting, non- inverting, Differential amplifier, unity gain amplifier, Inverting & non-inverting configuration of Adders (summing, scaling, averaging amplifier), Subtractor, Integrator & Differentiator

| Ex. No. | Name of Experiment                                                                          | Periods |
|---------|---------------------------------------------------------------------------------------------|---------|
| 3.      | To design and test performance of OP_AMP as an Adder and Subtractor                         | 2       |
| 4.      | To test performance of OP_AMP as an Integrator & Differentiator                             | 2       |
| 5.      | To test performance of OP_AMP Instrumentation Amplifier calculate gain & frequency response | 2       |
| 6.      | To build & test Astable multivibrator using IC 741 for different values of R and C.         | 2       |
| 7.      | To build/test Monostable multivibrator using IC 741 for different values of R and C.        | 2       |

## UNIT 3- SPECIAL PURPOSE OPERATIONAL AMPLIFIERS

(6 Periods)

Bridge amplifier, instrumentation amplifier with two & three OP AMPS, V-I converters, I-V converters, logarithmic & Antilogarithmic amplifier, Astable, Monostable and Bistable Multivibrator using OP AMP.

| Ex. No. | Name of Experiment                                                                                                                 | Periods |
|---------|------------------------------------------------------------------------------------------------------------------------------------|---------|
| 8.      | To build & test fixed/variable voltage regulator using LM723 & plot line/ load regulation characteristics                          | 2       |
| 9.      | To build & test variable voltage regulator using LM317 & measure the dropout voltage & plot line/ load regulation characteristics. | 2       |
| 10.     | To build & test variable voltage regulator using LM337 & measure                                                                   | 2       |

|  |                                                                   |  |
|--|-------------------------------------------------------------------|--|
|  | the dropout voltage & plot line/ load regulation characteristics. |  |
|--|-------------------------------------------------------------------|--|

#### UNIT 4- VOLTAGE REGULATOR

(6 Periods)

Linear voltage regulator: Block schematic, pin diagrams, features, Specifications, rating and operating principle of IC 723, 78xx, 79xx series, switching regulator: Block schematic, pin diagram, features, specifications, ratings and operating, Principle of switching regulator IC LM 317, LM337 Regulator.

| Ex. No. | Name of Experiment                                                                                                                   | Periods |
|---------|--------------------------------------------------------------------------------------------------------------------------------------|---------|
| 11.     | To build & test voltage regulator using 78xx and 79xx and measure the dropout voltage & plot line/ load regulation characteristics.. | 2       |
| 12.     | To build Op-Amp as voltage Regulator- IC 723                                                                                         | 2       |

#### UNIT 5- COMPARATOR AND TIMERS

(6 Periods)

Op-Amp as comparator, Study of Op-amp peak to peak detector, phase detector circuit, voltage level detector circuit, Schmitt trigger using op-amp, Study of timer IC – 555, Block diagram, operating principle, pin diagram, Features of IC-555, IC-555 as Astable, Monostable, bi-stable & Schmitt Trigger, Sample and hold circuit, Phase Locked Loop- Principle & block diagram of PLL, Transfer characteristics, lock range & capture range.

| Ex. No. | Name of Experiment                   | Periods |
|---------|--------------------------------------|---------|
| 13.     | Various applications of Timer IC555. | 4       |

#### 5. TEXT BOOKS/REFERENCE BOOKS:

1. Design with operational amplifiers and analog integrated circuits, 3rd Edition Sergio Franco Tata McGraw-Hill, 2007
2. Linear Integrated Circuits, D.Roy Choudhry, Shail Jain New Age International Pvt. Ltd
3. System design using Integrated Circuits. B.S.Sonde New Age Pub, 2nd Edition, 2001
4. Analysis and Design of Analog Integrated Circuits Gray and Meyer Wiley International, 2005.
5. OP-AMP and Linear ICs Ramakant A. Gayakwad Prentice Hall / Pearson Education, 4th Edition, 2001
6. Operational Amplifier and Linear Integrated Circuits K Lal Kishore, Pearson Education, 2006

#### 6. INSTRUCTIONAL STRATEGY

This subject being of fundamental importance for diploma holders in electronics engineering and related fields, emphasis on conceptual understanding may be given by taking the help of charts. Sufficient exercises may have given to the students in single stage and multi-stage amplifier circuits in addition to simple exercises in fabricating and testing of various simple

DC circuits. The students may be encouraged to perform some additional practical exercises apart from the list provided.

## **7. SUGGESTED DISTRIBUTION OF MARKS**

| <b>Topic</b> | <b>Time Allotted<br/>(Periods)</b> | <b>Marks Allotted<br/>(%)</b> |
|--------------|------------------------------------|-------------------------------|
| <b>1</b>     | <b>6</b>                           | <b>21</b>                     |
| <b>2</b>     | <b>4</b>                           | <b>16</b>                     |

## 1. COURSE OBJECTIVES

The study of networks, filters and transmission lines provides a foundation for understanding of line communication, audio and video communication, and microwave communication systems. In particular, the study of networks builds upon the principles of A.C. theory and introduces student to the parameters and characteristics of various network configurations, including filters. Furthermore, the study of transmission lines is essential, as their behaviour and analogies are extensively used in the analysis of plane electromagnetic wave propagation in bounded media.

## 2. COURSE COUTCOMES (CO):

Upon successful completion of the course, students will be able to:

CO1 • Illustrate the concepts and characteristics of different networks.

CO2 • Outline the Two networks and analyse their parameters.

CO3 • Examine the principles and operation of attenuators

CO4 • Examine the principles, characteristics, and applications of filters.

CO5 • Examine the concept of Transmission Lines

## 2. SUGGESTED COURSE ARTICULATION MATRIX (CAM):

\* PSOs will be developed by respective programme coordinator at institute level. As per latest NBA guidelines, formulating PSOs is optional.

## 3. CONTENT

### UNIT 1- BASIC ELECTRICAL CIRCUITS& THEOREM ( 06 Periods)

Node and Mesh analysis, Superposition Theorem, Thevenin Theorem, Norton's Theorem, Maximum Power Transfer Theorem, Reciprocity Theorem.

| Ex. No. | Name of Experiment | Periods |
|---------|--------------------|---------|
|---------|--------------------|---------|

|    |                                                                                                   |   |
|----|---------------------------------------------------------------------------------------------------|---|
| 1. | Verify voltage and current using Node analysis in a DC resistive circuit.                         | 2 |
| 2. | Verify voltage and current using Mesh analysis in a DC resistive circuit.                         | 2 |
| 3. | Verification of electrical circuit using Thevenin's theorem.                                      | 2 |
| 4. | Verification of electrical circuit using Norton's theorem.                                        | 2 |
| 5. | Verification of electrical circuit using Maximum Power Transfer theorem.                          | 2 |
| 6. | Use Superposition theorem to determine current/voltage in a linear circuit with multiple sources. | 2 |

## UNIT 2- TWO PORT NETWORK

( 05 Periods)

Two Port Network: Open Circuit Impedance Parameters, Short Circuit Admittance Parameters, Transmission Parameters Hybrid Parameters.

Overview of T network,  $\pi$  network, Ladder network; Lattice network

| Ex. No. | Name of Experiment                                                           | Periods |
|---------|------------------------------------------------------------------------------|---------|
| 7.      | Determine Z-parameters of a two-port network.                                | 1       |
| 8.      | To determine the Y parameters of a Two-port network                          | 1       |
| 9.      | Determine transmission line parameters A, B, C, and D of a two-port network. | 1       |
| 10.     | To determine Hybrid parameters of a Two-port network.                        | 1       |

## UNIT 3- ATTENUATOR

(06 Periods)

Units of attenuation (Decibels and Nepers): General characteristics of attenuators - Analysis and design of simple attenuator of following types; Symmetrical T and  $\pi$  type, L type.

| Ex. No. | Name of Experiment                                                                                              | Periods |
|---------|-----------------------------------------------------------------------------------------------------------------|---------|
| 11.     | To design and verify a symmetrical T-type attenuator for a given attenuation and characteristic impedance.      | 1       |
| 12.     | To design and verify a symmetrical $\pi$ -type attenuator for a specified dB loss and characteristic impedance. | 1       |

## UNIT 4- FILTER

( 06 Periods)

Brief idea of the use of filter networks in different communication systems, concept of low pass, high pass, band pass and band stop filters. Active Filters Basic concept of active filters and their comparison with passive filters.

| Ex. No. | Name of Experiment                                                                      | Periods |
|---------|-----------------------------------------------------------------------------------------|---------|
| 13.     | To study the frequency response of a Low Pass Filter and observe the cut-off frequency. | 1       |
| 14.     | To study the frequency response of a High Pass filter and observe the cut-off frequency | 1       |
| 15.     | To study the frequency response of a Band Pass filter and observe the cut-off frequency | 2       |
| 16.     | To study the frequency response of a Band Stop filter and observe the cut-off frequency | 2       |
| 17.     | To construct and test a Band Pass Filter and study its center frequency and bandwidth.  | 2       |

## UNIT 5- TRANSMISSION LINE

( 05 Periods)

Transmission Lines, their types and applications, Distributed constants, T and  $\pi$  representation of transmission line section, Concept of reflection and standing waves, definition of reflection coefficient, SWR & VSWR and their relation (no derivation), Concept of transmission lines at high frequencies.

| Ex. No. | Name of Experiment                                                      | Periods |
|---------|-------------------------------------------------------------------------|---------|
| 18.     | To observe reflections due to impedance mismatch in transmission lines. | 2       |

## 5. TEXT BOOKS/REFERENCE BOOKS:

1. Network Filters and Transmission Lines by AK Chakarvorty; Dhanpat Rai and Co. Publication, New Delhi
2. Rahul Wadhwa, Network, Filters & Transmission Lines, Asian Publishers, Muzaffarnagar. ISBN: 978-93-5502-112-0
3. Networks and Systems by Ashfaq Husain, Khanna Publishing House
4. Network Analysis by Soni and Gupta; Dhanpat Rai and Co. Publication, New Delhi
5. Network Filters and Transmission Line by Yash Pal; Ishan Publications, Ambala City
6. Electrical and Electronics Measuring instrumentation, A.K Sawhney; Dhanpat Rai and Co. Publication, New Delhi

## 7. INSTRUCTIONAL STRATEGY

Stress should be laid on problems in networks/ filler and transmission lines. Practical must be carried out after completion of topic to gain a good know how on the subject students should be given home assignments on various topics, stress on making own circuit models to calculate input/output impedance, characteristic impedance, losses etc. should be carried out by the students.

|     |                                                    |              |

## 1. COURSE OBJECTIVES

This course enables students to develop the skills required to utilize basic electronic devices in various electronic circuits. Through the study of this course, the students will understand the construction, working principle, characteristics and applications of various types of semiconductor devices such as diodes and transistors. These devices form the fundamental building blocks of amplifiers, oscillators, switching circuits, wave-shaping circuits, and power supplies. The knowledge gained from this core subject is crucial for understanding advanced courses introduced later in the diploma program and for developing the practical skills necessary for effective performance in the electronics industry.

## 2. COURSE OUTCOMES (CO):

The practical should be carried out in such a manner that students are able to acquire different learning outcomes in cognitive, psychomotor and affective domain to demonstrate following course outcomes.

**Students will be able to**

- CO1 • Explain the working principles of different semiconductor devices.
- CO2 • Measure and calculate various parameters of different semiconductor devices.
- CO3 • Analyze and interpret the V-I characteristics of various semiconductor devices.
- CO4 • Design oscillators for specified operating frequencies.
- CO5 • Compare SCR, DIAC, TRIAC and IGBT.

#### 4.LIST OF EXPERIMENTS

| Ex. No. | Name of Experiment                                                                                                                                | Periods |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1.      | Construct the circuit and plot the VI characteristics of the PN Junction Diode , find the cut in voltage                                          | 4       |
| 2.      | Plot the V-I Characteristic of Zener Diode.                                                                                                       | 4       |
| 3.      | Plot the V-I Characteristic of Photo Diode.                                                                                                       | 4       |
| 4.      | Plot the V-I Characteristic of Light emitting Diode.                                                                                              | 4       |
| 5.      | Simulate half wave, full wave and bridge rectifier using simulation tool like P Spice/ Orcad/ Multisim.                                           | 4       |
| 6.      | Construct a Half Wave Rectifier and obtain regulation characteristics – Without Filters and with Filters Compare the results.                     | 4       |
| 7.      | Construct a Full Wave Rectifier and obtain regulation characteristics – Without Filters and with Filters Compare the results.                     | 4       |
| 8.      | Plot input and output characteristics of transistor in CB /CE/CC configuration.                                                                   | 4       |
| 9.      | Build and test voltage divider biased type amplifier & measure voltage at different points on the circuit and observe waveforms.                  | 4       |
| 10.     | Obtain the characteristics of DIAC and TRIAC 3                                                                                                    | 4       |
| 11.     | Obtain frequency response of Single stage RC/RL -coupled amplifier.                                                                               | 4       |
| 12.     | Develop a simulation model for Voltage Series and Voltage Shunt Feedback Amplifiers                                                               | 3       |
| 13.     | Develop circuits for Voltage Series and Voltage Shunt Feedback Amplifiers and obtain output plots. Compare the results with the simulation model. | 3       |
| 14.     | Develop a simulation model for Current Series and Current Shunt Feedback Amplifiers                                                               | 3       |
| 15.     | Develop circuits for Current Series and Current Shunt Feedback Amplifiers and obtain output plots. Compare the results with the simulation model. | 3       |

## **5. INSTRUCTIONAL STRATEGY**

Electronic Components & Devices being a fundamental subject, it needs to be handled very carefully and in a manner such that students develop clear understanding of the related concepts and principles. The teacher may lay more emphasis on laboratory work and give home assignments to students to inculcate self-study and problem-solving abilities amongst them.

| 3.6 | DIGITAL ELECTRONICS (Practical) | L T P |
|     |                                 | 0 0 4 |

## 1. COURSE OBJECTIVES

The objective of a Digital Electronics Practical Course is to provide hands-on experience in understanding and implementing fundamental concepts of digital electronics. The course aims to familiarize students with the design, analysis, and troubleshooting of digital circuits, including logic gates, flip-flops, multiplexers, and counters. Through laboratory experiments, students will apply Boolean algebra, binary arithmetic, and digital system principles to practical circuit implementation. The course also develops skills in using digital measuring instruments, designing reliable circuits, and verifying their performance.

## 2. COURSE OUTCOMES (CO):

Practical sessions shall be conducted in a manner that enables students to achieve learning outcomes across the cognitive, psychomotor, and affective domains. Upon successful completion of the course, students will be able to:

- CO1 • Understand the fundamentals of logic gate implementation.
- CO2 • Create a digital circuit for the provided boolean expression.
- CO3 • Construct basic combinational circuits and verify their functionalities.
- CO4 • Design basic sequential circuits.
- CO5 • Store/retrieve data from memory

\* PSOs will be developed by respective programme coordinator at institute level. As per latest NBA guidelines, formulating PSOs is optional.

#### 4.LIST OF EXPERIMENTS

| Ex. No. | Name of Experiment                                                                                                                               | Periods |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1.      | Verification of Demorgan's Theorems.                                                                                                             | 4       |
| 2.      | To verify the truth tables for all logic Gates—<br>NOT,OR,AND,NAND,NOR, X-OR, X-NOR Gates.                                                       | 4       |
| 3.      | Realization of Logic Gates using universal Gates.                                                                                                | 3       |
| 4.      | Design and verification of the truth tables of Half and Full Adder circuits.                                                                     | 3       |
| 5.      | Design and verification of the truth tables of Half and Full Subtractor circuits.                                                                | 3       |
| 6.      | Design and verification of the truth tables of 4 to 1 Multiplexer (74150) and 1 to 4 De-Multiplexer (74154) circuits.                            | 4       |
| 7.      | To convert a given octal input to the binary output and to study the LED display using 7447 7-segment decoder.                                   | 4       |
| 8.      | Construct and test the performance of parity generator.                                                                                          | 3       |
| 9.      | Design and test of an S-R flip-flop using NOR/NAND gates.                                                                                        | 4       |
| 10.     | Design and test of an J-K flip-flop using NOR/NAND gates.                                                                                        | 4       |
| 11.     | Design and test of an T flip-flop using NOR/NAND gates.                                                                                          | 4       |
| 12.     | Construct and test the performance of Decade counter.                                                                                            | 4       |
| 13.     | Design a Programmable Up-Down Counter with a 7 Segment Display.                                                                                  | 4       |
| 14.     | Design of 4-bit shift register.                                                                                                                  | 4       |
| 15.     | To conduct an experiment to store a set of data in a RAM using IC 2114 starting from location .....to location ..... and retrieve the same data. | 4       |

#### 5. INSTRUCTIONAL STRATEGY

Digital Electronics Practical course focuses on a hands-on, experiential learning approach. It integrates theoretical concepts with practical experiments to reinforce understanding. Initially, students are introduced to basic digital components and circuits through demonstrations. Following this, they engage in guided experiments, designing and testing circuits such as logic gates, flip-flops, and counters. Interactive discussions, problem-solving sessions, and troubleshooting exercises encourage critical thinking. To enhance learning, students use simulation software and real-time equipment, ensuring proficiency in digital tools.

## 1. COURSE OBJECTIVES

This course is designed to provide the basic concepts of Product Design and Development (PDD), understanding of various phases of PDD, hands on CAD on various tools used for PDD, Manufacturing Considerations, Detail Design and Engineering, 3D CAD design tool with its different features and applications, concept creation and 3D modelling, part design, generative shape design, assembly design, etc., prototyping of concept models using Additive Manufacturing. This course helps students to convert Ideas into real products.

## 2. COURSE OUTCOMES(CO):

The subject should be taught in such a manner that students are able to acquire different learning outcomes in cognitive, psychomotor and affective domain to demonstrate following course outcomes.

**Students will be able to**

CO1 • Comply with industry health, safety and environment (HSE) guidelines.

CO2 • Familiarize with the product design process to design a new product.

CO3 • Use CAD software to create solid part models, sheet metal models, and assembly models.

CO4 • Develop concept models, detail design, engineering drawing and GD&T principles.

CO5 • Create 3D printable parts using CAD modeling and slicing software.

**Legend:** High (3), Medium (2), Low (1) and No mapping (-)

\* PSOs will be developed by respective programme coordinator at institute level. As per latest NBA guidelines, formulating PSOs is optional.

## 4. CONTENT

## **UNIT 1- INDUSTRIAL SAFETY PRACTICES**

( 04 Periods)

- (i) Types and use of fire extinguishers.
- (ii) Safe handling and maintenance of tools and equipment.
- (iii) Importance of using proper tools.
- (iv) Occupational safety and health (OSH) practices.

## **UNIT 2- INTRODUCTION TO PRODUCT DESIGN DEVELOPMENT**

( 06 Periods)

- (i) Introduction and need for product design.
- (ii) Stages of the PDD process and standard industry practices.
- (iii) Key elements: market research, customer needs, feasibility, concept design, ergonomics, regulatory aspects, and cost.
- (iv) Detailed design: material selection, Design for Assembly (DFA), Design for Manufacturing (DFM) and Design failure mode and effect analysis (DFMEA)
- (v) Verification, validation, quality control, packaging.
- (vi) Program management and product support.

## **UNIT 3- ENGINEERING DRAWING & 3D DESIGN TOOLS**

(06 Periods)

- (i) Basics of engineering drawings, projections, and views.
- (ii) Concept creation, 2D/3D design, and use of design tools.
- (iii) Introduction to 3D CAD software and its applications.
- (iv) Overview of modules: part, surface, assembly, drawing.
- (v) Interface, customization, specification tree, and layout.

## **UNIT 4- CONCEPT CREATION & 3D MODELLING**

( 06 Periods)

- (i) Sketcher tools and dimensional constraints.
- (ii) Part design (Pad, Pocket, Hole, etc.).
- (iii) Surface design (Extrude, Sweep, etc.).
- (iv) Assembly design, constraints, exploded views, BOM.
- (v) Engineering drawings and GD&T.
- (vi) Case studies on modelling different materials.

## **UNIT 5- ADDITIVE MANUFACTURING**

( 06 Periods)

- (i) Basics of prototyping and 3D printing.
- (ii) Material types and selection based on properties and applications.
- (iii) 3D printing process and industrial uses.
- (iv) Introduction to slicing software and its functions

## 5. INSTRUCTIONAL STRATEGY

To effectively deliver the above content, begin with interactive lectures and multimedia presentations to introduce core concepts, supported by real-world case studies. Incorporate demonstrations and guided tutorials, especially for CAD tools, engineering drawing, and additive manufacturing. Encourage collaborative group work and design projects to foster creativity and problem-solving in product development. Practical sessions should follow each theory component, allowing learners to immediately apply their knowledge through lab-based exercises and simulations. Finally, integrate industry guest talks or virtual factory visits to expose students to current practices and trends, making the learning process more engaging and career-relevant.

## 6. SUGGESTED DISTRIBUTION OF MARKS

| <b>Topic</b> | <b>Time Allotted<br/>(Periods)</b> | <b>Marks Allotted<br/>(%)</b> |
|--------------|------------------------------------|-------------------------------|
| <b>1</b>     | <b>4</b>                           | <b>12</b>                     |
| <b>2</b>     | <b>6</b>                           | <b>22</b>                     |
| <b>3</b>     | <b>6</b>                           | <b>22</b>                     |
| <b>4</b>     | <b>6</b>                           | <b>22</b>                     |
| <b>5</b>     | <b>6</b>                           | <b>22</b>                     |
| <b>Total</b> | <b>28</b>                          | <b>100</b>                    |

|         |                                                                    |              |

### 1. COURSE OBJECTIVES

This course is designed to provide a strong foundation in the basic concepts of innovation and design thinking. Students will develop creative ideas through structured brainstorming sessions and validate them using 3D printing and confirmatory testing. Design thinking is an iterative process that helps in understanding user needs and usage patterns, challenging assumptions, redefining problems, and creating innovative solutions. It is particularly effective for solving problems that are ill-defined or unknown.

### 2. COURSE OUTCOMES (CO):

The subject should be taught in such a manner that students are able to acquire different learning outcomes in cognitive, psychomotor and affective domain to demonstrate following course outcomes.

#### Students will be able to

- CO1 • Comply with Industry health, safety and environmental (HSE) guidelines.
- CO2 • Create value by applying problems solving methods and innovation techniques.
- CO3 • Create innovative products, processes, services, business models etc.
- CO4 • Familiarise with 3D CAD modelling software and apply common Engineering standards, symbols.
- CO5 • Initiate and refine a startup or entrepreneurial venture with basic business planning.

### 3. SUGGESTED COURSE ARTICULATION MATRIX (CAM):

**Legend:** High (3), Medium (2), Low (1) and No mapping (-)

\* PSOs will be developed by respective programme coordinator at institute level. As per latest NBA guidelines, formulating PSOs is optional.

## **4. CONTENT**

### **UNIT 1- INDUSTRIAL SAFETY PRACTICES**

( 04 Periods)

- (i) Types and use of fire extinguishers.
- (ii) Safe handling and maintenance of tools and equipment.
- (iii) Importance of using proper tools.
- (iv) Occupational safety and health (OSH) practices.

### **UNIT 2- INTRODUCTION TO INNOVATION & DESIGN THINKING**

( 06 Periods)

- (i) Definition, types, and necessity of innovation.
- (ii) Linear vs non-linear innovation; open vs closed models.
- (iii) Design thinking: principles, mindset, and value.
- (iv) Risk-reward analysis in innovation.
- (v) From innovation to start-up: key steps.
- (vi) Scoping and foundational principles of design thinking.

### **UNIT 3- DESIGN THINKING TOOLS & IDEA GENERATION**

( 06 Periods)

- (i) Brainstorming techniques and tools.
- (ii) Phases of design thinking: Explore, Empathize, Experiment, Engage, Evolve.
- (iii) Tools: SCOPES, STEEP, POEMS, SCAMPER.
- (iv) Deep user needs analysis (SPICE).
- (v) Idea selection, concept development, prototyping.
- (vi) Storytelling, co-creation, strategic alignment.
- (vii) Case studies.

### **UNIT 4- INTRODUCTION TO 3D MODELING & ADDITIVE MANUFACTURING**

( 06 Periods)

- (i) CAD tools, 3D modeling, product drawing & BOM.
- (ii) Prototyping basics and its industrial role.
- (iii) Additive vs traditional manufacturing.
- (iv) Types of 3D printers, components, working, software (slicing).
- (v) Laser cutting basics, process, applications, pros & cons.
- (vi) Case studies and latest advancements.

### **UNIT 5- START-UP & PROJECTION PLAN**

( 06 Periods)

- (i) Basics of management, leadership, HR, communication, and production.
- (ii) Entrepreneurial concepts and forms of business.
- (iii) Start-up essentials: planning, research, vision, model, operations.
- (iv) Business modeling, market positioning, financial analysis.
- (v) Start-up success factors and common failure points.
- (vi) Case studies and project work.

## 5. INSTRUCTIONAL STRATEGY

The teacher should lay stress on Demonstrations & Role Play, Video-Based Learning, Case Study Analysis: Discuss successful innovations to highlight theory in practice. He should assign real-world problems for learners to solve using design thinking, organize Software Tutorials and Business Plan Workshops.

## 6. SUGGESTED DISTRIBUTION OF MARKS

| <b>Topic</b> | <b>Time Allotted<br/>(Periods)</b> | <b>Marks Allotted<br/>(%)</b> |
|--------------|------------------------------------|-------------------------------|
| <b>1</b>     | <b>4</b>                           | <b>12</b>                     |
| <b>2</b>     | <b>6</b>                           | <b>22</b>                     |
| <b>3</b>     | <b>6</b>                           | <b>22</b>                     |
| <b>4</b>     | <b>6</b>                           | <b>22</b>                     |
| <b>5</b>     | <b>6</b>                           | <b>22</b>                     |
| <b>Total</b> | <b>28</b>                          | <b>100</b>                    |

|     |                                              |       |
|-----|----------------------------------------------|-------|
| 4.1 | MICROPROCESSOR AND ITS APPLICATIONS (Theory) | L T P |
|     |                                              | 3 0 0 |

## 1. COURSE OBJECTIVES

The course provides a strong foundation in microprocessor concepts and evolution, with emphasis on 8085 and 8086 architectures. It covers instruction sets, assembly language programming, memory organization, and peripheral interfacing. Students will also develop practical skills through programming and explore real-world applications of microprocessor-based systems.

## 2. COURSE OUTCOMES(CO):

The theory should be carried out in such a manner that students are able to acquire different learning outcomes in cognitive, psychomotor and affective domain to demonstrate following course outcomes.

**Students will be able to**

CO1 • Explain the architecture, operation, and instruction set of microprocessors.

CO2 • Develop assembly language programs for microprocessors.

CO3 • Interface microprocessors with memory and peripheral devices.

CO4 • Design and implement microprocessor-based systems for real-world applications.

CO5 • Compare microprocessors and microcontrollers and understand their role in embedded systems.

## 3. SUGGESTED COURSE ARTICULATION MATRIX (CAM):

| CO No. | PO1<br>Basic and Discipline Specific Knowledge | PO2<br>Problem Analysis | PO3<br>Design/ Development of Solutions | PO4<br>Engineering Tools | PO5<br>Practices for Society, Sustainability and Environment | PO6<br>Project Management | PO7<br>Life Long Learning | PSO1 | PS O2 |
|--------|------------------------------------------------|-------------------------|-----------------------------------------|--------------------------|--------------------------------------------------------------|---------------------------|---------------------------|------|-------|

| CO5    | 2                                              | 2                       | 2                                       | 1                        | 1                                                            | 1                         | 2                         | *    | *     |

**Legend:** High (3), Medium (2), Low (1) and No mapping (-)

\* PSOs will be developed by respective programme coordinator at institute level. As per latest NBA guidelines, formulating PSOs is optional.

## 4. CONTENTS

### **UNIT 1- INTRODUCTION TO MICROPROCESSOR (10 periods)**

Evolution and History of microprocessors, Introduction to 8-bit, 16-bit, and 32-bit processors,

Architecture and Operation of the 8085 microprocessor, Addressing modes and Bus organization

Architecture and Operation of the 8086 microprocessor, Addressing modes and Bus organization

### **UNIT 2- 8086 MICROPROCESSOR PROGRAMMING (12 periods)**

Instruction set of 8086 microprocessors, Assembly language programming, Stack, Subroutines and Interrupt Handling

### **UNIT 3- INTERFACING WITH PERIPHERAL DEVICES (8 periods)**

Memory and I/O interfacing, 8255 Programmable Peripheral Interface, DC, DAC, and sensor interfacing, Serial and parallel communication

### **UNIT 4- MICROPROCESSOR-BASED SYSTEM DESIGN (6 periods)**

Design of microprocessor-based control systems, Industrial applications of microprocessors, Data acquisition and process control, Case studies of real-world applications

### **UNIT 5- MICROCONTROLLERS AND EMBEDDED SYSTEMS (6 periods)**

Introduction to Microcontrollers (8051), Difference between microprocessors and microcontrollers, Role of microcontrollers in embedded systems, Applications of modern microprocessor-based systems

## 5. TEXT BOOKS/ REFERENCE BOOKS:

1. Ramesh Gaonkar, Microprocessor Architecture, Programming, and Applications with the 8085, PHI.
2. Douglas V. Hall, Microprocessors and Interfacing: Programming & Hardware, McGraw-Hill.
3. Kenneth J. Ayala, The 8051 Microcontroller, Cengage Learning.
4. B.B. Dwivedi, Microprocessors & Peripheral Devices, Asian Publishers, Muzaffarnagar. ISBN: 978-93-91541-77-4
5. A.P. Godse & D.A. Godse, *Microprocessor and its Applications*, Technical Publications.
6. Muhammad Ali Mazidi, *The 8051 Microcontroller and Embedded Systems*, Pearson.

## 6. INSTRUCTIONAL STRATEGY

The approach involves explaining concepts with real-world examples, hands-on microprocessor programming, and developing microprocessor-based systems. It also encourages self-study and case study discussions to enhance problem-solving skills.

## 7. SUGGESTED DISTRIBUTION OF MARKS

| <b>Topic</b> | <b>Time Allotted<br/>(Periods)</b> | <b>Marks Allotted<br/>(%)</b> |
|--------------|------------------------------------|-------------------------------|
| <b>1</b>     | <b>10</b>                          | <b>24</b>                     |
| <b>2</b>     | <b>12</b>                          | <b>29</b>                     |
| <b>3</b>     | <b>8</b>                           | <b>19</b>                     |
| <b>4</b>     | <b>6</b>                           | <b>14</b>                     |
| <b>5</b>     | <b>6</b>                           | <b>14</b>                     |
| <b>Total</b> | <b>42</b>                          | <b>100</b>                    |

|-----|-------------------------------------------------|-------|
| 4.2 | PRINCIPLES OF ELECTRONIC COMMUNICATION (Theory) | L T P |
|     |                                                 | 3 0 0 |

## 1. COURSE OBJECTIVES

The rapid advancements in communication engineering necessitates a thorough understanding of its fundamental principles. This course aims to equip students with comprehensive knowledge of filters, modulation-demodulation and antenna which will prepare students to analyse, troubleshoot and adapt to the advancements in the field of communication technologies.

## 2. COURSE OUTCOMES(CO):

The theory should be taught in a manner that enables students to achieve learning outcomes across cognitive, psychomotor and affective domains, demonstrating the following course outcomes:

CO1• Understand the basic principles and components of communication systems.

CO2• Analyze communication channel performance considering bandwidth, noise, and signal distortion.

CO3• Design a basic communication system.

CO4• Select appropriate modulation techniques for specific applications based on performance criteria.

CO5• Understand the fundamentals and basic characteristics of antenna.

## 3. SUGGESTED COURSE ARTICULATION MATRIX (CAM):

**Legend:** High (3), Medium (2), Low (1) and No mapping (-)

\* PSOs will be developed by respective programme coordinator at institute level. As per latest NBA guidelines, formulating PSOs is optional.

## 4. CONTENTS

### UNIT 1- INTRODUCTION TO COMMUNICATION ENGINEERING (04 Periods)

Introduction to electromagnetic frequency spectrum- relationship between wavelength and frequency

**Filters:** Definition, types of filters and their frequency response characteristics- LPF, HPF and BPF - applications

**Noise:** Definition, Types of noise and their sources, SNR and noise figure

**Distortion** - Definition, types of distortion, Difference between noise and distortion

Concept of fidelity, selectivity and sensitivity

**Introduction to modulation-** Need of modulation, Concept of frequency translation

### UNIT 2- AMPLITUDE MODULATION (11 Periods)

Definition of amplitude modulation, Expression for AM and its waveform representation, frequency spectrum and bandwidth of AM wave, relative power distribution in carrier and side bands.

Elementary idea of DSB, DSB-SC SSB and VSB modulation

**Principles of AM modulators:** Square Law Modulator, Balanced Modulator

**Principles of AM Demodulator:** Diode Detector Circuit

Need and Principles of Super Heterodyne Receiver

### UNIT 3- ANGLE MODULATION (11 Periods)

**Frequency Modulation:** Concept of Angle Modulation, Definition of FM modulation, Waveform representation of FM, Expression for FM and its frequency spectrum, modulation index, maximum frequency deviation and deviation ratio, bandwidth a FM signals, Carzon's rule, Pre-emphasis and De-emphasis, FM modulator and demodulator circuit in brief

**Phase Modulation:** Definition, expression for PM and its frequency spectrum, modulation index, PM modulator and demodulator circuit in brief, comparison of FM, PM and AM communication systems

### UNIT 4 - DIGITAL MODULATION TECHNIQUES (10 Periods)

**Digital Modulation Techniques-** ASK, FSK, PSK, BPSK modulation and demodulation techniques (only block diagram, operation and waveforms)- Basic concept of OFDM

**Pulse modulation techniques:** Generation and detection of PAM PWM and PPM

**Pulse Digital modulation techniques:** PCM and DM transmitter and receiver

## UNIT 5 - INTRODUCTION TO ANTENNAS

(06 Periods)

Definition of Antenna, Importance and applications of Antenna, Basic parameters: radiation pattern, gain, directivity, impedance, polarization

### 5. TEXT BOOKS/ REFERENCE BOOKS

1. Principles of communication systems by Taub Schilling, T.M.H.
2. Fundamentals of communication systems by Proakis & Salehi, Pearson education
3. Communication Systems by Simon Haykin, John Wiley
4. Communication Systems (Analog and Digital) By R.P. Singh, S.D. Sapre, T.M.H.
5. Modern Digital & Analog Communication by B.P. Lathi, Oxford Publications
6. Digital & Analog Communication Systems by K.S. Shanmugam, John Wiley
7. Rahul Wadhwa, Principles of Communication Engineering Asian Publishers, Muzaffarnagar. ISBN: 978-93-5502-128-1
8. E-books/e-tools to be used as recommended by AICTE/NITTTR, Chandigarh.

### 6. INSTRUCTIONAL STRATEGY

An effective strategy will involve a blend of theory and hands-on practice. Start with foundational concepts like signal processing and modulation techniques, followed by practical experiments and simulations. Encourage problem-solving, group discussions, and case studies to reinforce understanding and foster critical thinking.

### 7. SUGGESTED DISTRIBUTION OF MARKS

| Topic        | Time Allotted<br>(Periods) | Marks Allotted<br>(%) |
|--------------|----------------------------|-----------------------|
| 1            | 4                          | 10                    |
| 2            | 11                         | 26                    |
| 3            | 11                         | 26                    |

### 1. COURSE OBJECTIVES

Instrumentation is an emerging field used in data detection, acquisition, analysis and control in industrial applications. Analog and digital instruments are mainly used to determine different process parameters. These instruments present the desired information in visual indication either in analog or digital form. The course builds on students' knowledge of basic measuring tools, covering the principles, concepts, and techniques of analog and digital electronic measurement methods for accurate process parameter determination.

### 2. COURSE OUTCOMES

The theory should be taught should be carried out in such a manner that students are able to acquire different learning outcomes in cognitive, psychomotor and affective domain to demonstrate following course outcomes.

**Students will be able to**

CO1• Measure various electrical parameters with accuracy, precision, resolution.

CO2• Use AC and DC bridge circuits to measure electrical quantities effectively.

CO3• Operate electronic instruments for measurement and data acquisition in engineering applications.

CO4• Use front-panel controls of CRO/DSO to perform correct measurements and signal analysis.

CO5• Select suitable passive or active transducers for measuring various physical phenomena.

### 3. SUGGESTED COURSE ARTICULATION MATRIX (CAM):

| CO no. | PO1<br>Basic and Discipline Specific Knowledge | PO2<br>Problem Analysis | PO3<br>Design/ Development of Solutions | PO4<br>Engineering Tools | PO5<br>Practices for Society Sustainability and Environment | PO6<br>Project Management | PO7<br>Life Long Learning | PSO1 | PS O2 |

**Legend:** High (3), Medium (2), Low (1) and No mapping (-)

\* PSOs will be developed by respective programme coordinator at institute level. As per latest NBA guidelines, formulating PSOs is optional.

## 4. CONTENT

### UNIT 1- BASICS OF MEASUREMENTS

(04 Periods)

Measurement, Method of measurements, Types of instruments, Accuracy & Precision, Sensitivity, Resolution, Types of Errors, Sources of errors, Loading effect

### UNIT 2- AC AND DC AND BRIDGES

(04 Periods)

DC Bridges –Wheatstone and Kelvin Double Bridge (Only comparative study)

AC Bridges - Maxwell's Bridge, Hay's Bridge, Anderson Bridge, De-Sauty's Bridge (Only comparative study)

| Ex. No. | Name of Experiment                                                                             | Periods |
|---------|------------------------------------------------------------------------------------------------|---------|
| 1.      | Determine the value of unknown resistance using Wheatstone bridge.                             | 2       |
| 2.      | Measure Low resistance by Kelvin's Double Bridge.                                              | 2       |
| 3.      | Measure unknown inductance using following bridges (a) Anderson's Bridge (b) Maxwell's Bridge. | 2       |

### UNIT 3- MEASURING INSTRUMENTS

(07 Periods)

Permanent Magnet Moving Coil Instruments (PMMC), Moving Iron Type Instruments (MI), Electro Dynamo Type Instruments, Single Phase Energy Meter, Applications of DC Potentiometer and AC Potentiometers, Various types of Electronic Instruments.

| Ex. No. | Name of Experiment                                                                                                         | Periods |
|---------|----------------------------------------------------------------------------------------------------------------------------|---------|
| 4.      | List various standard sources & measuring <b>UNITs</b> .<br>Measure DC & AC voltages, current using ammeter and voltmeter. | 2       |
| 5.      | Test diodes and transistors using analog and digital Multimeter.                                                           | 2       |
| 6.      | Study the working of Q-meter and measure Q of coils.                                                                       | 2       |

### UNIT 4- OSCILLOSCOPES

(07 Periods)

Cathode ray tube: probe structure (1:1,10:1), construction, operation, screens, Graticules vertical deflection system, Horizontal deflection system, Delay line, Measurement of frequency, time delay, phase angle and modulation index (trapezoidal method), Oscilloscope probe: Structure of 1:1 and 10:1probe, Multiple Trace CRO, Digital storage oscilloscope (DSO).

| Ex. No. | Name of Experiment                                                                             | Periods |
|---------|------------------------------------------------------------------------------------------------|---------|
| 7.      | Operate front panel controls of DSO/CRO to observe various waveforms.                          | 2       |
| 8.      | Measure time, voltage, frequency, phase difference of input signals using DSO/CRO.             | 2       |
| 9.      | Demonstrate features of digital storage oscilloscope.                                          | 2       |
| 10.     | Experiment with front panel controls of various signal generators and observe output Waveform. | 2       |

## UNIT 5- Transducers

(06 Periods)

Classification, Selection Criteria, Characteristics, Construction, Working Principles and Application of following Transducers: RTD, Thermocouple, Thermistor, LVDT, Strain Gauge Load Cell, Piezoelectric Transducers.

| Ex. No. | Name of Experiment                                                                                                      | Periods |
|---------|-------------------------------------------------------------------------------------------------------------------------|---------|
| 11.     | Measure strain/stress using strain gauge measurement.                                                                   | 2       |
| 12.     | Measure displacement using LVDT.                                                                                        | 2       |
| 13.     | Measure temperature using thermistor and thermocouple.                                                                  | 2       |
| 14.     | Using a piezo resistive sensor to measure pressure variations/Using a piezoelectric sensor to measure sound vibrations. | 2       |

## 5. TEXT BOOKS/ REFERENCE BOOKS

1. Electrical & Electronic Measurement & Instruments A.K. Sawhney, Dhanpat Rai & Sons, India
2. Electronic Instrument and Measurement Technique W.D. Cooper Prentice Hall International, India.
3. Electronic Measurement & Instrumentation J.G. Joshi Khanna Publishing House, Delhi
4. Measurement systems application and design E.O. Doebelin and D. N. Manik, Tata Mcgraw-Hill
5. Electronic Measurements and Instrumentation Oliver and Cage, Tata Mcgraw-Hill
6. Basic Electrical Measurement M.B. Stout Prentice hall of India, India
7. Electronic Instrumentation H. S. Kalsi ,Tata Mcgraw-Hill
8. Rahul Wadhwa, Electronic Instruments&Measurement, Asian Publishers, Muzaffarnagar. ISBN: 978-93-5502-137-3

## 6. INSTRUCTIONAL STRATEGY

The subject requires both theory and practical emphasis simultaneously, so that the student can understand the practical significance of the various areas. Visits to instrumentation and communications industries must be carried out, so as to make the students can understand where and how the various instruments are used in the industry.

## 7 . SUGGESTED DISTRIBUTION OF MARKS

| <b>Topic</b> | <b>Time Allotted<br/>(Periods)</b> | <b>Marks Allotted<br/>(%)</b> |
|--------------|------------------------------------|-------------------------------|
| <b>1</b>     | <b>4</b>                           | <b>15</b>                     |
| <b>2</b>     | <b>4</b>                           | <b>15</b>                     |
| <b>3</b>     | <b>7</b>                           | <b>25</b>                     |
| <b>4</b>     | <b>7</b>                           | <b>25</b>                     |
| <b>5</b>     | <b>6</b>                           | <b>20</b>                     |

## 1. COURSE OBJECTIVES

Computers are essential in modern life and play a crucial role in the professional work of technician engineers. Professionals in the computer industry use computers to solve problems more efficiently and effectively. To enable students to use computers for problem-solving, this course introduces the C programming language along with its practical applications. The concepts of C are reinforced through hands-on exercises and programming labs. Additionally, the course introduces Python programming. Upon completion, students will be able to write non-trivial Python programs across diverse domains. Topics include language fundamentals, IDE/IDLE usage, control flow constructs, strings, input/output, collections, classes, modules, and regular expressions.

## 2. COURSE OUTCOMES

Theory and practical sessions should be conducted in a manner that enables students to achieve the following outcomes:

- CO1 • Develop the concepts C programming language and identify a problem and formulate an algorithm for it.
- CO2 • Apply various control structures (loops and decision-making statements) to implement solutions.
- CO3 • Identify and use different data types and variables effectively in C programs.
- CO4 • Use pointers with arrays and structures for efficient memory manipulation.
- CO5 • Understand and apply basic concepts of Python programming.

**Legend:** High (3), Medium (2), Low (1) and No mapping (-)

\* PSOs will be developed by respective programme coordinator at institute level. As per latest NBA guidelines, formulating PSOs is optional.

## 4. CONTENT

### UNIT 1- INTRODUCTION

(0 4 Periods)

Brief idea of low level and high level programming languages, steps in development of a Program, Flow charts, Algorithm development, Programme Debugging, Introduction to Python, Basis of C programming, I/O statements, Assign statements, Constants, variables and data types, Operators and Expressions, Standards and Formatted IOS, Data Type Casting

| Ex. No. | Name of Experiment                                                             | Periods |
|---------|--------------------------------------------------------------------------------|---------|
| 1       | Programming exercises on executing and editing a C program.                    | 4       |
| 2       | Programming exercises on defining variables and assigning values to variables. | 2       |

### UNIT 2- CONTROL STRUCTURES

(02Periods)

Decision making with IF – statement, IF – Else and Nested IF, While and do-while, FOR loop Break. Continue go to and switch statements

| Ex. No. | Name of Experiment                                                                                    | Periods |
|---------|-------------------------------------------------------------------------------------------------------|---------|
| 3       | Programming exercises on arithmetic and relational operators.                                         | 2       |
| 4       | Programming exercises on arithmetic expressions and their evaluation                                  | 4       |
| 5       | Programming exercises on formatting input/output using printf and scanf and their return type values. | 4       |

### UNIT 3- FUNCTIONS

(04Periods)

Introduction to functions, Global and Local Variables, Function Declaration, Standard functions Parameters and Parameter Passing, Call - by value/reference, Recursion

| Ex. No. | Name of Experiment                             | Periods |
|---------|------------------------------------------------|---------|
| 6       | Programming exercises using if statement.      | 2       |
| 7       | Programming exercises using if – Else.         | 4       |
| 8       | Programming exercises on switch statement      | 4       |
| 9       | Programming exercises on do – while, statement | 4       |

**UNIT 4- ARRAYS****(02Periods)**

Introduction to Arrays, Array Declaration, Length of array, Single and Multidimensional Array, Arrays of characters, Passing an array to function, Pointers to an array

| Ex. No. | Name of Experiment                                                                         | Periods |
|---------|--------------------------------------------------------------------------------------------|---------|
| 10      | Programming exercises on for – statement.                                                  | 3       |
| 11      | Programs on one-dimensional array.                                                         | 3       |
| 12      | Programs on two-dimensional array.                                                         | 4       |
| 13      | (i) Programs for putting two strings together.<br>(ii) Programs for comparing two strings. | 2       |

**UNIT 5- POINTERS****(02Periods)**

Introduction to Pointers, Address operator and pointers, Declaring and Initializing pointers  
Single pointer, Introduction to Colab, Programming in Python.

| Ex. No. | Name of Experiment                              | Periods |

**6. INSTRUCTIONAL STRATEGY**

The digital systems in microprocessors have significant importance in the area of electronics. Adequate competency needs to be developed by giving sufficient practical knowledge in microprocessors (programming as well as interfacing), A/D, D/A Converters and other topics. Help may be taken in the form of charts, simulation packages to develop clear concepts of the subject. Programming exercises other than the tested in circulation may be given to the students.

## 1. COURSE OBJECTIVES

The course aims to familiarize students with microprocessor hardware and software, provide hands-on experience in assembly language programming, and develop skills in interfacing microprocessors with peripheral devices. It focuses on microprocessor-based system design and enhances analytical, design, and implementation skills through laboratory experiments.

## 2. COURSE OUTCOMES(CO):

CO1•Write and execute basic assembly language programs using 8085/8086 microprocessors.

CO2 • Develop programs involving arithmetic, logical, and control instructions.

CO3 • Interface microprocessors with input/output devices for real-time applications.

CO4 • Design and simulate microprocessor-based solutions to simple problems.

CO5 • Document and analyse practical experiments effectively.

## 3. SUGGESTED COURSE ARTICULATION MATRIX (CAM):

\* PSOs will be developed by respective programme coordinator at institute level. As per latest NBA guidelines, formulating PSOs is optional.

## 4. LIST OF EXPERIMENTS

| Ex. No. | Name of Experiment                                 | Hours |
|---------|----------------------------------------------------|-------|
| 1.      | Introduction to 8085/8086 kit and instruction set  | 3     |
| 2.      | Add two 8-bit numbers using 8085                   | 3     |
| 3.      | Subtract and compare two 8-bit numbers             | 3     |
| 4.      | Multiply two 8-bit numbers using repeated addition | 3     |

|     |                                                                           |    |
|-----|---------------------------------------------------------------------------|----|
| 5.  | Divide two 8-bit numbers using 8085                                       | 3  |
| 6.  | Block data transfer using 8085                                            | 3  |
| 7.  | Sorting of an array using 8085                                            | 3  |
| 8.  | To add two hexadecimal & decimal numbers using 8085.                      | 3  |
| 9.  | To subtract two hexadecimal & decimal numbers using 8085.                 | 3  |
| 10. | Interfacing ADC/DAC with 8085                                             | 3  |
| 11. | To interface ADC & DAC with 8085 & demonstrate generation of square wave. | 3  |
| 12. | Add two 8-bit numbers using 8086                                          | 3  |
| 13. | Subtract and compare two 8-bit numbers using 8086                         | 3  |
| 14. | Multiply two 8-bit numbers using repeated addition using 8086             | 3  |
| 15. | Divide two 8-bit numbers using 8086                                       | 3  |
| 16. | Block data transfer using 8086                                            | 3  |
| 17. | Sorting of an array using 8086                                            | 3  |
| 18. | Perform various logical operation using 8086                              | 3  |
| 19. | Perform universal gate operation using 8086                               | 3  |
| 20. | Find 1s' and 2's complement of a number in 8086                           | 3  |
| 21. | Program for LED blinking using microprocessor I/O interfacing             | 3  |
| 22. | Stepper motor interfacing using 8255                                      | 3  |
| 23. | Traffic light control simulation using 8085                               | 3  |
|     | REVISION                                                                  | 15 |

## 5. INSTRUCTIONAL STRATEGY

The course begins with fundamental concepts and gradually progresses to more complex topics. Collaborative problem-solving is encouraged through pair or group learning activities. Real-time experiments reinforce theoretical knowledge, while documentation and discussion of outcomes deepen understanding and promote reflection.

| 4.6 | PRINCIPLES OF ELECTRONIC COMMUNICATION (Practical) | L T P |
|     |                                                    | 0 0 6 |

## 1. COURSE OBJECTIVES

This laboratory provides foundational knowledge in communication systems through experiments that cover both theoretical and practical aspects. Students use industry-standard instruments like oscilloscopes and spectrum analysers, alongside simulations with advanced software tools. These exercises offer hands-on experience with core components of modern communication technologies, bridging real-world and simulated environments.

## 2. COURSE OUTCOMES(CO):

CO1 • Understand the basic principles of analog and digital communication systems.

CO2 • Apply modulation and demodulation techniques in communication systems.

CO3• Develop practical skills by operating electronic instruments like oscilloscopes, spectrum analysers, and signal generators.

CO4• Simulate communication systems, analyze results, and evaluate performance under real-world scenarios.

CO5• Measure and analyse key antenna parameters and characteristics.

| 20. | To design a basic communication system.                                                                                                                                          |  |

## 5. INSTRUCTIONAL STRATEGY

Emphasize on hands-on learning through laboratory experiments and simulation tools. Students gain practical experience using instruments like oscilloscopes, spectrum analyzers, and signal generators to test modulation techniques and analyze system performance. Simulation software (MATLAB, P-SPICE) aids in modelling communication systems and analyzing signal behaviour in different conditions. The strategy integrates real-world case studies to link theory with practice, ensuring students understand the application of communication systems in modern technology. Continuous feedback through assessments and project evaluations supports skill development and concept mastery.

|       |                          | 2 0 0 |

## 1. COURSE OBJECTIVES

This course aims to provide a solid foundation in electric vehicle (EV) technology, government policies, and their economic and environmental implications. It explores the different systems and subsystems within electric vehicles and their respective functions. Students will gain insight into the calculations involved in EV design and operation, as well as guidelines for selecting critical components, such as motors, motor controllers, battery packs, battery management systems, charging infrastructure, and regenerative braking. The course also covers essential regulatory standards, safety protocols, electrical wiring harness design, and testing norms for electric vehicles, along with the latest advancements in EV technology.

## 2. COURSE OUTCOMES

The theory should be taught and practical should be carried out in such a manner that

**Students will be able to**

- CO1• Comprehend and adhere to industry health and safety guidelines while working with electric vehicles to mitigate hazards.
- CO2• Identify key components of electric vehicles and their functions and apply basic calculations related to EV design and operation.
- CO3• Diagnose and troubleshoot faults in EV components using systematic testing methods.
- CO4• Apply effective techniques for troubleshooting, repairing, and maintaining electric vehicle systems to ensure safety and reliability.
- CO5• Design and assemble components for basic electric vehicle systems, integrating appropriate safety and performance considerations.

**Legend:** High (3), Medium (2), Low (1) and No mapping (-)

\* PSOs will be developed by respective programme coordinator at institute level. As per latest NBA guidelines, formulating PSOs is optional.

## **4.CONTENT**

### **UNIT 1- INTRODUCTION TO INDUSTRIAL SAFETY PRACTICES & ELECTRIC VEHICLE** (04 Periods)

Fire Extinguishers & its Types, safely handling Tools & Equipment, Use of proper Tools & Equipment & its maintenance, OSH & practices to be observed as a precaution.

Overview electric Vehicle Technologies, India policy regarding electric vehicles, Electric vehicle advantages and limitations, Electric vehicle effects on the economy and environment

### **UNIT 2- ELECTRIC VEHICLE ARCHITECTURE, MOTORS AND CONTROLLERS** (06 Periods)

Types of Electric Vehicles (Overview of electric vehicle technologies like BEV, HEV, PHEV and FCEV.), Basic architecture of electric vehicle drivetrains, Overview of various system and subsystem of Electrical Vehicle and their functions.

Function and operation of electric vehicle motors, Classification of electrical vehicle motors, Types of loads acting on vehicle, Motor specifications, Motor calculation for electric vehicle, Motor selection, Motor controllers and its function, Motor controller selection, Function and operation of a DC-to-DC converter, Basic Wiring harness for EV, Overview of regenerative braking, function & working

### **UNIT 3- ENERGY STORAGE SYSTEM & CHARGING SYSTEM, ELECTRIC VEHICLE BATTERY MANAGEMENT SYSTEM AND BASIC REGULATORY REQUIREMENTS** (08 Periods)

Electric Vehicle Energy Storage & Charging System, Overview of battery pack. (Cell selection, battery connection, battery pack construction), Overview of battery pack sizing, Thermal management, charging system types, Fundamentals of constant voltage and constant current charging, Standards for electric car charging, Connector standards for charging electric vehicles, Calculation for battery recharging and discharge, Pros and Limitations of batteries for electric vehicles, Regenerative Braking Systems.

Introduction to Battery Management System, function of a battery management system (BMS), Block diagram of the battery management system, Thermal control system, cell load distribution, and State of Charge (SOC) and State of Health (SOH) analysis, Difference between high voltage and low voltage system, Maintenance & repairing of electric vehicle system, Basic Regulatory Requirements.

### **UNIT 4- ELECTRIC VEHICLE CIRCUIT PROTECTION SAFETY, REPAIR AND MAINTENANCE OF EV** (06 Periods)

Introduction to electrical wiring harness, Importance of colour coding and labelling on wiring harness, Materials used for wiring harness and its selection criteria, Design consideration in wiring harness, Understand wire gauge and power rating capacity, Types of Electric vehicle Fuses, Electric Vehicle Relays, Selection of relay type, Positioning Fuses and relays in Electric vehicle circuit.

Preventive maintenance of EV, Standard procedure to work on high voltage systems, Diagnosis and fault finding, Schedule servicing of EV, Predictive maintenance of EV.

## **UNIT 5- ELECTRIC VEHICLE TESTING AND TECHNOLOGY ADVANCEMENT IN ELECTRIC VEHICLE** (04 Periods)

Vehicle Performance testing for acceleration, top speed, range, braking, hill climbing, vehicle structure, road handling, weather resistance, etc., Vehicle Durability testing or life expectancy of parts, materials, and components, Safety: battery safety, charging system safety, and occupant safety, Emission standard and its testing, Vehicle Noise standards and its testing, Advancements in electrical vehicle: Autonomous Driving, Battery Technology to improved range, greater efficiency, and faster charging, life span of batteries, Charging Infrastructure (public charging networks, on-the-go charge, development in vehicle overnight charging technology, wireless Charging).

\* Case studies and Mini Project should be carried out throughout the semester.

## 6. INSTRUCTIONAL STRATEGY

Use a blended instructional strategy combining lectures, multimedia, hands-on activities, and case studies to teach electric vehicle concepts. Incorporate project-based learning, real-world demonstrations, and expert talks to deepen understanding. Assess through quizzes, presentations, and practical projects, encouraging exploration of EV technology, environmental impact, and industry trends.

## 7. SUGGESTED DISTRIBUTION OF MARKS

| Topic        | Time Allotted<br>(Periods) | Marks Allotted<br>(%) |

| 4.7.2 | INDUSTRIAL ROBOTICS (Theory) | L T P |
|       |                              | 2 0 0 |

## 1. COURSE OBJECTIVES

This course aims to equip students with foundational and advanced knowledge of industrial robotics, including robot anatomy, programming, kinematics, and control systems. Students will learn to design, simulate, and operate robotic systems used in manufacturing. Emphasis is placed on automation integration, safety protocols, and real-world applications, preparing learners for careers in robotics engineering, industrial automation, and smart manufacturing environments.

## 2. COURSE OUTCOMES

The theory should be taught and practical should be carried out in such a manner that **Students will be able to**

- CO1• Comprehend and adhere to industry health and safety guidelines while working with robotic systems to mitigate hazards.
- CO2• Differentiate between coordinate systems and define the custom or user-defined coordinate frames for robotic operations.
- CO3• Develop basic robot programs incorporating various motion types and relevant parameters.
- CO4• Integrate robot with automation components i.e., PLC HMI, conveyor, and other manufacturing peripherals
- CO5• Generate innovative ideas and apply creative problem-solving approaches to develop robotic automation solutions.

**Legend:** High (3), Medium (2), Low (1) and No mapping (-)

\* PSOs will be developed by respective programme coordinator at institute level. As per latest NBA guidelines, formulating PSOs is optional.

## **4. CONTENT**

### **UNIT 1- INTRODUCTION TO INDUSTRIAL SAFETY PRACTICES AND INTRODUCTION TO INDUSTRIAL ROBOTICS (08 Periods)**

Fire Extinguishers & its Types, safely handling Tools & Equipment, Use of proper Tools & Equipment & its maintenance, OSH & practices to be observed as a precaution.

Introduction of Robots and their Importance in Manufacturing and Production, Applications of robots in manufacturing and assembly for which they can be efficiently utilized, Role of robots and automation systems in boosting the safety at dangerous manufacturing tasks, Structure and functions of robot System (Basic Package) and additional Equipment, Major Applications of Robots-Pick and Place, Arc Welding, Ultrasonic welding, Part Transfer, Packing, Palletizing. Type of End of arm tools and differences between them: Handling tools - Pneumatic Gripper, Vacuum Gripper, Hydraulic Gripper, Hydraulic Gripper, and Servo-Electric Gripper. Welding guns – Arc Welding guns, Spot welding guns. Robotic cell and its various components. Cycle time and its importance. Operator job in robotic cell. Safety procedure for Programmer and an Operator.

### **UNIT 2- JOGGING OF ROBOT (04 Periods)**

Turn ON /OFF Steps of Robot, Checking Robotic cell Health, Introduction to Teach pendant and key functions, Industrial robot Coordinate system, Different coordinate systems in Robots, Defining X, Y, Z co-ordinate system, Jogging Robot using Teach pendant in different Modes of coordinate systems: Joint co-ordinate system, rectangular co-ordinate system, and User or object co-ordinate system, Tool co-ordinate system, TCP (Tool centre point definition) i.e., TCP File. , Creating user defined work objects i.e., user coordinate frame File.(Box, circle, triangle work object definition)

### **UNIT 3- PROGRAMMING OF A OF ROBOT USING TEACH PENDANT (06 Periods)**

Robot Program Structure, Different Motion Types used in Programming (PTP, Linear, Circular, Spline): Move J (PTP) , Move L (Linear) , Move C (Circular) , Move S (Spline) ; Different Motion Parameters used in Program Point Recording, Basic Program creation using Motion types and parameters, Path optimization for smooth robot movement and cycle time, Safety instructions to be followed while loading and unloading of parts.

### **UNIT 4- ROBOT INTEGRATION WITH PLC, HMI AND OTHER EQUIPMENT (06 Periods)**

PLC and robot communication and HMI, Conveyor system and its communication with PLC, Methods to create fencing and safety equipment's, Steps to work with two different types of Robots at same project, Tool mounting on Robot Flange, Different connections of grippers (Electric, Pneumatic etc.).

## UNIT 5- ROBOT PROGRAMMING WITH ADVANCE LEVEL INSTRUCTIONS

(04 Periods)

Loop control instructions, Arithmetic and Logical instructions, Shift instructions, Interfacing End of arm tools to Robot using robot I/O, establishing communication between Robot I/O and PLC modules, Function Keys in Pendant for Arc welding and Material Handling robot, MIG welding Instructions in Robot, MIG welding Program and how to optimize it, Material Handling Program and how to optimize it.

\* Case studies and Mini Project should be carried out throughout the semester.

### 5. TEXT BOOKS/REFERENCE BOOKS

1. **Modern Robotics: Mechanics, Planning, and Control**  
Authors: Kevin M. Lynch, Frank C. Park  
Publisher: Cambridge University Press
2. **Robot Modelling and Control**  
Authors: Mark W. Spong, Francesco Bullo  
Publisher: Wiley
3. **Springer Handbook of Robotics**  
Editors: Bruno Siciliano, Oussama Khatib  
Publisher: Springer
4. **Robotics for Engineers**

Publisher: McGraw-Hill
5. **Robotic Engineering: An Integrated Approach**  
Author: Richard D. Klafter, Thomas A. Chmielewski, Michael Negin  
Publisher: Prentice Hall

### 6. INSTRUCTIONAL STRATEGY

The course combines theoretical instruction with hands-on training using robotic arms and simulation software. Learning is delivered through lectures, demonstrations, and laboratory sessions focused on robot programming, kinematics, and control systems. Project-based learning, real-world case studies, and industry visits are integrated to enhance practical understanding and industry exposure. Student performance is assessed through practical tasks, quizzes, and group projects, reinforcing the application of industrial robotics in real-world scenarios.

### 7. SUGGESTED DISTRIBUTION OF MARKS

| Topic | Time Allotted<br>(Periods) | Marks Allotted<br>(%) |
|-------|----------------------------|-----------------------|

| 4.8 | ESSENCE OF INDIAN KNOWLEDGE AND TRADITION | L T P |
|     |                                           | 2 0 0 |

### COURSE OBJECTIVE:

Understand the fundamental aspects of the Indian Knowledge System, its integration with modern science, principles of Yoga and holistic healthcare, and practical applications in contemporary contexts.

### COURSE OUTCOMES:

Upon completion of the course, the student will be able to demonstrate knowledge of the following topics:

CO1: Overview, importance, and relevance of the Indian Knowledge System, including Vedas, Upavedas, Vedangas, and Upangas.

CO2: Relevance of science and spirituality, and contributions of ancient Indian science and technology.

CO3: Basic principles of Yoga, benefits of holistic healthcare, and integration with modern healthcare.

CO4: Practical applications and case studies of the Indian Knowledge System's relevance today.

**Legend:** High (3), Medium (2), Low (1) and No mapping (-)

\* PSOs will be developed by respective programme coordinator at institute level. As per latest NBA guidelines, formulating PSOs is optional.

## COURSE CONTENTS

### Unit 1: Introduction to Indian Knowledge System

(07 Periods)

Overview of Indian Knowledge System

- Importance and relevance
- Introduction to the Vedas
- Upavedas
- Vedangas
- Upangas

### Unit 2: Modern Science and Indian Knowledge System

(07 Periods)

- Relevance of Science and Spirituality,
- Science and Technology in Ancient India,

### Unit 3: Yoga and Holistic Healthcare

(07 Periods)

- Basic principles of Yoga
- Benefits of holistic healthcare practices
- Integration with modern healthcare

### Unit 4: Case Studies / Assignment

(07 Periods)

- Practical Applications / Case studies demonstrating the relevance of Indian Knowledge System in modern times

#### SUGGESTED DISTRIBUTION OF MARKS

| Topic No. | Time Allotted<br>(Periods) | Marks Allocation<br>(%) |
|-----------|----------------------------|-------------------------|
| 1.        | 07                         | 40                      |
| 2.        | 07                         | 30                      |
| 3.        | 07                         | 15                      |
| 4.        | 07                         | 15                      |
| Total     | 28                         | 100                     |

## **EVALUATION METHODOLOGY**

### **1. EVALUATION METHOD for THEORY**

|                           | Internal Assessment (40 marks) |                       |                                   |                                         | External Assessment (60 marks)  |
|---------------------------|--------------------------------|-----------------------|-----------------------------------|-----------------------------------------|---------------------------------|
|                           | IA 1                           | IA 2                  | IA 3                              | IA 4                                    |                                 |
| <b>Mode</b>               | <b>Written Test</b>            | <b>Written Test</b>   | <b>Attendance and Assignments</b> | <b>Pre – Semester Examination</b>       | <b>End Semester Examination</b> |
| <b>Portion</b>            | 2 units                        | 2 units               | Regularly                         | All units                               | All units                       |
| <b>Duration1hr</b>        | 1hr                            | 1hr                   | -                                 | 3hrs                                    | 3hrs                            |
| <b>Exam Marks</b>         | 20                             | 20                    | 20                                | 60                                      | 60                              |
| <b>Converted to</b>       | 10                             | 10                    | 15                                | 15                                      | 60                              |
| <b>Tentative Schedule</b> | 5 <sup>th</sup> Week           | 10 <sup>th</sup> Week | Regularly                         | 12 <sup>th</sup> -13 <sup>th</sup> Week |                                 |

**IA1 and IA2:** A written assessment test worth 20 marks should be conducted for two units. The marks earned (20 marks) will be converted to 10 marks. The best of the two assessments will be evaluated for an internal 10-mark assessment.

**IA3:** Assignments given after the completion of each unit, along with attendance throughout the semester, will be assessed for a total of 15 marks.

**IA4:** The pre-semester examination should follow the end-semester examination question pattern. The marks should be adjusted to 15 for internal assessment.

## 2. EVALUATION METHOD for PRACTICAL

|                           | Internal Assessment (60 marks) |                       |                                               |                                            | External Assessment (40 marks) |
|---------------------------|--------------------------------|-----------------------|-----------------------------------------------|--------------------------------------------|--------------------------------|
|                           | IA 1                           | IA 2                  | IA 3                                          | IA 4                                       |                                |
| <b>Mode</b>               | <b>Practical Test</b>          | <b>Practical Test</b> | <b>Attendance and Practical Documentation</b> | <b>Practical Test and Quiz – Viva Voce</b> | <b>Practical Examination</b>   |
| <b>Portion</b>            | 50% Practical                  | 50% practical         | All practical                                 | All practical                              | All practical                  |
| <b>Duration</b>           | 3hrs                           | 3 hrs                 | Regularly                                     | 3 hrs                                      | 3hrs                           |
| <b>Exam Marks</b>         | 20                             | 20                    | 20                                            | 20                                         | 40                             |
| <b>Tentative Schedule</b> | 5th Week                       | 10th Week             | Regularly                                     | 12th -13 <sup>th</sup> Week                |                                |

**IA1 and IA2:** Complete all exercises and experiments as outlined and retain them for the practical test. The test should be conducted in accordance with the evaluation scheme. The best of the two practical tests will be internally evaluated for a total of 20 marks.

**IA3:** Maintain a practical file for each exercise while ensuring attendance throughout the semester. Submit the required documents for the practical file, quiz, and practical test along with a valid certificate (Progress Card). This will be assessed for 20 marks.

**IA4:** The pre-semester practical examination, quiz, and viva-voce should follow the end-semester practical examination pattern, with marks adjusted to 20 for internal assessment.

### SUGGESTED DISTRIBUTION OF MARKS FOR INTERNAL EVALUATION

| Part      | Description                           | Marks Allotted |
|-----------|---------------------------------------|----------------|
| <b>A.</b> | Objective                             | 5              |
| <b>B.</b> | Circuit Diagram                       | 5              |
| <b>C.</b> | Procedure and Connections             | 10             |
| <b>D.</b> | Observation Table and Calculation     | 10             |
| <b>E.</b> | Result and its Discussion, Conclusion | 10             |

| Tentative Schedule | 5 <sup>th</sup> Week           |                                | 10 <sup>th</sup> Week |                                | Regularly                              | 12 <sup>th</sup> -13 <sup>th</sup> Week    |                               |

**IA1 and IA2:** A written assessment test worth 10 marks should be conducted for two **UNITs**. Complete all exercises and experiments as outlined and retain them for the practical test worth 20 marks. The practical test should be conducted in accordance with the evaluation scheme. The total marks earned (30 marks) will be converted to 10 marks. The best of the two assessments will be internally evaluated for a total of 10 marks.

**IA3:** Attendance and the pre-semester examination should follow the end-semester examination question paper pattern. The marks should be adjusted to 15 for internal assessment.

**IA4:** Maintain a practical file for each exercise. Submit the required documents for the practical file, quiz/viva-voice, practical test, and end-semester examination, along with a valid certificate (Progress Card). This will be assessed for 40 marks. Additionally, submit a micro-project report along with a fabrication model or analysis report. The performance of each student in the group will be evaluated by both the laboratory supervisor and an internal examiner. The total of 60 marks will be converted to 15 marks.

**SUGGESTED DISTRIBUTION OF MARKS FOR INTERNAL EVALUATION FOR IA4**

| <b>Part</b> | <b>Description</b>                    | <b>Marks Allotted</b> |
|-------------|---------------------------------------|-----------------------|
| <b>A.</b>   | Objective                             | <b>5</b>              |
| <b>B.</b>   | Circuit Diagram                       | <b>5</b>              |
| <b>C.</b>   | Procedure and Connections             | <b>5</b>              |
| <b>D.</b>   | Observation Table and Calculation     | <b>5</b>              |
| <b>E.</b>   | Result and its Discussion, Conclusion | <b>10</b>             |
| <b>F.</b>   | Attendance & Mini Project             | <b>10</b>             |
|             | <b>Total</b>                          | <b>40</b>             |

## LAB EQUIPMENT LIST

#### 4.5 MICROPROCESSOR AND ITS APPLICATIONS

| S. No. | Equipment              | Specification                                                                                                            | Quantity | Price(Approx.) |
|--------|------------------------|--------------------------------------------------------------------------------------------------------------------------|----------|----------------|
| 1.     | Computer with UPS      | Intel I5 processor capable to support “C” programming and required Microcontroller Simulator softwares MPLAB X IDE etc.. | 15       | 40000 (each)   |
| 2.     | PIC 18 Development kit | PIC 18 Development kit, With inbuilt power supply, keyboard, LCD displays, ports for interfacing                         | 6        | 10000 (each)   |

|    |                                               |                                                                                                                                                                                                                           |   |       |
|----|-----------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|-------|
|    |                                               | peripheral and memory.                                                                                                                                                                                                    |   |       |
| 3. | Microcontroller based interfacing study cards | Microcontroller based interfacing study cards, Capable to interface LCD, Keyboard, ADC, DAC, Sensor, Relay, DC motor, Stepper Motor With PIC 18 Development kit.                                                          | 6 | 10000 |
| 4. | Miscellaneous Items                           | 20 Stepper motor 50/100RPM , ADC/DAC(0808) trainer board, LCD trainer board, Relay Trainer board, Keyboard 4*4 trainer board, 20Temperature sensor(Mq series), 20 LDR (I2C light sensor),20 Potentiometer,20 LM35 IC etc. |   | 20000 |

#### 4.6 PRINCIPLES OF ELECTRONICS COMMUNICATION

| Sl. No. | Equipment                                         | Specifications                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Quantity | Price (approx. for each UNIT) |
|---------|---------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|-------------------------------|
| 1       | Desktop latest configuration (Intel i3 processor) | 8th Generation Minimum processor speed 3.0 GHz RAM 4GB DDR4, Min 6 MB, cache HDD 1TB, Networking Integrated Bluetooth 4.0 and wireless LAN 802.11b/g/n CD/DVD disk drive, USB Keyboard & USB,optical mouse, Monitor 18.5 inches or above, Ports HDMI 01 slot, VGA 01 slot, USB 2.0 minimum 4 slots, USB 3.0 minimum 2 slots, Integrated Intel HD graphics, headphones with mic, Webcam : HD Webcam, OS – Windows 10 professional Or Higher Specifications available | 2        | 40000                         |
| 2       | MATLAB Software                                   | Student Version                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 2        | LS                            |
| 3       | Kit - AM Modulation & Demodulation                | Audio Signal Source Type : Sinusoidal<br>Frequency range : 200 Hz to 3.5 KHz<br>Amplitude : 0 – 5 V variable Carrier Source : 1 MHz DC Source/Level Shifter : 0 – 5 V variable Balance Modulator : DSB - AM Transistorized Modulator : DSB - AM Envelope Detector : With adjustable band filter                                                                                                                                                                     | 2        | 20000                         |
| 4       | Kit - FM Modulation and Demodulation              | Audio Signal Source Type Frequency range Amplitude : : : Sinusoidal 0- 3.4 KHz 0 – 5 V variable DC Source/Level Shifter : 0 – 5 V variable Frequency Modulation : Using VCO Frequency                                                                                                                                                                                                                                                                               | 2        | 20000                         |
